Museums in Arabia Karen Exell,Sarina Wakefield,2016-05-12 Museum activity has in recent years undergone major and rapid development in the Arabian Peninsula with the regeneration of existing museums as well as the establishment of new ones Alongside such rapid expansion questions are inevitably raised as to the new challenges museums face in this region and whether the museum as a central focus of heritage preservation also runs the risk of overshadowing local forms of heritage performance and preservation With contributions from leading academics from a range of disciplines and heritage practitioners with first hand experience of working in the region this volume addresses the issues and challenges facing museums in Kuwait Saudi Arabia Qatar Yemen and the UAE It focuses on the themes of politics public engagement and the possibility of a new museum paradigm which might appropriately reflect the interests and culture of the region The interdisciplinary approaches analyse museum development from both an inside and outside perspective suggesting that museums do not follow a uniform trajectory across the region but are embedded within each states socio cultural context individual government agendas and political realities Including case study analysis which brings the more marginal nations into the debates as well as new empirical data and critical evaluation of the role of the museum in the Arabian Peninsula societies this book adds fresh perspectives to the study of Gulf heritage and museology It will appeal to regional and international practitioners and academics across the disciplines of museum studies cultural studies and anthropology as well as to anyone with an interest in the Gulf and Middle East *The Statesman's Yearbook 2025* Palgrave Macmillan,2025-01-10 Now in its 161st edition *The Statesman's Yearbook* continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions *Bibliography of Art and Architecture in the Islamic World (2 Vol. Set)* Susan Sinclair,C. pre World War I to the post World War II periods With a primary focus on collections of East Asian South Asian and West Asian art in Vienna Prague Berlin Warsaw Krak w Budapest and Ljubljana it outlines the transregional connections and networks that gradually developed Collecting Asian Art locates Asian art across the twentieth century in Central Europe via discourse and ideology and discusses key collections and the way individual collectors built their networks It thus explores transregional connections that developed through collecting activities and strategies in the prewar interwar and postwar eras Contributors also examine the personal connections between a group of Indologists from postwar Prague and modernist Indian artists from the early 1950s to the 1980s and also discuss the systematic archiving of East Asian art collections in Slovenia A concluding conversation looks at colonisation and decolonisation from a broader perspective by approaching it through recent art historical discussions on the global dimensions of modernism By defining the region through its external relationships and its entanglements with regions across Asia rather than as a self contained unit the contributions in this volume outline how these transregional connections and networks evolved and changed over time thus highlighting their singularity in comparison to developments in Western Europe Based on recent research Collecting Asian Art reveals neglected sources while reinterpreting well known ones The Arts, Education, and Social Change Mary Clare Powell, Vivien Marcow-Speiser, 2005 Authors show that teaching of art stimulates social changes among the participants of the communities in the Far East and Africa schools and community arts organizations Attention is also given to how art can support the skills confidence and empowerment of the participants Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond Tombul, Işıl, Sarı, Gülşah, 2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period In this period orientalism is a Western discourse that dominated and shaped the view of the East There is otherization in the way the West has historically looked at the East and within the information presented about it These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media Cinema television news newspaper magazine internet social media photography literature and more are transforming the way the East is presented and viewed Under the headings of post orientalism neo orientalism or self orientalism these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender race religion and culture that make up orientalist theory The chapters focus on how orientalism is presented in the media cinema TV photography and more This book is ideal for communications theorists media analysts practitioners researchers academicians and students working in fields that include mass media communications film studies ethnic studies history sociology and cultural studies New York Magazine , 1981-06-15 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself
