Nature And The Orient The Environmental History Of South And Southeast Asia:

Nature and the Orient Richard H. Grove, Vinita Damodaran, Satpal Sangwan, 1998 Discussing diverse aspects of the environmental history of South and Southeast Asia from a variety of perspectives it brings together leading experts from the fields of history history of science archaeology geography and environmental studies and covers a time span from 50 000 BC to the present Spanning a geographical region from Peshawar on the North West Frontier to the Maluku Islands in eastern Indonesia this book tells the story of the highly complex relationship between people and their environment Among a multitude of subjects it reports on the latest findings in settlement archaeology the history of deforestation climate change the history of fishing hunting and shikar colonial science and forest management indigenous plant knowledge the history of famine the impact of coal mining and the tragic story of India's tribal communities *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You will also find material on religion and science East and West and magic and science **The Oxford Handbook of Environmental History** Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field **Environmental History and Tribals in Modern India** Velayutham Saravanan, 2018-03-07 This monograph presents a comprehensive account of environmental history of India and its tribals from the late eighteenth onwards covering both the colonial and post colonial periods The book elaborately discusses the colonial plunder of forest resources up to the introduction of the Forest Act 1878 and focuses on how colonial policy impacted on the Indian environment opening the floodgates of forest resources plunder primarily for timber and to establish coffee and tea plantations The book argues that even after the advent of conservation initiatives commercial exploitation of forests continued unabated while stringent restrictions were imposed on the tribals curtailing their access to the jungles It details how post colonial governments and populist votebank politics followed the same commercial forest policy till the 1980s without any major reform exploiting forest resources and also encroaching upon forest lands pushing the self sustainable tribal economy to crumble The book offers a comprehensive account of India's environmental history during both colonial and post colonial times contributing to the current environmental policy debates in Asia **Water and the Environmental History of Modern India** Velayutham Saravanan, 2020-01-23 This important new study investigates the competing demand for water in the Bhavani and Noyyal River basins of south India from the early

19th century to the early 21st century from a historical perspective In doing so the book addresses several important questions Did policy makers visualise the future demand while diverting water from distant places or other basins Was efficient use ensured when the water was diverted or was it diverted in a manner that resulted in pollution and serious damage to the entire river basin Were natural flows taken care of in order to preserve the ecology and environment What were the factors that aggravated the competing demand for water and what were the consequences for the future In the context of the current discourse on the competing demands for water this book takes the debate forward expanding the horizon of environmental history in the process Until now agriculture industry and domestic water supply and their consequences for ecology the environment and livelihoods have been given scant attention Velayutham Saravanan s comprehensive account of both the colonial and post colonial periods corrects this shortcoming in the field s literature and gives a holistic understanding of the problem and its full historical roots Colonialism, Environment and Tribals in South India, 1792-1947 Velayutham Saravanan, 2016-08-12 This book offers a bird s eye view of the economic and environmental history of the Indian peninsula during colonial era It analyses the nature of colonial land revenue policy commercialisation of forest resources consequences of coffee plantations intrusion into tribal private forests and tribal controlled geographical regions and disintegration of their socio cultural political administrative and judicial systems during the British Raj It explores the economic history of the region through regional and non market economies and addresses the issues concerning local communities Comprehensive systematic and rich in archival material this book will be useful to scholars and researchers in history especially those concerned with economic and environmental history Ecological Sustainability for Non-timber Forest Products Charlie M. Shackleton, Ashok K. Pandey, Tamara Ticktin, 2015-03-24 There is growing knowledge about and appreciation of the importance of Non timber Forest Products NTFPs to rural livelihoods in developing countries and to a lesser extent developed countries However there is also an assumption on the part of policy makers that any harvesting of wild animal or plant products from the forests and other natural and modified ecosystems must be detrimental to the long term viability of target populations and species This book challenges this idea and shows that while examples of such negative impacts certainly exist there are also many examples of sustainable harvesting systems for NTFPs The chapters review and present coherent and scientifically sound information and case studies on the ecologically sustainable use of NTFPs They also outline a general interdisciplinary approach for assessing the sustainability of NTFP harvesting systems at different scales A wide range of case studies is included from Africa Asia and South America using plant and animal products for food crafts textiles medicines and cosmetics *Forests and Ecological History of Assam, 1826-2000* Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam s forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest

resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century. He shows how imperial forestry practices led to changes in traditional resource utilization patterns. The book also examines the political economy of conservation practices. It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy. The book argues how the making of forest policy in the postcolonial period was defined by the complexities of the political matrix. It discusses plantation silvicultural practices, protection and regeneration of forests and livelihood practices. The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act.

China, India, and East and Southeast Asia: Assessing Sustainability Ray C. Anderson, Sam Geall, Jingjing Liu, Sony Pellissery, E. N. Anderson, Joel R. Campbell, Joanna I. Lewis, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01. China, India and East and Southeast Asia: Assessing Sustainability provides unprecedented analyses by regional experts and scholars elsewhere in the world on China, India and their neighbors. Despite growing demands internally on their natural resources, China and India alone are home to more than one third of the world's population; the expanding global economic influence of this region makes these countries vital players in a sustainable future for all citizens of the Earth. Regional coverage includes topics such as business and commerce, environmental and corporate law and lifestyles and values.

Deforesting the Earth Michael Williams, 2003. Clearing in the deep past: Reaching out to Europe and the wider world. The global forest.

Environment and Empire William Beinart, Lotte Hughes, 2007-10-11. European imperialism was extraordinarily far-reaching, a key global historical process of the last 500 years. It locked disparate human societies together over a wider area than any previous imperial expansion; it underpinned the repopulation of the Americas and Australasia; it was the precursor of globalization as we now understand it. Imperialism was inseparable from the history of global environmental change. Metropolitan countries sought raw materials of all kinds, from timber and furs to rubber and oil. They established sugar plantations that transformed island ecologies. Settlers introduced new methods of farming and displaced indigenous peoples. Colonial cities, many of which became great conurbations, fundamentally changed relationships between people and nature. Consumer cultures, the internal combustion engine and pollution are now ubiquitous. Environmental history deals with the reciprocal interaction between people and other elements in the natural world, and this book illustrates the diverse environmental themes in the history of empire. Initially concentrating on the material factors that shaped empire and environmental change, *Environment and Empire* discusses the way in which British consumers and manufacturers sucked in resources that were gathered, hunted, fished, mined and farmed. Yet it is also clear that British settler and colonial states sought to regulate the use of natural resources as well as commodify them. Conservation aimed to preserve resources by exclusion, as in wildlife parks and forests, and to guarantee efficient use of soil and water. Exploring these linked themes of exploitation and conservation, this study concludes with a focus on political reassertions by colonised peoples over natural resources. In a post-imperial age, they have found a

new voice reformulating ideas about nature landscape and heritage and challenging at a local and global level views of who has the right to regulate nature

The Oxford Handbook of Public History, 2017-09-20 The Oxford Handbook of Public History introduces the major debates within public history the methods and sources that comprise a public historian's tool kit and exemplary examples of practice It views public history as a dynamic process combining historical research and a wide range of work with and for the public informed by a conceptual context The editors acknowledge the imprecision bedeviling attempts to define public history and use this book as an opportunity to shape the field by taking a deliberately broad view They include professional historians who work outside the academy in a range of institutions and sites and those who are politically committed to communicating history to the wide range of audiences This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today for university teachers of public history to assist their students and for working public historians to keep up to date with recent research This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational technological and democratic While the nation state remains the primary means of identification increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders It addresses squarely the tech savvy media literate citizens of the world the digital natives of the twenty first century in a way that recognizes the revolution in shared authority that has swept museum work oral history and much of public history practice This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s which now constitutes the historical culture in each country Public historians need to understand both contexts and to negotiate their implications for questions of historical authority and the public historian's work The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy family history and popular collecting cultural tourism historic sites and memorial museums increased memorialization both formal and informal from roadside memorials to state funded shrines and memorial Internet sites increased publication of historical novels biographies and movies and TV series set in the past Much of this as well as a vast array of new community cultural projects has been facilitated by the digital technologies that have increased the accessibility of historical information the democratization of practice and the demand for sharing authority

Geographies of Knowledge Robert J. Mayhew, Charles W. J. Withers, 2020-08-18 A path breaking exploration of how space place and scale influenced the production and circulation of scientific knowledge in the

nineteenth century Over the past twenty years scholars have increasingly questioned not just historical presumptions about the putative rise of modern science during the long nineteenth century but also the geographical contexts for and variability of science during the era In *Geographies of Knowledge* an internationally distinguished array of historians and geographers examine the spatialization of science in the period tracing the ways in which scale and space are crucial to understanding the production dissemination and reception of scientific knowledge in the nineteenth century Engaging with and extending the influential work of David Livingstone and others on science's spatial dimensions the book touches on themes of empire gender religion Darwinism and much more In exploring the practice of science across four continents these essays illuminate the importance of geographical perspectives to the study of science and knowledge and how these ideas made and contested locally could travel the globe Dealing with everything from the local spaces of the Surrey countryside to the global negotiations that proposed a single prime meridian from imperial knowledge creation and exploration in Burma India and Africa to studies of metropolitan scientific cum theological tussles in Belfast and in Confederate America *Geographies of Knowledge* outlines an interdisciplinary agenda for the study of science as geographically situated sets of practices in the era of its modern disciplinary construction More than that it outlines new possibilities for all those interested in knowledge's spatial characteristics in other periods Contributors John A Agnew Vinita Damodaran Diarmid A Finnegan Nuala C Johnson Dane Kennedy Robert J Mayhew Mark Noll Ronald L Numbers Nicolaas Rupke Yvonne Sherratt Charles W J Withers *The Nature State* Wilko Hardenberg, Matthew Kelly, Claudia Leal, Emily Wakild, 2017-07-14 This volume brings together case studies from around the globe including China Latin America the Philippines Namibia India and Europe to explore the history of nature conservation in the twentieth century It seeks to highlight the state a central actor in these efforts which is often taken for granted and establishes a novel concept the nature state as a means for exploring the historical formation of that portion of the state dedicated to managing and protecting nature Following the Industrial Revolution and post war exponential increase in human population and consumption conservation in myriad forms has been one particularly visible way in which the government and its agencies have tried to control manage or produce nature for reasons other than raw exploitation Using an interdisciplinary approach and including case studies from across the globe this edited collection brings together geographers sociologists anthropologists and historians in order to examine the degree to which sociopolitical regimes facilitate and shape the emergence and development of nature states This innovative work marks an early intervention in the tentative turn towards the state in environmental history and will be of great interest to students and practitioners of environmental history social anthropology and conservation studies **Southeast Asia** Peter Boomgaard, 2006-12-14 From Angkor Wat to Agent Orange Southeast Asia An Environmental History tells the story of some of the most dramatic effects humans have had on the natural and developed environment anywhere in the world and examines the ways in which environmental factors have helped shape the culture politics and societies of the region Ever

since the first humanlike creatures arrived some 80 000 years ago Southeast Asia's varied and challenging environment has helped shape the course of human destiny From the importance of its spices to 17th century Europeans to the jungle canopies that sheltered Communist insurgents throughout much of the 20th century the region's environment has often proven decisive in human affairs Packed with key facts and analysis Southeast Asia provides an expert guide to the complex interplay between human societies and the environment from Burma to the Philippines and from Vietnam to Indonesia How has the environment helped shape politics trade and religion What are the likely consequences of ongoing deforestation for Southeast Asia's people and animals Part of ABC CLIO's Nature and Human Societies series this work charts the region's environmental history from prehistory to modern times and is essential reading for students and experts alike

Environmental History in the Pacific World J.R. McNeill, 2022-03-01 This volume brings together a set of key articles from the last 30 years pertaining to the environmental history of the Pacific basin It aims to treat the islands and waters of the Pacific as well as the lands around the Rim from New Zealand to Japan to California to Chile and is the first work of environmental history to take this inclusive view of the Pacific basin The focus is mainly on recent centuries but as environmental history requires at times the work also takes the very long view of millennia Several of the articles seek to bring a broad Pacific perspective to bear on their subjects while others use Pacific basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture The book includes a bibliography of Pacific basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field

Under Osman's Tree Alan Mikhail, 2017-03-13 The early modern Middle East was a crucial zone of connection between Europe and the Mediterranean world on the one hand and South Asia the Indian Ocean and sub Saharan Africa on the other Accordingly global trade climate and disease both affected and were affected by what was happening in the Middle East's many environments The trans territorial and trans temporal character of environmental history helps shed new light on the history of the region and Alan Mikhail's latest tackles major topics in environmental history natural resource management climate human and animal labor water control disease and the politics of nature It also reveals how one of the world's most important religious traditions Islam has related to the natural world This is a model book that sets the course for Middle East environmental history

Environmentalism in Central and Southeastern Europe Hrvoje Petric, Ivana Žebec Šilj, 2017-03-17 Consisting of 12 chapters the book presents the rise and development of environmentalism environmental history as a discipline and the history of environmental movements in the Central and South Eastern European region from an international point of view The chapters written by scholars from Italy Austria Slovenia Croatia Slovakia Romania Serbia Greece and Turkey cover a wide range of topics including the creation of protected areas increasing environmental consciousness the evolution of humanity's relationship toward the environment and perceptions of environmentalism by different disciplines This international approach highlights the region's complex development from the

end of the eighteenth century through the twentieth century with its unique blend of traditions Three historically different traditions the Habsburg Ottoman and Venetian converge in Central and South Eastern Europe and this book emphasizes the subtleties of these sometimes intertwined traditions The focus of the book varies according to both the different geographical environments characteristic of the region and the protagonists who actively participated in changing relationships toward the environment However what does not vary and is common to all the chapters is the historical approach since the process has continuity which the book accentuates In geographical terms the region that is the focus of the book Central and South Eastern Europe is the contact zone of the Alps Danube Adriatic and partially the North Eastern Mediterranean Sea Throughout history it was also the contact zone of the Habsburg Ottoman and Venetian traditions Those realities have resulted in a unique blending and intertwining of traditions and therefore relationships with and perceptions of the environment

The Nature of Empire Andrea Duffy, 2025-09-15 The Nature of Empire exposes the central role of modern imperialism in the development of contemporary environmentalism and environmental science It builds this case through an investigation of five major modern empires Britain France Russia the Ottoman Empire and Japan This book offers readers a global environmental history of modern imperialism that actively engages Western based and non Western based empires As this study shows imperialism ultimately transformed human perceptions of nature and the environment in significant lasting and conflicting ways It both inspired modern conservationist practices and fueled opposition to environmental policies in colonial contexts It also spurred the development of climate science which helped reveal the environmental toll of imperial exploitation and drive efforts to fight it The environmental and political legacies of empire remain evident today through unmitigated anthropogenic climate change and the increasing incidence of extreme weather which tends to disproportionately impact marginalized peoples This book stands as a useful and accessible resource for students scholars and all those seeking to better understand environmental history imperial legacies and the roots of contemporary climate challenges
