## **Nature Technology And Society Cultural Roots Of The Current Environmental Crisis:**

**Nature, Technology, and Society** Victor Ferkiss, 1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues

*Nature, Technology, and Society* Victor C. Ferkiss, 1993-01-01 Ferkiss emeritus government Georgetown U delves thoughtfully into how various civilizations and cultures including Western civilization have historically looked at humanity nature and technology He then looks at the conflicting attitudes of contemporary thinkers seeking a balance but maintaining a bias toward reverence for nature and an

*Marx in the Anthropocene* Kohei Saito, 2023-02-02 Facing global climate crisis Karl Marx's ecological critique of capitalism more clearly demonstrates its importance than ever This book explains why Marx's ecology had to be marginalized and even suppressed by Marxists after his death throughout the twentieth century Marx's ecological critique of capitalism however revives in the Anthropocene against dominant productivism and monism Investigating new materials published in the complete works of Marx and Engels Marx Engels Gesamtausgabe Saito offers a wholly novel idea of Marx's alternative to capitalism that should be adequately characterized as degrowth communism This provocative interpretation of the late Marx sheds new lights on the recent debates on the relationship between society and nature and invites readers to envision a post capitalist society without repeating the failure of the actually existing socialism of the twentieth century

*Global Climate Change* Sharon L. Spray, Karen Leah McGlothlin, 2002 This collection of essays is designed to introduce students to the topic of global climate change from multidisciplinary perspectives The contributors approach the topic with the belief that the more knowledgeable students are about the topic the better equipped they will be for meeting the challenge of changing global climate

**'The industrialized designer'** Leah Armstrong, 2024-10-23 What does it mean to be called an industrial designer This book traces the remarkable rise of this professional identity in historical perspective from a position of anonymity in the early twentieth century to mid century professionalisation to decline and disintegration by 1980 Drawing on new extensive original archival research it uncovers the history of a profession in a state of re invention 1930 1980 in Britain and the United States The book tests assumptions about the relationship between the professions in the two countries bringing them into comparative

historical perspective for the first time The gendered dynamics of professionalisation and their interaction with the representation of the heroic male designer are interrogated and critically examined Building on new gender perspectives to the history of the industrial design profession the book calls for a re examination of the limits and boundaries of what constitutes professional identity and work *From Goodwill to Grunge* Jennifer Le Zotte,2017-02-02 In this surprising new look at how clothing style and commerce came together to change American culture Jennifer Le Zotte examines how secondhand goods sold at thrift stores flea markets and garage sales came to be both profitable and culturally influential Initially selling used goods in the United States was seen as a questionable enterprise focused largely on the poor But as the twentieth century progressed multimillion dollar businesses like Goodwill Industries developed catering not only to the needy but increasingly to well off customers looking to make a statement Le Zotte traces the origins and meanings of secondhand style and explores how buying pre owned goods went from a signifier of poverty to a declaration of rebellion Considering buyers and sellers from across the political and economic spectrum Le Zotte shows how conservative and progressive social activists from religious and business leaders to anti Vietnam protesters and drag queens shrewdly used the exchange of secondhand goods for economic and political ends At the same time artists and performers from Marcel Duchamp and Fanny Brice to Janis Joplin and Kurt Cobain all helped make secondhand style a visual marker for youth in revolt **Tackling Tomorrow Today** Arthur B. Shostak,2005 Contains seventeen essays discussing major challenges and issues the United States faces at home and abroad **Peasants, Populism and Postmodernism** Dr Tom Brass,2013-02-01 Tracing the way in which the agrarian myth has emerged and re emerged over the past century in ideology shared by populism postmodernism and the political right the argument in this book is that at the centre of this discourse about the cultural identity of otherness difference lies the concept of and innate peasant ness In a variety of contextually specific discursive forms the old populism of the 1890s and the nationalism and fascism in Europe America and Asia during the 1920s and 1930s were all informed by the agrarian myth The postmodern new populism and the new right both of which emerged after the 1960s and consolidated during the 1990s are also structured discursively by the agrarian myth and with it the ideological reaffirmation of peasant essentialism The Usufructuary Ethos Erin Drew,2021-05-21 Who has the right to decide how nature is used and in what ways Recovering an overlooked thread of seventeenth and eighteenth century environmental thought Erin Drew shows that English writers of the period commonly believed that human beings had only the usufruct of the earth the right of temporary possession use or enjoyment of the advantages of property belonging to another so far as may be had without causing damage or prejudice The belief that human beings had only temporary and accountable possession of the world which Drew labels the usufructuary ethos had profound ethical implications for the ways in which the English conceived of the ethics of power and use Drew s book traces the usufructuary ethos from the religious and legal writings of the seventeenth century through mid eighteenth century poems of colonial commerce attending to the particular

political economic and environmental pressures that shaped transformed and ultimately sidelined it Although a study of past ideas The Usufructuary Ethos resonates with contemporary debates about our human responsibilities to the natural world in the face of climate change and mass extinction

*The ideal river* Joanne Yao, 2022-03-08 Environmental politics has traditionally been a peripheral concern for international relations theory but increasing alarm over global environmental challenges has elevated international society's relationship with the natural world into the theoretical limelight IR theory's engagement with environmental politics however has largely focused on interstate cooperation in the late twentieth century with less attention paid to how the eighteenth and nineteenth century quest to tame nature came to shape the modern international order The ideal river examines nineteenth century efforts to establish international commissions on three transboundary rivers the Rhine the Danube and the Congo It charts how the Enlightenment ambition to tame the natural world and human nature itself became an international standard for rational and civilized authority and informed our geographical imagination of the international This relationship of domination over nature shaped three core IR concepts central to the emergence of early international order the territorial sovereign state imperial hierarchies and international organizations The book contributes to environmental politics and international relations by highlighting how the relationship between society and nature is not a peripheral concern but one at the heart of international politics

**Big Bang Being** Isabel Rimanoczy, Ervin Laszlo, 2017-09-08 When asked for the definition of mental health and fulfillment Sigmund Freud had two words *lieben und arbeiten* love and work In this book we will find how 16 business leaders brought together their compassion their caring for others and the world with their work True only on rare occasions are we able to meet the person behind initiatives that made a positive impact on the world even less have an in depth view into their feelings concerns hesitations doubts and most intimate thoughts What is seen publicly is the initiative the impact on the bottom line and the community or sometimes on the environment Yet it is their personal stories that can be most inspirational since they draw our attention to the fact that amazing achievements start in simple ways with just the thinking of one individual And when we find out that the exemplary individuals have many very human aspects that we identify with and find in ourselves it brings us closer and particularly it may even trigger in us the question If she could do it I wonder what could I do The interviews however were only the beginning of the journey The lessons of the interviews made it possible to identify how we can all develop a sustainability mindset in other words the thinking and the being that can take us from breakdown to breakthrough on this planet Each one of us can play a part in leading the change in fact we are already playing a part we are just not necessarily aware if that is the part we would like to play or aware that we choose the change we are contributing to unfold Part I presents the 16 leaders including a summary of their story and their initiatives Part II goes a little deeper as you will find two dimensions that were not obvious but which underlie the way these business leaders championed the initiatives the Thinking and the Being Part III explores why sustainability change is so slow and addresses the elephant in the room the values and beliefs that anchor our Western Weltanschauung or worldview Part IV addresses the alternatives that we have to convert the unsustainable values into opportunities that will permit humanity to thrive and to break through the obstructions that prevent us from stasis Finally Part V takes us beyond the tipping point and presents us with an opportunity to evolve as humans developing a new way of thinking and being on this planet This transformation is so radical and significant that the author calls it the Big Bang Being
