Friction Anna Lowenhaupt Tsing, 2024-08-06 What the struggle over the Indonesian rainforests can teach us about the social frictions that shape the world around us Rubbing two sticks together produces heat and light while one stick alone is just a stick It is the friction that produces movement action and effect Anthropologist Anna Lowenhaupt Tsing challenges the widespread view that globalization invariably signifies a clash of cultures developing friction as a metaphor for the diverse and conflicting social interactions that make up our contemporary world Tsing focuses on the rainforests of Indonesia where in the 1980s and 1990s capitalist interests increasingly reshaped the landscape not so much through corporate design as through awkward chains of legal and illegal entrepreneurs that wrested the land from previous claimants creating resources for distant markets In response environmental movements arose to defend the rainforests and the communities of people who live in them Not confined to a village province or nation the social drama of the Indonesian rainforests includes local and national environmentalists international science North American investors advocates for Brazilian rubber tappers United Nations funding agencies mountaineers village elders and urban students all drawn into unpredictable messy misunderstandings but misunderstandings that sometimes work out Providing an invaluable portfolio of methods for the study of global interconnections **Friction** shows how cultural differences are in the grip of worldly encounter and reveals how much is overlooked in contemporary theories of the global

NeSmith, 2021-06-15 Porcupines are North America's second largest rodent with only the beaver surpassing it. They are alive and well but most people have never seen one in the wild. They are cute chubby walk with a wobble but just not very cuddly. The reason: They have quills sharper than hypodermic needles on their body up to 30,000. These herbivores are unique in that they are one of the few northern mammals that do not hibernate or enter torpor. Instead they den up in prickles and then manage to live off some of the least nutrient flora in the wintertime. This book will help you understand porcupines and what they eat, how they act, and why they are so good at surviving hostile winters and hot summers South Carolina Travel Guide * Palmetto State Paradise * USA eBook Baktash Vafaei, Welcome to an unforgettable trip to the Palmetto State.
