Sarcevic, Susan [ar?evi?, 1997-05-07 One of the first attempts to present a comprehensive study of legal translation this book is an interdisciplinary study in law and translation theory It is not bound to any specific languages or legal systems although emphasis is placed on translation between common law and civil law jurisdictions The main focus is on the translation of texts which are authoritative sources of the law examples are cited primarily from statutes codes and constitutions Canada Switzerland and Belgium as well as instruments of the European Union and international treaties and conventions Dealing with theoretical as well as practical aspects of the subject matter the author analyses legal translation as an act of communication in the mechanism of the law thus making it necessary to redefine the goal of legal translation This book is intended for both lawyers and linguists translation theorists legal translators and drafters legal lexicographers as well as teachers and students of translation **Searching the Law, 3d Edition** Frank Bae, Edward Bander, Francis Doyle, Joel

Marton,1964 The bibliography lists over 2800 unilingual bilingual and polyglot dictionaries glossaries and encyclopedias in the physical sciences engineering and technology published during the past twelve years The majority of the titles cited have English as the source or target language or are dictionaries giving definitions in English The bibliographic entries are arranged in 49 subject classes within each subject the entries are listed alphabetically by language and within each language group by author Forty seven foreign languages are represented in the compilation Lists of abbreviations and reference sources and detailed author language and subject indexes complement the publication Author      *A Dictionary of Literary Terms and Literary Theory* J. A. Cuddon,2012-11-07 With new entries and sensitive edits this fifth edition places J A Cuddon s indispensable dictionary firmly in the 21st Century Written in a clear and highly readable style Comprehensive historical coverage extending from ancient times to the present day Broad intellectual and cultural range Expands on the previous edition to incorporate the most recent literary terminology New material is particularly focused in areas such as gender studies and queer theory post colonial theory post structuralism post modernism narrative theory and cultural studies Existing entries have been edited to ensure that topics receive balanced treatment

Elsevier's Dictionary of Geography Vladimir Kotlyakov,Anna Komarova,2006-12-20 Geography is a system of highly developed sciences about the environment Geographical science embracing the study of the Earth s physical phenomena people and their economic activities has always been in need of an extensive terminology Geographical terms are related to the terms of natural sciences physics chemistry biology geology etc and humanities history economics sociology etc since geography is based on these fundamental subjects Geography includes a number of disciplines and subdivisions which appeared along with the development of the science In spite of being very different geographical disciplines have some common tools of investigation which is maps comparative method of exploration remote sensing geoinformation systems Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages However they are not always well correlated Nowadays geographical terminology requires unification and international correlation more than ever before Hence the idea of compiling a multilingual polydisciplinary dictionary The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered Each entry consists of the term in English and its equivalents in Russian French German Spanish Short definitions

of terms are given in English and in Russian The terms are supplied with the necessary grammar labels such as gender of nouns plural number etc The Dictionary combines two functions that of a defining dictionary and that of a bilingual dictionary These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations differing in the shades of meanings thus giving him the possibility to choose the appropriate word But in our Dictionary we intentionally decided to combine the two functions defining and multilingual because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages Having this into consideration we deliberately mixed two types of dictionaries in one Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian French German Spanish      **Bookseller, Newsdealer and Stationer** ,1897      **Bookseller, Devoted to the Book and News Trade** ,1904
