Volume 21 Thermal Design Principles of Spacecraft and Entry Bodies is a collection of technical papers drawn mainly from  
the American Institute of Aeronautics and Astronautics Third Thermophysics Specialist Conference held in Los Angeles  
California on June 24 26 1968 This volume is divided into three parts The first part covers some aspects of thermal processes  
and design including thermal analysis convection radiation ablation and space rocket effects The second part surveys the  
remote measurements of the thermophysical and thermal radiation properties and joint conductance which are critical  
criteria for space thermal design The third part focuses on the space environmental effects on thermal coatings This part  
deals first with the theory of radiative degradation followed by a presentation of the laboratory measurements This part also  
looks into the results of several flight experiments This book will be of great value to thermophysicists space engineers and  
designers who are working in the space science fields    **Proceedings of the Seventh Annual Working Group on**
