Quantum Theatre Paul Johnson, 2013-01-16 Quantum Theatre uses the science of quantum mechanics to construct a rigorous framework for examining performance practice and the theatrical event and live performance as a means of exploring the implications of quantum mechanics Key ideas from physics are used to develop an interdisciplinary approach to writing about the work of a number of British theatre practitioners in terms of identity observation and play What this type of analysis does is enable an examination of aspects of performance that can remain hidden and so cast new light on the performance event This is the first study of its kind that develops such a

Yeats on Theatre Christopher Morash, 2021-07-29 W B Yeats is recognised globally as one of the most significant poets of the past century And yet in his Nobel address he singled out his work in the theatre as his main accomplishment Yeats on Theatre restores Yeats not only a playwright but as a writer and thinker who over forty years produced a body of theory covering all aspects of theatre including the possibilities of performance space the role of the audience and the nature of tragedy When read as whole in conjunction with his plays letters and extensive manuscript materials Yeats's theatre writings emerge as a radical cohesive theatrical aesthetic at odds with and in advance of the theatre of his time Ultimately the Yeats who takes shape in Yeats on Theatre is an artist who thinks through theatre providing us with an urgently needed reassertion of the value of theatre as embodied thought

The Provocation of the Senses in Contemporary Theatre Stephen Di Benedetto, 2011-01-13 Di Benedetto considers theatrical practice through the lens of contemporary neuroscientific discoveries in this provoking study which lays the foundation for considering the physiological basis of the power of theatre practice to affect human behavior He presents a basic summary of the ways that the senses function in relation to cognitive science and physiology offering an overview of dominant trends of discussion on the realm of the senses in performance Also presented are examples of how those ideas are illustrated in recent theatrical presentations and how the different senses form the structure of a theatrical event Di Benedetto concludes by suggesting the possible implications these neuroscientific ideas have upon our understanding of theatrical composition audience response and the generation of meaning

beyond physics philosophy and psychology Chapter 1 introduces three foundational notions Newtonian absolute space the unitary Cartesian subject and subject object dualism that were challenged and ultimately overthrown in turn of the century science and art Developments in theatre architecture and typographic design are examined against this philosophical backdrop with a view to establishing a diachronic and interdisciplinary framework of the authors in question Chapter 2 focuses on the spatial dimension of Mallarmé's *Un Coup de dés* and Apollinaire's calligrammes works which defamiliarise page space by undermining various naturalised conventions of paginal configuration In Chapter 3 the notion of liminality is implemented in an analysis of character and diegetic space as constructed in Jarry's *Ubu roi* and Maeterlinck's *one acts* Chapters 4 and Chapter 5 undertake a more abstract investigation of parallel inverse processes the subjectivisation of space and the spatialisation of the subject manifest not only in the works of Mallarmé Maeterlinck Apollinaire and Jarry but in the period's poetry and drama more generally
