Mind, Brain and the Elusive Soul Mark Graves, 2016-04-22 Does science argue against the existence of the human soul Many scientists and scholars believe the whole is more than the sum of the parts This book uses information and systems theory to describe the more that does not reduce to the parts One sees this in the synapses or apparently empty gaps between the neurons in one's brain where informative relationships give rise to human mind culture and spirituality Drawing upon the disciplines of cognitive science computer science neuroscience general systems theory pragmatic philosophy and Christian theology Mark Graves reinterprets the traditional doctrine of the soul as form of the body to frame contemporary scientific study of the human soul *Contemporary Natural Philosophy and Philosophies - Part 1* Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different

disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind
