*Annapolis Pasts* Paul A. Shackel, Paul R. Mullins, Mark S. Warner, 1998 The Archaeology in Annapolis project has been one of the most important undertaken by historical archaeologists Notable for its emphasis on public education and its use of citywide research it has carried out an innovative analysis of material culture to show how a wide range of social and economic classes residing in Maryland s capital responded over time to a changing world Annapolis Pasts offers a close look at the trend setting project Drawing on more than a decade of study it provides a cross section of the substantive and theoretical issues that Archaeology in Annapolis has explored The volume gathers the work of some of the most innovative authorities in historical archaeology along with that of younger scholars who participated in the project all of whom demonstrate the cutting edge approaches that have won it wide respect And despite differences in theoretical orientations all the contributors have used Annapolis s archaeological data to interpret the emergence of capitalism as both a dynamic market force and an equally dynamic body of social rules In studies of sites ranging from eighteenth century formal gardens to nineteenth and twentieth century African American neighborhoods the book explores the development of modern society as reflected in such examples of material culture as food printer s type tableware and landscape architecture showing how these features of everyday life were used to reproduce modify and resist capitalist society over three centuries It also investigates subordinated groups in Annapolis African Americans women the working class to provide insight into racism class structure and consumer society in the early years of the industrial revolution Annapolis Pasts clearly demonstrates that traditional objects of study like Georgian mansions and colonial crafts cannot be understood without considering their complete social and economic milieu It presents a fascinating mosaic of human activity that shows how archaeologists can interpret the different social temporal and theoretical pieces of a city s history and it provides anthropologists economists and historians with an example of the

multifaceted effects of capitalism and industrialization in one corner of America      **The Archaeology of Gender** Diana diZerga Wall, 2013-06-29 Historical archaeologists often become so involved in their potsherd patterns they seldom have time or energy left to address the broader processes responsible for the material culture patterns they recognize. Some of us have urged our colleagues to use the historical record as a springboard from which to launch hypotheses with which to better understand the behavioral and cultural processes responsible for the archaeological record. Too often this urging has resulted in reports designed like a sandwich having a slice of historical background followed by a totally different archaeological record and closed with a weevil-ridden slice of interpretation of questionable nutritive value for understanding the past. The reader is often left to wonder what the archaeological meat had to do with either slice of bread since the connection between the documented history and the material culture is left to the reader's imagination and the connection between the interpretation and the other disparate parts is tenuous at best. The plethora of stale archaeological sandwiches in the literature has resulted at the methodological level from a too narrow focus on the specific history and archaeology of a site and the individuals involved on it rather than a focus on the explanation of broader processes of culture to which the actors and events at the site-specific level responded.
