Geoenvironmental Hazards in Himalaya Bindhy Wasini Pandey,2002 **Sustainable Natural Resource Management in the Himalayan Region** Roshan Man Bajracharya,Bishal K. Sitaula,Smriti Gurung,Nani Raut,2021 The greater Himalayan region stretching from Afghanistan in the west to Myanmar in the east is home to about a quarter of a billion people who greatly depend on available natural resources for their survival and livelihoods The ever increasing population pressure and changing climate have grave implications for the sustenance of human health and habitation in the foreseeable future The region is confronted with numerous challenges related to forest degradation land productivity disaster risk water management biodiversity loss erratic climatic patterns as well as socio political capacity The limits of arable land have essentially been reached while the need for enhancing production to sustain human nutritive requirements and livelihoods continues to increase Hence the intensification of agriculture has become a necessity rather than a choice Yet producing greater numbers of crops and quantities of food fiber and other materials on the same parcel of land runs the risk of degrading the soil fertility productivity and overall quality Therefore means to achieve this without irreversibly damaging the soil and land resource base have become imperative To this end agro forestry agro silvi pastoral systems and the adoption of a variety of regenerative crops soil and water management and conservation practices offer the potential to deliver multiple benefits without sacrificing the very resource upon which the human population depends The need for ecologically sound and sustainable management of natural resources in the Himalayan region as well as the adaptation of local communities to the impacts of climate change and measures for its mitigation cannot be over emphasized This book presents findings on approaches to sustainable land management and the intensification of agriculture and animal husbandry related to soil organic matter management and carbon sequestration for multiple benefits and the agroforestry as a crop diversification strategy with livelihood and climate mitigation adaptation benefits along with other aspects of forest biodiversity and water resources management The book deals with technical socio economic policy and biodiversity issues related to the sustainable use and management of natural resources namely forests soil land water crops animal husbandry and diversity of flora fauna as well as disaster risk and vulnerability of communities in the Himalayan region There is a continuing need to study and research approaches for harmonizing human needs and lifestyles with natural ecosystems and processes so that both may co exist in a mutually beneficial manner **Climate Change Adaptation, Risk Management and Sustainable Practices in the Himalaya** Sanjeev Sharma,Jagdish Chandra Kuniyal,Pritam Chand,Pardeep Singh,2023-03-10 This volume analyzes

ecological and socio economic risks due to climate change in the Himalayan mountain ecosystems communities and proposes adaptation strategies and sustainability practices In order to better understand the potential actions required to improve natural resource conservation and the development of mountain people s livelihoods The authors discuss the current status of local knowledge system on various environmental aspects of conservation and sustainable use of mountain resources in the Himalaya The book addresses the institutional capacities gaps and priority areas of capacity building to strengthen policies and governance in regard to climate change landuse management biodiversity conservation and sustainable management in the Himalayan region The aim of this book is to enhance coordination building among policymakers planners mountain communities to foster collaboration between different stakeholders by understanding local perceptions of climate change as well as variability issues and establishing adaptation strategies to cope with these impacts The chapters incorporate theoretical and applied aspects and may serve as baseline information for the sustainability of mountain ecosystems through the contribution of multidisciplinary and interdisciplinary expertise from the Himalayan region The book will be useful for students teachers and researchers working in different areas pertaining to mountain ecosystems as well as policymakers and planners working on issues related to the sustainability of the mountain ecosystem

Wildlife in the Himalayan Foothills P. C. Tiwari, Bhagwati Joshi, 1997 **Natural Resource Management** B.W. Pandey (ed.

By), 2005-01-01 **Environmental Sustainability from the Himalayas to the Oceans** Shikui Dong, Jayanta

Bandyopadhyay, Sanjay Chaturvedi, 2017-01-23 The book is written in the backdrop of the environmental impacts of and future requirements from the natural environment for rapid economic growth that has characterized recent economic history of China and India especially over the past few decades The environmental impacts of such rapid economic changes have been more frequently than otherwise degrading in character Environmental impacts of economic activities create degraded natural ecosystems by over utilization of nature s provisioning ecosystem services from Himalaya to the Ocean as well by the use of the natural environment as sink for dumping of unmarketable products or unused inputs of economic activities Such processes affect wide range of ecosystem processes on which the natural environment including human population depend on Critical perspectives cast by various chapters in this book draw attention to the various ways in which space and power interact to produce diverse geographies of sustainability in a globalizing world They also address the questions such as who decides what kind of a spatial arrangement of political power is needed for sustaining the environment Who stands to gain or lose what when where and why from certain geographical areas being demarcated as ecologically unique fragile and vulnerable environments Whose needs and values are being catered to by a given ecosystem service What is the scope for critical inquiry into the ways in which the environment is imagined represented and resisted in both geopolitical struggles and everyday life The book provides insights to both academics from diverse disciplines and policy makers civil society actors interested in mutual exchange of knowledge between China and India Mountain Tourism and Ecological Impacts:

Himalayan Region and Beyond Biswas, Soumendra Nath, Kumar, Pradip, 2024-03-27 The Himalayas with their grandeur and cultural richness magnetize global travelers searching for an escape from the ordinary. However, behind this allure lies an ecological responsibility and sustainability imperative. Many involved with the tourism industry in mountainous regions have been confronting the stark realities of tourism's impact on these delicate ecosystems. There is an urgency to address the challenges posed by climate change while safeguarding the indigenous traditions that define the Himalayas. *Mountain Tourism and Ecological Impacts: Himalayan Region and Beyond* unravels the intricate connections between tourism development and its far-reaching implications. This comprehensive exploration delves deep into the heart of the Himalayan region and beyond, shedding light on the diverse dimensions of mountain tourism and its profound impact on local environments, communities, and cultural heritage. This book reveals the tapestry of tourism experiences found in the peaks and vistas of the Himalayas. It delves into the eco-tourist's delicate dance with fragile ecosystems, the coexistence of travelers and wildlife, the exhilaration of adventure tourism, and the spiritual pilgrimages that draw seekers from across the globe. This book comprehensively explores the pivotal role of preserving local cultures and underscores this as a key element of conserving the pristine natural habitats. This book is ideal for academics, researchers, tourism professionals, environmentalists, and conservationists, government and NGOs, and travel enthusiasts.

Impact of Climate Change on Water and Health Velma I. Grover, 2012-12-18 Since the hydrological cycle is so intricately linked to the climate system, any change in climate impacts the water cycle in terms of change in precipitation patterns, melting of snow and ice, increased evaporation, increased atmospheric water vapor, and changes in soil moisture and runoff. Consequently, climate change could result in floods in some areas and droughts in others, resulting in varying availability and the quality of water, which affects the quality of life, food security, and also health security. This book examines the impact of climate change on water as well as health.

Key Aspects of Himalayan Geology Sandipan Ghosh, 2025-03-27 This book serves as a ready reference book for anyone who is interested in the Himalayan geology and appraises the readers with the latest findings. The Himalayan syntaxes compose about one-third of the India-Asia collision zone and encompass a substantial part of the crustal deformation that occurs within the system. The Darjeeling-Sikkim Himalaya (DSH) marks the beginning of the Eastern Himalaya, which is the most active orogenic zone coupled with variable seismicity. It is located between Bhutan to the east and Nepal to the west. In the west, Sikkim shares Kanchenjunga, Earth's third highest mountain, with Nepal, while the ridge line forming Sikkim's eastern border flanks the Yadong-Gulu rift graben. The DSH, cradled by the river system of the Tista, is a large geodynamic laboratory of nature where orogenesis is still in its youth to early mature phases of evolution. Giant-scale endogenous turmoil thoroughly overhauled the terrain mostly within the confines of distinct belts or divisions, and spectacularly uplifted the terrain in superlative terms. Resting on the foundation of structure, tectonics, geomorphology, stratigraphy, and evolution, the wings of geology extend much further. Several books, mostly having regional approaches of different scales, have been written on the Himalayan geology with specified intentions.

Geological Aspects of the DSH is based on more than direct references and succinctly opens a gateway to variable aspects of mineral study active tectonics crustal deformation tectono stratigraphy seismicity sedimentary geology palaeontology landslides and tectonic geomorphology The book apprises the readers with the latest findings The book is addressed to university students for their academic needs and to those who are willing to work in Himalayan terrain The large number of topics covered in this book is hardly available in any other single book so far Anyone interested in the geology of the Himalaya might use the book as a quick reference Different Dimensions of Geology and Geomorphology are described in nine key chapters *Water Management in Himalayan Ecosystem* Kireet Kumar,1996 **Sustainable Management of**

Headwater Resources Libor Jansky,Martin J. Haigh,Haushila Prasad,2005 Headwaters are the source of freshwater resources the margins of drainage basins and the first and zero order basins that surround every catchment The challenge is to define appropriate self sustainable management strategies and structures for these lands which meet the needs of the headwater habitat including its human inhabitants and the needs of habitats downstream The contributors to this book strive to anticipate emerging and future problems to discover integrated solutions to the problems already caused by land degradation natural hazards and development processes and to help develop better land management environmental protection and landscape regeneration practices and policies They also address the many challenges that remain the concern for effective sharing of local experience in science and technology community participation the role of education effectiveness and limits of current technology the selection of appropriate policies and goals modes of effective management and the sustainability of current activities Sustainable Management of Headwater Resources provides an understanding of current and prior situations and provides scientific analyses of local and regional headwater issues in India and Africa The authors analyse the current situation through field experiments that provide reliable information on the status of headwater resources in these regions This book originates from the conference on Sustainable Management of Headwater Resources at the 5th International Conference on Headwaters in Nairobi Kenya Personal, Societal, and Ecological Values of Wilderness ,2000 **Issues in Ecological Research and Application: 2011 Edition** ,2012-01-09 Issues in Ecological Research and Application 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Ecological Research and Application The editors have built Issues in Ecological Research and Application 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Ecological Research and Application in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Ecological Research and Application 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>
