Physics and Chemistry of Earth Materials Alexandra Navrotsky, 1994-11-25 With an approach that stresses the fundamental solid state behaviour of minerals and with emphasis on both theory and experiment this 1995 text surveys the physics and chemistry of earth materials It starts with a systematic tour of crystal chemistry of both simple and complex structures with completely new structural drawings and discusses how structural and thermodynamic information is obtained experimentally The quantitative concepts of chemical bonding band theory molecular orbit and ionic models are reviewed The book goes on to discuss physical properties and to relate microscopic features to macroscopic thermodynamic behaviour The book then discusses high pressure phase transitions amorphous materials and solid state reactions and concludes with a look at the interface between mineral physics and materials science Highly illustrated throughout this book fills the gap between undergraduate texts and specialised review volumes for students in earth sciences and materials science

Yen,2018-09-20 This book considers William Wordsworth's use of iconography in his long poem The Excursion Through the iconographical approach the author steers a middle course between The Excursion's two very different interpretive traditions one focusing upon the poem's philosophical abstraction the other upon its touristic realism Fresh readings are also offered of Wordsworth's other major works including The Prelude Yen explores Wordsworth's iconography in The Excursion by tracing allusions and correspondences in an abundance of post 1789 and earlier verbal and pictorial sources as well as in Wordsworth's prose and poetry He analyses how the iconographical images in The Excursion contribute to and impose limitations on the overarching preoccupations of Wordsworth's writings particularly the themes of paradise lost and paradise regained in the post revolutionary context Shedding light on a vital aspect of Wordsworth's poetic method this study reveals the visual etymologies together with the nuances and rhetorical capacities of five categories of apparently collateral images envisioning rooting dwelling flowing and reflecting Contemporary Approaches to Geography Volume 2: Physical Geography Steve Suggitt,1999 *Permafrost* Frederick J.
