Satellite Cities Graham Romeyn Taylor, 2016-06-22 Excerpt from *Satellite Cities A Study of Industrial Suburbs* Congestion with all that it means in choked streets dark work rooms and high taxes has been forcing factories to our city limits and beyond To direct attention to this process and particularly to its civic consequences is the purpose of this book It endeavors to set forth the opportunity in these outskirts for applying the technique which is being developed and the idealism which is finding expression in the new science of town planning For while industrial managers have shown extraordinary foresight Skill and ingenuity in the arrangement of their plants in the outlying areas no such expert planning has gone into the accompanying community development About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Manufacturing Suburbs

Robert Lewis, 2008 Urban historians have long portrayed suburbanization as the result of a bourgeois exodus from the city coupled with the introduction of streetcars that enabled the middle class to leave the city for the more sylvan surrounding regions Demonstrating that this is only a partial version of urban history *Manufacturing Suburbs* reclaims the history of working class suburbs by examining the development of industrial suburbs in the United States and Canada between 1850 and 1950 Contributors demonstrate that these suburbs developed in large part because of the location of manufacturing beyond city limits and the subsequent building of housing for the workers who labored within those factories Through case studies of industrial suburbanization and industrial suburbs in several metropolitan areas Chicago Baltimore Detroit

Pittsburgh Los Angeles San Francisco Toronto and Montreal Manufacturing Suburbs sheds light on a key phenomenon of metropolitan development before the Second World War **Chicago's Industrial Decline** Robert Lewis,2020-12-15 In Chicago's Industrial Decline Robert Lewis charts the city's decline since the 1920s and describes the early development of Chicago's famed and reviled growth machine Beginning in the 1940s and led by local politicians downtown business interest financial institutions and real estate groups place dependent organizations in Chicago implemented several industrial renewal initiatives with the dual purpose of stopping factory closings and attracting new firms in order to turn blighted property into modern industrial sites At the same time a more powerful coalition sought to adapt the urban fabric to appeal to middle class consumption and residential living As Lewis shows the two aims were never well integrated and the result was on going disinvestment and the inexorable decline of Chicago's industrial space By the 1950s Lewis argues it was evident that the early incarnation of the growth machine had failed to maintain Chicago's economic center in industry Although larger economic and social forces specifically competition for business and for residential development from the suburbs in the Chicagoland region and across the whole United States played a role in the city's industrial decline Lewis stresses the deep incoherence of post WWII economic policy and urban planning that hoped to square the circle by supporting both heavy industry and middle to upper class amenities in downtown Chicago **Miscellaneous Series** United States. The Working Man's Reward Elaine Lewinnek, 2014-04-03 Between the 1860s and 1920s Chicago's working class immigrants designed the American dream of home ownership They imagined homes as small businesses homes that were simultaneously a consumer oriented respite from work and a productive space that workers hoped to control Stretching out of town along with Chicago's assembly line factories Chicago's early suburbs were remarkably socially and economically diverse They were marketed by real estate developers and urban boosters with the elusive promise that homeownership might offer some bulwark against the vicissitudes of industrial capitalism that homes might be better than a bank for a poor man and the working man's reward This promise evolved into what Lewinnek terms the mortgages of whiteness the hope that property values might increase if that property could be kept white Suburbs also developed through nineteenth century notions of the gendered respectability of domesticity early ideas about city planning and land economics and an evolving twentieth century discourse about the racial attributes of property values Looking at the persistent challenges of racial difference economic inequality and private property ownership that were present in urban design and planning from the start Lewinnek argues that white Americans' attachment to property and community were not simply reactions to post 1945 Civil Rights Movement and federally enforced integration policies Rather Chicago's mostly immigrant working class bought homes seeking an elusive respectability and class mobility and trying to protect their property values against what they perceived as African American threats which eventually flared in violent racial conflict The Working Man's Reward examines the roots of America's suburbanization in the late nineteenth and early twentieth centuries showing how Chicagoans helped form

architecture as a discipline Useful chapter summaries and bibliographies **The Urban Origins of Suburban Autonomy**

Richardson Dilworth,2005-02-28 Using the urbanized area that spreads across northern New Jersey and around New York City as a case study this book presents a convincing explanation of metropolitan fragmentation the process by which suburban communities remain as is or break off and form separate political entities The process has important and deleterious consequences for a range of urban issues including the weakening of public finance and school integration The explanation centers on the independent effect of urban infrastructure specifically sewers roads waterworks gas and electricity networks The book argues that the development of such infrastructure in the late nineteenth century not only permitted cities to expand by annexing adjacent municipalities but also further enhanced the ability of these suburban entities to remain or break away and form independent municipalities The process was crucial in creating a proliferation of municipalities within metropolitan regions The book thus shows that the roots of the urban crisis can be found in the interplay between technology politics and public works in the American city *The Gilded Age* Charles William

Calhoun,2007 The United States that entered the twentieth century was vastly different from the nation that emerged from the Civil War Industrialization mass immigration the growing presence of women in the work force and the rapid advance of the cities had transformed American society Broad in scope *The Gilded Age* brings together sixteen original essays that offer lively syntheses of modern scholarship while making their own interpretive arguments These engaging pieces allow students to consider the various societal cultural and political factors that make studying the Gilded Age crucial to our understanding of America today Charles W Calhoun connects all of these essays with a comprehensive introduction that places each article in an understandable historical context For the second edition of this successful book each essay was revised and three new pieces have been added that explore technology consumerism intellectual life and race in late nineteenth century America

Building The Dream Gwendolyn Wright,2012-05-09 For Gwendolyn Wright the houses of America are the diaries of the American people They create a fascinating chronicle of the way we have lived and a reflection of every political economic or social issue we have been concerned with Why did plantation owners build uniform cabins for their slaves Why were all the walls in nineteenth century tenements painted white Why did the parlor suddenly disappear from middle class houses at the turn of the century How did the federal highway system change the way millions of Americans raised their families Building the Dream introduces the parade of people policies and ideologies that have shaped the course of our daily lives by shaping the rooms we have grown up in In the row houses of colonial Philadelphia the luxury apartments of New York City the prefab

houses of Levittown and the public housing towers of Chicago Wright discovers revealing clues to our past and a new way of looking at such contemporary issues as integration sustainable energy the needs of the elderly and how we define family

Promoting Sustainable Living Justyna Karakiewicz,Audrey Yue,Angela Paladino,2015-05-01 Current images of sustainability are often designed to instil fear and force change not because we believe in it but because we fear the consequences of inaction Moving away from negative portrayals of sustainability this book identifies the factors that motivate people to aspire towards sustainable living It introduces the notion of sustainability as an object of desire that will allow people not to be scared of the future but rather to dream about it and look forward to a better quality of life Tracing the history of major changes in our society that have dramatically altered our perceptions beliefs and attitudes about sustainability the book analyses the role of communications in persuading people of the benefits of sustainable living It describes our current desires and dreams and explains why we need to change Finally the book suggests what could be done to not only make sustainability an object of desire but also introduce hopes and dreams for a better future into our everyday lives This inspiring and interdisciplinary book provides innovative insights for researchers students and professionals in a range of disciplines in particular environment and sustainability sustainable marketing and advertising and psychology

The Negro in Chicago Chicago Commission on Race Relations,1922 **Planning the Capitalist City** Richard E. Foglesong,2014-07-14 Starting with the colonial period but focusing especially on the Progressive era Richard Foglesong offers both a narrative account and a theoretical interpretation of urban planning in the United States Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Mine Towns** Alison K. Hoagland,2010-04-20 During the nineteenth century the Keweenaw Peninsula of Northern Michigan was the site of America s first mineral land rush as companies hastened to profit from the region s vast copper deposits In order to lure workers to such a remote location and work long hours in dangerous conditions companies offered not just competitive wages but also helped provide the very infrastructure of town life in the form of affordable housing schools health care facilities and churches The first working class history of domestic life in Copper Country company towns during the boom years of 1890 to 1918 Alison K Hoagland sMine Townsinvestigates how the architecture of a company town revealed the paternal relationship that existed between company managers and workers a relationship that both parties turned to their own advantage The story of Joseph and Antonia Putrich immigrants from Croatia punctuates and illustrates the realities of life in a booming company town While company managers provided housing as a way to develop and control a stable workforce workers often rejected this domestic ideal and used homes as an

economic resource taking in boarders to help generate further income Focusing on how the exchange between company managers and a largely immigrant workforce took the form of negotiation rather than a top down system Hoagland examines surviving buildings and uses Copper Country s built environment to map this remarkable connection between a company and its workers at the height of Michigan s largest land rush
