Saving The Mediterranean The Politics Of International Environmental Cooperation:

Saving the Mediterranean Peter M. Haas, 1990 Examines the Mediterranean Action Plan from 1972 to 1987 as a successful international effort to coordinate the marine pollution control practices of the Mediterranean littoral countries through regional treaties coordinated research and monitoring integrated policies and administrative and budgetary support *Saving the Mediterranean* Peter M. Haas, 1990 This is an examination of the Med Plan a largely successful and acclaimed international effort to coordinate the marine pollution control practices of the Mediterranean countries through regional treaties research and monitoring integrated policies and administrative and budgetary support The study concludes that the Plan proves that international cooperation and convergent state policies are possible and that the Plan may signal the emergence of an entirely new international political order for the environment

The Politics of International Environmental Management A. Underdal, 2012-12-06 Many of the major environmental challenges facing governments and societies today are collective problems calling for joint solutions However even when effective solutions can be found only through joint efforts international cooperation is often hard to establish and maintain This makes it all the more important to understand the conditions for success and the causes of failure This book examines some of the political mechanisms at work in the formation and operation of international environmental regimes What are the major factors that shape the national positions that governments bring to the negotiating table How do the international institutions and negotiation processes through which these preferences and positions are adjusted and aggregated affect outcomes What are the main mechanisms determining whether or not international environmental agreements are successfully implemented at the domestic level The Politics of International Environmental Management is published in cooperation with the European Science Foundation

Science and Politics in International Environmental Regimes Steinar Andresen, 2000 French society in revolution aims to retrieve the social history of the French Revolution from unjustified neglect This study examines both the structural and cultural elements behind the breakdown of the eighteenth century monarchic state and its crisis Routledge Handbook of Global Environmental Politics Paul G. Harris, 2013-10-15 This handbook provides a comprehensive and authoritative survey of Global Environmental Politics It brings together leading international academic experts and features 40 chapters that Describe the history of global environmental politics as a discipline and explain the various theories and perspectives used by scholars and students to understand it Examine the key actors and institutions in global environmental politics explaining the role of states international organizations regimes international law foreign policy institutions domestic politics corporations and transnational actors Address the ideas and themes shaping the practice and study of global environmental politics including sustainability consumption expertise uncertainty security diplomacy North South relations globalisation justice ethics participation and citizenship Assess the key issues and policies within global environmental politics including energy climate change ozone depletion air pollution acid rain sustainable transport persistent organic pollutants hazardous wastes

water rivers wetlands oceans fisheries marine mammals biodiversity migratory species natural heritage forests desertification food and agriculture With an in depth new preface by the Editor this edition of the handbook is an invaluable resource for students scholars researchers and practitioners of environmental politics environmental studies environmental science geography international relations and political science Theories of International Regimes Andreas Hasenclever, Peter Mayer, Volker Rittberger, 1997-10-02 International regimes have been a major focus of research in international relations for over a decade Three schools of thought have shaped the discussion realism which treats power relations as its key variable neoliberalism which bases its analysis on constellations of interests and cognitivism which emphasizes knowledge dynamics communication and identities Each school articulates distinct views on the origins robustness and consequences of international regimes This book examines each of these contributions to the debate taking stock of and seeking to advance one of the most dynamic research agendas in contemporary international relations While the differences between realist neoliberal and cognitivist arguments about regimes are acknowledged and explored the authors argue that there is substantial scope for progress toward an inter paradigmatic synthesis **Science and Politics of Foreign Aid** B. Hassler, 2011-06-27 Contemporary international aid consists of a wide range of various support programs where the end result in many cases not only reflects the needs of the recipient country but also the interests of the donor country In Science and Politics of Foreign Aid Swedish Environmental Support to the Baltic States it is shown that this particular support has been directed primarily towards areas of joint concern such as air pollution and effluents to the Baltic Sea Environmental problems with primarily local effects have to a large extent been neglected in the Swedish support program The requirement on the Baltic recipient countries to finance a specific fraction of each joint program with local resources has furthermore drained the local national environmental budgets from resources making it very difficult for these countries to mitigate various local environmental hazards by themselves In contrast to many previous foreign aid studies where various donor country biases often are suggested but not empirically validated this book gives an in depth view of how a particular support program is influenced by specific and self interested considerations Air Pollution Governance in East Asia Kuei-Tien Chou, Koichi Hasegawa, Dowan Ku, Shu-Fen Kao, 2022-04-19 Focusing on Taiwan South Korea Japan and Mainland China the contributors to this book analyze various cases of air pollution within East Asia Air pollution in East Asia is a major health risk which also has damaging impacts on the environment leading to impacts on society economic growth and welfare While existing laws and policies have made progress in alleviating air pollution in each country in the region the protection of favorable environments and the resolution of transboundary air pollution problems have become major targets of regional cooperation Combining perspectives from social sciences and science technology and society studies the contributors to this book examine both the technical and socioeconomic political aspects of these challenges through a range of case studies from around the region The book is a valuable read for researchers and policymakers looking at air pollution

and transboundary governance challenges within and beyond East Asia *Global Warming and Global Politics* Matthew Paterson, 2013-02-01 Examines the major theories within international relations and how these can help us understand the emergence of global warming as a political issue Managers of Global Change Frank Biermann, Bernd Siebenhüner, 2009 An examination of the role and relevance of international bureaucracies in global environmental governance *Handbook of International Relations* Walter Carlsnaes, Thomas Risse, Beth A Simmons, 2012-09-18 The original Handbook of International Relations was the first authoritative and comprehensive survey of the field of international relations In this eagerly awaited new edition the Editors have once again drawn together a team of the world's leading scholars of international relations to provide a state of the art review and indispensable guide to the field ensuring its position as the pre eminent volume of its kind The Second Edition has been expanded to 33 chapters and fully revised with new chapters on the following contemporary topics Normative Theory in IR Critical Theories and Poststructuralism Efforts at Theoretical Synthesis in IR Possibilities and Limits International Law and International Relations Transnational Diffusion Norms Ideas and Policies Comparative Regionalism Nationalism and Ethnicity Geopolitics in the 21st Century Terrorism and International Relations Religion and International Politics International Migration A truly international undertaking this Handbook reviews the many historical philosophical analytical and normative roots to the discipline and covers the key contemporary topics of research and debate today The Handbook of International Relations remains an essential benchmark publication for all advanced undergraduates graduate students and academics in politics and international relations Contesting Global Environmental Knowledge, Norms and Governance M. J. Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international

environmental politics and global policy making Policy analysts should also find it useful *Palgrave Advances in International Environmental Politics* M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 Palgrave Advances in International Environmental Politics provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review

Routledge Handbook of Mediterranean Politics Richard Gillespie, Frédéric Volpi, 2017-08-14 The Mediterranean space defined by a major sea a large number of littoral countries and to some extent their hinterlands is at the same time an interface between Europe Africa and Asia This brings complex challenges in terms of achieving peace and stability Recently it has received intense international attention through the internal destructiveness and spill over from conflicts primarily those waged in Libya Syria and more remotely Iraq This Handbook provides an overview of the political processes that shape the Mediterranean region in the contemporary context It explores the issues of crucial importance to Mediterranean dynamics through a series of analytical sections that guide the reader towards a comprehensive understanding of the main regional interactions and trends The Handbook explores the complex historical formation of the contemporary Mediterranean geopolitical perspectives issues around peace and conflict the political economy of the region the role of non state actors and social movements societal and cultural trends The wide range of contributions from many of the leading academic experts on the region offers not only insights into the debates and processes that structure each theme but also key pointers for a more general understanding of how distinct political economic social and cultural dynamics interact across the region It will therefore be a key resource for policy makers and students and scholars of Mediterranean politics and international relations

Ecological Relations Susan Board, 2003-08-29 International relations IR traditionally theorises the social relationships between different peoples In so doing it ignores the ecological bases to life the ground upon which we walk the all encompassing bind of nature In the current climate of environmental degradation international relations as a theory must in turn be altered By broadening the term relations to include this ecological framework international relations can be approached from a changed perspective In this book Susan Board uses a Foucauldian model of power to expand the boundaries of international relations She argues that relations can include other people or animals and are not exclusively between states Such a perspective acts to denaturalise the marginalization of women animals and indigenous peoples and hence expand the constrained discipline of IR By rethinking international relations to put ecological foundations first we are pushed to think and act with consideration of the long term sustainability of the global environment an ecological focus reminds us of our interdependence with our environment and all our neighbours The book raises conceptual and methodological issues that go directly to the heart of

current critical engagements within the discipline of IR As such it will be of great interest to students and researchers in IR environmental politics and political theory **Many Rivers to Cross** Joris Verwijmeren, Marcus Antonius Wiering, 2007 River basin management is a key concept in contemporary water policy Since the management of rivers is best designed and implemented at the scale of the river basin it seems obvious that we should not confine ourselves to administrative or geographical borders In other words river basin management implies crossing borders Experience with river policies shows that this is easier said than done though This book reveals how cross border co operation in river management looks today It first analyses the literature in this field of policy and research and then goes on to describe five cases of cross border initiatives in quite different corners of Europe By using well developed indicators and an elaborate analytical framework it deals systematically with opportunities for and barriers to cross border co operation on European rivers Including chapters about the following rivers Rhine Verwijmeren IJssel Feld Locker Gr tjen Vecht Lulofs Coenen Evros Bug **Environmental NGOs in World Politics** Matthias Finger, Thomas Princen, 2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental organisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Throught the use of case studies the authors reveal the richness and diversity of NGO activity and the difficulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental politics Environmental NOGs in World Politics will be of great interest to upper level student sand scholars of both environmental politics and international relations It will also appeal to environmental policy professionals The Environment and International Relations Kate O'Neill, 2009-01-22 This exciting textbook introduces students to the ways in which the theories and tools of International Relations can be used to analyse and address global environmental problems Kate O Neill develops an historical and analytical framework for understanding global environmental issues and identifies the main actors and their roles allowing students to grasp the core theories and facts about global environmental governance She examines how governments international bodies scientists activists and corporations address global environmental problems including climate change biodiversity loss ozone depletion and trade in hazardous wastes The book represents a new and innovative theoretical approach to this area as well as integrating insights from different disciplines thereby encouraging students to engage with the issues to equip themselves with the knowledge they need and to apply their own critical insights This will be invaluable for students of environmental issues both from political science and environmental studies perspectives **Advances in International Environmental Politics** M. Betsill, K. Hochstetler, D. Stevis, 2014-07-16

This book provides authoritative and up to date research for anyone interested in the study of international environmental politics It demonstrates how the field of international environmental politics has evolved and identifies key questions topics and approaches to guide future research **The Environment and International Relations** Mark Imber, John Vogler, 2005-08-12 Environmental issues and questions of global change are now firmly established on the international political agenda This book provides a wide ranging survey of the current treatment of environmental issues in international relations This book begins by looking at the relevance of the different theoretical approaches current in international relations to the study of the environment It analyzes a wide range of approaches from the debate between neo realism and liberal institutionalism to the significant connections between gender and global environmental change The book goes on to consider a range of key international processes discussing the monitoring and implementation of environmental agreements the place of ideology in negotiations and the role of international organisations
