W. J. Schelling, 2012-02-01 Appearing here in English for the first time this is F W J Schelling's vital document of the attempts of German Idealism and Romanticism to recover a deeper relationship between humanity and nature and to overcome the separation between mind and matter induced by the modern reductivist program Written in 1799 and building upon his earlier work First Outline of a System of the Philosophy of Nature provides the most inclusive exposition of Schelling's philosophy of the natural world He presents a startlingly contemporary model of an expanding and contracting universe a unified theory of electricity gravity magnetism and chemical forces and perhaps most importantly a conception of nature as a living and organic whole *Insects Did It First* Gregory S. Paulson, Eric R. Eaton, 2018-11-15 This is a fascinating account of more than eighty insect firsts Velcro bungee jumping air conditioning and chemical warfare are a few of the firsts covered in this book authored by two professional entomologists The text is illustrated with humorous anthropomorphized insects It is written for a general audience but is of special interest to teachers and entomologists *First Lessons in Nature Study* Edith M. Stamos,2012-02-01 Since the 1859 publication of *On the Origin of Species* the concept of species in biology has been widely debated with its precise definition far from settled And yet amazingly there have been no books devoted to Charles Darwin s thinking on the term until now David N Stamos gives us a groundbreaking historical reconstruction of Darwin s detailed yet often misinterpreted thoughts on this complex concept Stamos provides a thorough and detailed analysis of Darwin s extensive writings both published and unpublished in order to reveal Darwin s actual species concept Stamos argues that Darwin had a unique evolutionary species concept in mind one that was not at all a product of his time Challenging currently accepted views that believe Darwin was merely following the species ascriptions of his fellow naturalists Stamos works to prove that this prevailing nominalistic view should be overturned This book also addresses three issues pertinent to the philosophy of science the modern species problem the nature of concept change in scientific revolutions and the contextualist trend in professional history of science **A Treatise of Human Nature** David Hume,1888 Gallery of Nature and Art, Or a Tour Through Creation and Science E.
