R. Sorley,2015-06-15 Excerpt from The Ethics of Naturalism A Criticism The chief purpose of this work is to arrive at an exact estimate of the ethical significance of the theory of evolution The form in which this theory has impressed itself upon contemporary thought is mainly due to certain researches in biology but its influence has not been restricted to the biological sciences It has shed new light on psychology and on the sciences of society In this way it has much to say concerning the development of morality This also is within the scope of evolution But at this point it is necessary to consider whether our interpretation of evolution may not have been too exclusively determined by observation of a limited group of facts We must ask whether the factors of biological evolution are adequate to the explanation of moral development A still more important question than this is raised in the application of evolution to ethics About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged

Critics of Enlightenment Rationalism Revisited Gene Callahan, Kenneth B. McIntyre, 2022-09-10 This book provides an overview of some of the most important critics of Enlightenment rationalism The subjects of the volume including among others Pascal Vico Schmitt Weber Anscombe Scruton and Tolkien do not share a philosophical tradition as much as a skeptical disposition toward the notion common among modern thinkers that there is only one standard of rationality or reasonableness and that that one standard is or ought to be taken from the presuppositions methods and logic of the natural sciences The essays on each thinker are intended not merely to offer a commentary on that thinker but also to place the person in the context of this larger stream of anti rationalist thought
