Natural Man The Life Of William Beebe:

Natural Man Robert Henry Welker, 1975

The Remarkable Life of William Beebe Carol Grant Gould, 2012-09-26

When William Beebe needed to know what was going on in the depths of the ocean he had himself lowered a half mile down in a four foot steel sphere to see five times deeper than anyone had ever gone in the 1930s When he wanted to trace the evolution of pheasants in 1910 he trekked on foot through the mountains and jungles of the Far East to locate every species To decipher the complex ecology of the tropics he studied the interactions of every creature and plant in a small area from the top down setting the emerging field of tropical ecology into dynamic motion William Beebe s curiosity about the natural world was insatiable and he did nothing by halves As the first biographer to see the letters and private journals Beebe kept from 1887 until his death in 1962 science writer Carol Grant Gould brings the life and times of this groundbreaking scientist and explorer compellingly to light From the Galapagos Islands to the jungles of British Guiana from the Bronx Zoo to the deep seas Beebe s biography is a riveting adventure A best selling author in his own time Beebe was a fearless explorer and thoughtful scientist who put his life on the line in pursuit of knowledge The unique glimpses he provided into the complex web of interactions that keeps the earth alive and breathing have inspired generations of conservationists and ecologists This exciting biography of a great naturalist brings William Beebe at last to the recognition he deserves

Nature's Ghosts Mark V. Barrow, 2011-04-15 The rapid growth of the American environmental movement in

recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature s Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson s day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect

them Nature's Ghosts offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead

The Mysterious Science of the Sea, 1775-1943 Natascha Adamowsky, 2015-10-06 The depths of the oceans are the last example of terra incognita on earth Adamowsky presents a study of the sea arguing that contrary to popular belief post Enlightenment discourse on the sea was still subject to mystery and wonder and not wholly rationalized by science

The Museum in America Edward P. Alexander, 2000-01-01 The Museum in America captures the life stories of thirteen visionary museum leaders who helped transform the 19th century's collection of curios into today's institution of public service and education In the lively style of Museum Masters Alexander recounts the stories of pioneers in American history science art and general museums For anyone interested in the history of the museum this volume is the place to start

The Most Defiant Devil Gregory J. Dehler, 2013-08-12 The late nineteenth and early twentieth century were a brutal time for American wildlife with many species pushed to the brink of extinction Some are endangered to this day And yet these decades also saw the dawn of the conservationist movement Into this contradictory era came William Temple Hornaday a larger than life dynamo who almost uncannily embodies these conflicting threads in our history In The Most Defiant Devil a compelling new biography of this complex figure Gregory Dehler explores the life of Hornaday the hunter museum builder zoologist author conservationist and anti Bolshevik crusader A deeply religious man he was nonetheless anything but peaceful and was racist even by his era's standards going so far as to display an Mbuti pygmy as a living specimen in a zoo A passionate hunter Hornaday killed thousands of animals including some of the last wild buffalo in America but he was far ahead of his time in his influential views on the protection of wildlife Hornaday designed and built the New York Zoological Park which became the Bronx Zoo and was chief taxidermist for what would later become the Smithsonian Museum of Natural History In this single fascinating individual we can discern some of the Progressive Era's most destructive forces and some of its most enlightened visions
