Natural History Of New Mexican Mammals:

The Natural History of New Mexican Mammals James Smith Findley, 1987 **Mammals of New Mexico** Vernon Bailey, 1931 *Mammals of New Mexico* Olaus Johan Murie, Vernon Bailey, 1931 *Mammals of Mexico* Gerardo Ceballos, 2014-01-15 The most comprehensive reference on Mexico's diverse mammalian fauna. *Mammals of Mexico* is the first reference book in English on the more than 500 types of mammal species found in the diverse Mexican habitats which range from the Sonoran Desert to the Chiapas cloud forests. The authoritative species accounts are written by a Who's Who of experts compiled by famed mammalogist and conservationist Gerardo Ceballos. Ten years in the making, *Mammals of Mexico* covers everything from obscure rodents to whales, bats, primates, and wolves. It is thoroughly illustrated with color photographs and meticulous artistic renderings, as well as range maps for each species. Introductory chapters discuss biogeography, conservation, and evolution. The final section of the book illustrates the skulls, jaws, and tracks of Mexico's mammals. This unparalleled collection of scientific information, on and photographs of Mexican wildlife, belongs on the shelf of every mammalogist in public and academic libraries and in the hands of anyone curious about Mexico and its wildlife. **The Natural History of New Mexican Mammals** James S. Findley, *Vertebrate Paleontology in New Mexico* Spencer G. Lucas, Robert M. Sullivan, **Late Cretaceous and Cenozoic Mammals of North America** Michael O. Woodburne, 2004 This book places into modern context the information by which North American mammalian paleontologists recognize, divide, calibrate, and discuss intervals of mammalian evolution known as North American Land Mammal Ages. It incorporates new information on the systematic biology of the fossil record and utilizes the many recent advances in geochronologic methods and their results. The book describes the increasingly highly resolved stratigraphy into which all available temporally significant data and applications are integrated. Extensive temporal coverage includes the Late Cretaceous and Cenozoic, and geographical coverage includes information from Mexico, an integral part of the North American fauna past and present. *Fire Effects in Southwestern Forests*, 1996 **General Technical Report RM.**, 1996 **Wild Carnivores of New Mexico** Jean-Luc E. Cartron, Jennifer K. Frey, 2024-02-15 Winner of the 2024 New Mexico Arizona Book Award for Reference. In this first ever landmark study of New Mexico's wild carnivores, Jean-Luc E. Cartron and Jennifer K. Frey have assembled a team of leading southwestern biologists to explore the animals and the major issues that shape their continued presence in the state and region. The book includes discussions on habitat, evolving or altered ecosystems, and new discoveries about animal behavior and range, and it also provides details on the distribution, habitat associations, life history, population status, management, and conservation needs of individual carnivore species in New Mexico. Like Cartron's award-winning *Raptors of New Mexico*, *Wild Carnivores of New Mexico* shares the same emphasis on scientific rigor and thoroughness, high readability, and visual appeal. Each chapter is illustrated with numerous color photographs to help readers visualize unique morphological or life history traits, habitat, research techniques, and management and conservation issues.
