Eileen Gray and the Design of Sapphic Modernity Jasmine Rault, 2017-07-05 The first book length feminist analysis of Eileen Gray's work *Eileen Gray and the Design of Sapphic Modernity Staying In* argues that Gray's unusual architecture and design as well as its history of abuse and neglect emerged from her involvement with cultures of sapphic modernism. Bringing together a range of theoretical and historical sources from architecture and design communication and media to gender and sexuality studies, Jasmine Rault shows that Gray shared with many of her female contemporaries a commitment to designing spaces for sexually dissident modernity. This volume examines Gray's early lacquer work and Romaine Brooks' earliest nude paintings, Gray's first built house E 1027 in relation to Radclyffe Hall and her novel *The Well of Loneliness* and Gray's private house Tempe nbsp Pailla with Djuna Barnes' *Nightwood*. While both female sexual dissidence and modernist architecture were reduced to rigid identities through mass media, women such as Gray, Brooks, Hall and Barnes resisted the clarity of such identities with opaque, non-communicative aesthetics. Rault demonstrates that by defying the modern imperative to publicity, clarity and identity, Gray helped design a sapphic modernity that cultivated the dynamism of uncertain bodies and unfixed pleasures which depended on staying in rather than coming out. Piet Mondrian, 1995 Internationally recognized as a pioneer of abstract art, the founder of Neo-Plasticism and the ideological father of the De Stijl movement, Piet Mondrian (1872-1944) created both paintings and writings that embodied the spirit of modernism. **Cross-Cultural Design** Pei-Luen Patrick Rau, 2016-07-04 This book constitutes the proceedings of the 8th International Conference on Cross Cultural Design (CCD 2016) held as part of the 18th International Conference on Human Computer Interaction (HCI 2016) held in Toronto, ON, Canada, in July 2016 and received a total of 4354 submissions of which 1287 papers and 186 poster papers were accepted for publication after a careful reviewing process. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of Human Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 81 papers presented in the CCD 2016 proceedings are organized in topical sections as follows: culture and user experience, cross-cultural product and service design, cultural ergonomics, culture and mobile interaction, culture in smart environments, cross-cultural design for health, well-being and inclusion, and culture for e-commerce and business. [The Palgrave Handbook of Experimental Cinema](#) Kim Knowles, Jonathan Walley, 2024-09-04 This book is a collection of newly commissioned essays by established and emerging scholars that maps out the current landscape of experimental cinema studies and sets agendas for future work in the field. Introducing new critical methodologies and calling overdue attention to neglected artists, regions and topics, the contributions to this volume reassess and reassert experimental cinema as a site of formal exploration and interrogation as well as resistance to institutional, political and social norms. This collection articulates what it means for experimental cinema to be these things in the contemporary moment.

staking out new directions in thinking about the subject not only as a growing sub field of cinema studies but as an artistic and scholarly tradition in dialogue with art history visual culture philosophy and the sciences The contributions reflect a diversity of voices and perspectives weaving together theoretical poetic and personal modes of writing and traversing questions of form emotion materiality nationality postcoloniality the body and ecology *Transpecies Design* Adrian Parr Zaretsky, Michael Zaretsky, 2024-07-31 In May 2019 the United Nations released the Global Assessment Report on Biodiversity and Ecosystem Services which warned that human activities will drive nearly one million species to extinction in a few decades The primary reasons for this are habitat loss and biodiversity demise caused by changing climate pollution introducing nonindigenous species clearing land over population and consumption Given this situation humans must change course as both human wellbeing and the wellbeing of other than human species are imbricated in one another One way humanity can accomplish the needed transformation is to move beyond an anthropocentric view of life by embracing a transpecies approach that is premised upon interconnected flourishing Transpecies design as outlined in this book offers a new approach to regenerating the natural environment while honoring biodiversity Rather than presenting the human experience as the goal of design transpecies design takes the inextricable linkages connecting living things as both its starting point and end goal As such it moves beyond human experience serving as the fundamental ingredient for making better design processes and decisions This book is essential reading for artists designers and architects as well as students of architecture landscape architecture interior architecture art product design urban design planning environmental philosophy and cultural studies *Paths to the Absolute* John Golding, 2023-10-17 A groundbreaking account of the meaning of abstract painting From Mondrian's bold geometric forms to Kandinsky's use of symbols to Pollock's dripped paintings the richly diverse movement of abstract painting challenges anyone trying to make sense of either individual works or the phenomenon as a whole Applying his insights as an art historian and a painter John Golding offers a unique approach to understanding the evolution of abstractionism by looking at the personal artistic development of seven of its greatest practitioners He re-creates the journey undertaken by each painter in his move from representational art to the abstract a journey that in most cases began with cubism but led variously to symbolism futurism surrealism theosophy anthropology Jungian analysis and beyond For each artist spiritual quest and artistic experimentation became inseparable And despite their different techniques and philosophies these artists shared one goal to break a path to a new ultimate pictorial truth The book first explores the works and concerns of three pioneering European abstract painters Mondrian Malevich Kandinsky and then those of their American successors Pollock Newman Rothko and Still Golding shows how each painter sought to see the world and communicate his vision in the purest or most expressive form possible For example Mondrian found his way into abstraction through a spiritual response to the landscape of his native Holland Malevich through his apprehension of the human body Kandinsky through a blend of religious mysticism and symbolism Line and color became the focus for many of their creative endeavors

In the 1940s and 50s the Americans raised the level of pictorial innovation beginning most notably with Pollock and his Jung inspired concept of action painting. Golding makes a powerful case that at its best and most profound abstract painting is heavily imbued with meaning and content. Through a blend of biography, art analysis and cultural history, *Paths to the Absolute* offers remarkable insights into how a sense of purpose is achieved in painting and how abstractionism engaged with the intellectual currents of its time. Utopias and Architecture Nathaniel Coleman, 2007-05-07. Utopian thought, though commonly characterized as projecting a future without a past, depends on golden models for re-invention of what is. Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers, Coleman offers the reader a unique perspective of idealism in architectural design. With unparalleled depth and focus of vision on the work of Le Corbusier, Louis I Kahn and Aldo van Eyck, this book persuasively challenges predominant assumptions in current architectural discourse, forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hypermodern stance and orthodox modernist architecture. **Artforum International**, 1995 **Arts & Humanities Citation Index**, 1995.
