**The Concept of Nature** Alfred North Whitehead, 2007-01-01 Hailed as one of the most valuable books on the relation of philosophy and science Alfred North Whitehead's *The Concept of Nature* first published in 1920 was an important contribution to the development of philosophic naturalism Examining the fundamental problems of substance space and time Whitehead assesses the impact of Einstein's theories as well as the then recent findings of modern physics on the concept of nature For students and teachers of natural philosophy this is essential reading English mathematician and philosopher ALFRED NORTH WHITEHEAD 1861-1947 contributed significantly to 20th century logic and metaphysics With Bertrand Russell he cowrote the landmark *Principia Mathematica* and also authored *An Inquiry Concerning the Principles of Natural Knowledge The Function of Reason and Process and Reality* *The Nature of the Moment* Valentine Ackland, 1996-09

**Truthful Sayings** Siyanda Mqugwana, 2011-12-20 This is a book about how to live according to your nature respecting Nature others and yourself while living in the moment The author takes on the monumental task of defining life consciousness enlightenment and the elusive fountain of youth The reader is taken on an introspective and philosophical journey within during which age old questions are answered in a simple and easy to understand manner This book shines a light on the individual and explores the power of the right intention as represented in the right thought and heard in the right speech before it is seen in the right action that shapes not just the individual but also the world The role of individual consciousness in shaping universal consciousness is touched upon and an easy to follow step by step approach is provided such that the reader is not only provided with the what and the how but also with the why as some questions are left unanswered in a tantalizing manner that leaves you searching for more **The Nature of Things** Jeffrey R.

Anderson, 2012-04-27 Were all asking the same kinds of questions with the same goal in mind How do I fit in How can I navigate life gracefully How can my life be more satisfying How can I experience more love joy awe and wonder By learning understanding and applying the inherent wisdom that we find in the natural world we can connect with people and with our planet with our own hearts and souls and create a life that is not only better for us as individuals but perhaps together create a world that works for everyone With simplicity and humor Jeff shows how the wisdom of nature can free us untangle us from the complexity of our ego driven lives This is the wisdom of the ordinary for each of us to treasure Allow these clear and profound teachings to awaken you so that you can glimpse the divine that is within you and all around Llewellyn Vaughan Lee Ph D Sufi teacher and author like a friendly sharing across a backyard fence or an informal exchange of insights across a cup of coffee Jeff Anderson has written about the times we live in the challenges we face and the kind of life and consciousness that may help us not just survive but prosper David Spangler author of *Apprenticed to Spirit* and *Facing the Future* A thought provoking humorous and touching collection of truly helpful ideas Dr Edward Viljoen author of *Practice the Presence* and *Spirit Is Calling* **The Physicists' View of Nature, Part 1** Amit Goswami, 2012-12-06 This book is designed

as a textbook for students who need to fulfil their science requirements Part I explores classical physics from its beginnings with Descartes Galileo Kepler and Newton to the relativity theories of Einstein Special emphasis is given to the development of the objective materialist and deterministic worldview of classical physics The influence of Newtonian physics on other fields of science and on society is emphasized Finally some of the problems with the worldview of classical physics are discussed and a preview of quantum physics is given

**Relativity and the Nature of Spacetime** Vesselin

Petkov,2009-06-23 This expanded second edition of Relativity and the Nature of Spacetime contains several major changes and a number of additions to different chapters Two chapters Chaps 6 and 7 which discussed two specific groups of arguments against the reality of spacetime have been transformed into appendices A and B Two new chapters Chaps 6 and 10 have been added Chapter 6 entitled Why Is the Issue of the Nature of Spacetime So Important elaborates on what was Sect 5.6 of the first edition and addresses some recent work on the nature of spacetime for example the growing or evolving block universe model of the world which has recently been revived by several physicists as what appears to be the last remaining alternative to the Minkowski absolute four dimensional world after it had become an undeniable fact that three dimensionalism or presentism contradicts the relativistic experimental evidence Chapter 10 entitled Spacetime and the Nature of Quantum Objects and based on what used to be Sects 6.2 and 6.3 in the first edition explores the implications of the issue of the nature of spacetime for quantum physics in order to see whether it can provide some insight into the nature of quantum objects Two new sections have been included namely Sect 5.6 entitled Relativization of Existence and Observers in General Relativity and Sect 7.6 titled Probing the Anisotropic Velocity of Light by a Terrestrial Experiment

Lawrence John Edward Hofer,1966 The Epochal Nature of Process in Whitehead's Metaphysics F. Bradford Wallack,1980-06-30 While my book attempts to reflect the full range of scholarly debate I have also attempted to make it useful to anyone interested in Whitehead To this end I have introduced the Whiteheadian terms one by one explaining each in the light of my interpretation and I have used examples wherever possible I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions and that he did not intend it to be relegated to purely abstract or esoteric application F Bradford Wallack The twentieth century has seen the greatest innovations in philosophical cosmology since Newton and Descartes and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways In a book that will be controversial in the philosophical community F Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace Specifically she proposes a thorough revision of accepted interpretations of Whitehead's concept of the actual entity Wallack then elucidates Whitehead's ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality Whitehead's philosophy

Quinton, 2019-03-07 Originally published in 1973 In this systematic treatise Anthony Quinton examines the concept of substance a philosophical refinement of the everyday notion of a thing Four distinct but not unconnected problems about substance are identified what accounts for the individuality of a thing what confers identity on a thing what is the relation between a thing and its appearances and what kind of thing is fundamental in the sense that its existence is logically independent of that of any other kind of thing In Part 1 the first two problems are discussed while in Part 2 the third and fourth are considered Part 3 examines four kinds of thing that have been commonly held to be in some way non material abstract entities the unobservable entities of scientific theory minds and their states and finally values The author argues that theoretical entities and mental states are in fact material He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value      **Second Nature** Josephine Gray, Lisa Trahair, 2022-11-08 This critical intervention in the study of the comic investigates how the comic act is also an expressive and performative act that precedes philosophical conceptualisation The book puts Bergson philosophy and the body at the centre of its investigation to explore different aspects of the field from the history and philosophy of comedy to film and psychoanalysis The volume develops a theoretical and practice based framework that will be a valuable resource for students scholars and practitioners alike in the fields of philosophy literary studies theatre and performance studies and comedy studies List of Contributors Caterina Angela Agus Fred Dalmaso Lisabeth During Xavier Escibano Giovanni Fusetti Davide Giovanzana Josephine Gray Mar a J Ortega M ez Meg Mumford Jean Michel Rabat Carolyn Shapiro Lisa Trahair      **Say What? Surprising Chats with Animals & Nature About Human Life** ,      *Nature and Imagination in Ancient and Early Modern Roman Art* Gabriel Pihas, 2022-07-27 This volume uses the art of Rome to help us understand the radical historical break between the fundamental ancient presupposition that there is a natural world or cosmos situating human life and the equally fundamental modern emphasis on human imagination and its creative power Rome's unique art history reveals a different side of the battle between ancients and moderns than that usually raised as an issue in the history of science and philosophy The book traces the idea of a cosmos in pre modern art in Rome from the reception of Greek art in the Roman republic to the construction of the Pantheon to early Christian art and architecture It then sketches the disappearance of the presupposition of a cosmos in the High Renaissance and Baroque periods as creativity became a new ideal Through discussions of the art and architecture that defines proto modern Rome from Michelangelo's *terribilita* in the Sistine Chapel Caravaggio's realism Baroque illusionism the infinities of Borromini's architecture to the Grand Tour's representations of ruins through an

interpretation of such major issues and works this book shows how modern art liberates us while leaving us feeling estranged from our grounding in the natural world The book will be of interest to scholars working in art history architectural history classics philosophy and early modern history and culture Ethical Responses to Nature's Call James Magrini, 2019-06-05 Arguing for a renewed view of objects and nature Ethical Responses to Nature's Call considers how it is possible to understand our ethical duties in the form of ethical intuitionism to nature and the planet by listening to and releasing ourselves over to the call or address of nature Blending several strands of philosophical thought such as Graham Harman's Object Oriented Ontology W D Ross's prima facie Alphonso Lingis's phenomenological ethics traceable to The Imperative and Michael Bonnett's ecophilosophy this book offers a unique rejoinder to the problems and issues that continue to haunt humans relationship to nature The origins of such problems and issues largely remain obscured from view due to the oppressive influence of the Cultural Framework which gives form and structure to the ways we understand discourse on and comport ourselves in relation to the natural world Through understanding this Cultural Framework we also come to know the responses we continue to offer in answer to nature's call and address and are then in a position to analyze and assess those responses in terms of their potential ethical weight Such a phenomenon is made possible through the descriptive and interpretive method of eco phenomenology This renewed vision of the human and nature provides direction for our interaction with and behavior toward nature in such a way that the ethical insight offers a diagnosis and provides a potentially compelling prescriptive for environmental ills *The Nature of Man and God* Simon S. Godfrey, 2003 The search for understanding the meaning of the self and the nature of the Supreme Being has been the nub problem in history Although these concepts have been expounded in all ages by innumerable philosophers theologians and other writers the fact that they still remain nebulous indicates that more work is warranted in these perennial areas The Nature of Man and God deals with these two fundamental issues in a clear concise and down to earth manner As a psychologist the author has spent some thirty years investigating the issues in question The study of the self led him willy nilly to the reality of something that William James called a More or something that is popularly known as God The author found close affinity between the reality of the self and the reality of the Deity Owing to this affinity the author proposes that a more palpable way of knowing the Deity is to know one's own true self On the subject of the self the author distinguishes between two types a nominal self which is a mere echo of the early experiences of the individual and a transcendental self the latter can be realized only when human beings set themselves to unlearn what they have been taught on such matters rely on their inner resources and become their own gurus instead of following the instructions of self proclaimed authorities Regarding the Divine nature the author puts forth several challenging new theses In particular he enlarges on matters relating to ultimate concerns the human task freedom of will responsibility and theodicy explicating why there is evil and suffering in the world The book invites the reader to reach for a higher plain of humanness The topics covered are pivotal as the whole of humankind does indeed pivot around them It

is the author's conviction that none of the current personal or international crises can be effectively resolved until humans first learn who they are and what genre of supratemporal intellect powers the scheme of things in the world. The book should appeal to multiple audiences at a time when it seems nothing can disentangle the state of human affairs; there is a crying need for this kind of book. In particular, it should prove of great interest to all those sincerely seeking to know themselves and their God; the book also provides a workable tool for those seriously involved in improving the human lot or those weary of ongoing superficialities and trivialities of modern life.

**On the nature and passage of time and 4-D geometry** Samuel K.K. Blankson, 2013-12-07 PAPERBACK. In his 10th book on post-relativity philosophy of time, the Ghanaian philosopher argues that all the theories we read about time are useful only for constructing clocks to accord accurately with the earth's regular motions and astronomical features. The many bemusing technical terms employed like duration between events, sidereal time, solar time, nutation, equinox, earth's rotation, the precession of the equinoxes etc. were all invented to account for fixed general and absolute time running all through the cosmos and the same everywhere. This view of time, however, was abolished by Einstein. He adds that everything we have ever used to reckon time, including atomic time, amounts to mere physical cycles, pulses or oscillations that we count as the units of time, the years, for instance, but they are passing. He has also uncovered Einstein's undoubted snub to 4-D geometry.

**Learning, Natural Capital and Sustainable Development** John Foster, Stephen Gough, 2013-09-13. This special issue of the journal *Environmental Education Research* addresses a topical area of importance: human behaviour towards the environment. The book explores the economic metaphor of natural capital in this context, arguing that the currently dominant model of sustainable development, underpinned by a particular understanding of this metaphor, is impeding progress towards genuine sustainability, and secondly, that it will continue to do so until the metaphor can be reworked in both thought and practice. This book explores an alternative economic model of natural capital value based on recent real options thinking, which reworks the natural capital idea and provides a framework for articulating two major and closely related shifts of emphasis.

**First Outline of a System of the Philosophy of Nature** F. W. J. Schelling, 2012-02-01. Appearing here in English for the first time, this is F. W. J. Schelling's vital document of the attempts of German Idealism and Romanticism to recover a deeper relationship between humanity and nature and to overcome the separation between mind and matter induced by the modern reductivist program. Written in 1799 and building upon his earlier work *First Outline of a System of the Philosophy of Nature*, it provides the most inclusive exposition of Schelling's philosophy of the natural world. He presents a startlingly contemporary model of an expanding and contracting universe, a unified theory of electricity, gravity, magnetism, and chemical forces, and perhaps most importantly, a conception of nature as a living and organic whole.
