An Adventure in Statistics Andy Field, 2016-05-18. Shortlisted for the British Psychological Society Book Award 2017. Shortlisted for the British Book Design and Production Awards 2016. Shortlisted for the Association of Learned Professional Society Publishers Award for Innovation in Publishing 2016. *An Adventure in Statistics: The Reality Enigma* by best-selling author and award-winning teacher Andy Field offers a better way to learn statistics. It combines rock-solid statistics coverage with compelling visual storytelling to address the conceptual difficulties that students learning statistics for the first time often encounter in introductory courses, guiding students away from rote memorization and toward critical thinking and problem-solving. Field masterfully weaves in a unique action-packed story starring Zach, a character who thinks like a student processing information and the challenges of understanding it in the same way a statistics novice would. Illustrated with stunning graphic novel style art and featuring Socratic dialogue, the story captivates readers as it introduces them to concepts, eliminating potential statistics anxiety. The book assumes no previous statistics knowledge nor does it require the use of data analysis software. It covers the material you would expect for an introductory level statistics course that Field's other books, *Discovering Statistics Using IBM SPSS Statistics* and *Discovering Statistics Using R*, only touch on but with a contemporary twist, laying down strong foundations for understanding classical and Bayesian approaches to data analysis. In doing so, it provides an unrivalled launch pad to further study, research, and inquisitiveness about the real world, equipping students with the skills to succeed in their chosen degree and which they can go on to apply in the workplace.

The Story and Main Characters *The Reality Revolution*. In the City of Elpis in the year 2100, there has been a reality revolution. Prior to the revolution, Elpis citizens were unable to see their flaws and limitations, believing themselves talented and special. This led to a self-absorbed society in which hard work and the collective good were undervalued and eroded. To combat this, Professor Milton Grey invented the reality prism, a hat that allowed its wearers to see themselves as they really were, flaws and all. Faced with the truth, Elpis citizens revolted and destroyed and banned all reality prisms.
