Language attitudes and ideologies are of key importance in assessing the chances of success of revitalisation efforts for endangered languages. However few book length studies relate attitudes to language policies or address the changing attitudes of non speakers and the motivations of members of language movements. Through a combination of ethnographic research and quantitative surveys this book presents an in depth study of revitalisation efforts for indigenous languages in three small islands round the British Isles. The author identifies and confronts key issues commonly faced by practitioners and researchers working in small language communities with little institutional support. This book explores the complex relationship of ideologies identity and language related beliefs and practices and examines the implications of these factors for language revitalisation measures. Essential reading for researchers interested in language endangerment and revitalisation sociolinguistics linguistic anthropology and language policy and planning as well as language planners and campaigners Endangered Languages Sarah G. Most of the 7 000 languages spoken in the world today will vanish before the end of this century taking with them cultural traditions from all over the world as well as linguistic structures that would have improved our understanding of the universality and variability of human language. This book is an accessible introduction to the topic of language endangerment answering questions such as what is it? How and why does it happen? Why should we care? The book outlines the various causes of language endangerment explaining what makes a language safe and highlighting the danger signs that threaten a minority language. Readers will learn about the consequences of losing a language both for its former speech community and for our understanding of human language. Illustrated with case studies it describes the various methods of documenting endangered languages and shows how they can be revitalised Language in the 21st Century Humphrey Tonkin, Timothy G. Reagan, 2003-01-01

What is the future of languages in an increasingly globalized world? Are we moving toward the use of a single language for global communication or are there ways of managing language diversity at the international level? Can we or should we maintain a balance between the global need to communicate and the maintenance of local and regional identities and cultures? What is the role of education of language rights of language equality in this volatile global linguistic mix? A group of leading scholars in sociolinguistics and language policy examines trends in language use across the world to find answers to these questions and to make predictions about likely outcomes. Highlighted in the discussion are among other issues the rapidly changing role of English the equally rapid decline and death of small languages the future of the major European languages the international use of constructed languages like Esperanto and not least the question of what role applied scholarship can and should play in mapping and influencing the future *English Teaching Forum* , 2000 **Ladino on the Internet** Carlos Yebra
