Nature The Idea Of A Man Made World:

Constructing Place Sarah Menin, 2004-02-24 This book is a cutting edge study examining the attitudes to both nature and the built environment of the designer the client and the society in which an intervention be it architecture landscape design or a piece of art is made The legacy of the Modernist view of nature and the environment is also addressed and the degree to which such ideas continue to impinge on contemporary interventions is assessed Shattered Pictures of Places and Cities in George Santayana's Autobiography Graziella Fantini, 2009 Shattered Pictures of Places and Cities se adentra por las pginas autobiogr ficas filos ficas y narrativas m s relevantes de George Santayana discurrendo por sus viajes y geograf as f sicas en paralelo a sus viajes y geograf as morales Es un intento de ir m s all de la reflexi n entorno a los or genes biogr ficos del fil sofo de ah que se recupere una indagaci n sobre su habitar el lenguaje y el arte Santayana reconsidera los fundamentos del arte de la memoria cl sica en su autobiograf a para formular una nueva propuesta est tica donde el arte y la vida se funden y se confunden estimul ndose rec procamente Hila una filosof a del viaje y del lugar donde se privilegia una noci n del habitar que ilumina nuestra condici n de n madas en la vida y en el pensamiento y nuestra tr gica estable inestabilidad en este mundo *The Making of Things* Frank Jacobus, Angela Carpenter, Rachel Smith Loerts, Justin M. Tucker, Randal Dickinson, 2021-07-29 The Making of Things is about effect and intention in the schematic architectural model a deep dive into the nature of architectonic form as the underlying syntax for all architectural work By focusing on primitive geometries alongside fundamental principles of architectural thinking and making this book enhances the reader s capacity to intellectually and physically craft models that effectively communicate intention With over 650 diagrams this book acts as an expansive visual glossary that reveals the underlying structure of architectonics and acts as an encyclopedia of formal possibilities Supporting essays in the book explore the nature of perception abstraction and metaphor to provide a theoretical basis of formal effects in architecture This structure enables readers to make clear and direct connections between the things you construct and the reasons you construct them This book is a bridge from the what to the why of form making It is a pedagogical notebook a design primer that prompts discourse about the nature of objects This is a must have desk reference for beginning architecture and interior design students to stimulate their creative approaches and gain foundational knowledge of the underlying effects of formal typologies and how they manifest themselves in built forms around the world *Landscape Urbanism and its Discontents* Andr s Duany, Emily Talen, 2013-03-01 Landscape Urbanism and New Urbanism negotiating the relationship between cities and the natural world In contemporary Western society urban development is regarded as an unfortunate blight from which nature provides a much needed respite This apparent dichotomy ignores the interdependence between human settlement and the natural world In fact one of the most pressing problems facing urban theorists today is determining how to resolve the tension between the built and natural environments in the process creating truly sustainable cities Landscape Urbanism and its Discontents is a collection of essays exploring the

debate over urban reform now polarized around the two competing paradigms of Landscape Urbanism and the New Urbanism Landscape Urbanism is conceived as a more ecologically based approach while New Urbanism is more concerned with the built form Well known and influential urban theorists such as Andr s Duany and James Howard Kunstler delve into the impact of the tension between the two perspectives on Smart growth Neighborhood design Sustainable development Creating cities that are in balance with nature While there is significant overlap between Landscape Urbanism and the New Urbanism the former has assumed prominence amongst most critical theorists whereas the latter s proponents are more practically oriented Given that these two sets of ideas are at the forefront of sustainable urban design the analysis and potential reconciliation offered by Landscape Urbanism and its Discontents is long overdue Andr s Duany is a leading proponent of the New Urbanism and is a founding principal at Duany Plater Zyberk Company Emily Talen is a professor at Arizona State University and the author of four previous books on urban design

Loren Eiseley's Writing across the Nature and Culture Divide Qianqian Cheng,2022-12-15 For the twentieth century naturalist and poet Loren Eiseley the relationship between human beings and the natural world has become unnatural divided by the era of modern technology Loren Eiseley s Writing across the Nature and Culture Divide analyses how the philosopher of science becomes a boundary crosser in time and space Qianqian Cheng points to Eiseley s method of uniting science and the humanities to reflect on human evolution and the past and future role of science with a visionary and poetic imagination Seizing the connectedness of living beings Eiseley and now Cheng makes us aware of the presence of nature even in daily urban life Qianqian Cheng unveils Eiseley s merits showing the poet as a necessary voice in the urgent mission to make individuals realize their responsibility to respond ethically to the living world

Spirit of the Environment David E Cooper,Joy A Palmer,2004-06-02 Spirit of the Environment brings spiritual and religious concerns to environmental issues Providing a much needed alternative to exploring human beings relationship to the natural world through the restrictive lenses of science ecology or even morality this book offers a fresh perspective to the field Spirit of the Enironment addresses the environmental attitudes of the major religions the relationship between art and nature the Gaia hypothesis the non instrumental values which have inspired environmental concern Contributors range from a variety of disciplines including philosophy comparative religion education and social anthropology providing students with an intriguing survey on the role that spirituality and religion play in nature This is a vital collection for those eager to examine the relationship between the spiritual and the environment

Block by Block Timothy Mennel,Jo Steffens,Christopher Klemek,2007-12-19 This book is an attack on current city planning and rebuilding From this first sentence of the seminal 1961 book The Death and Life of Great American Cities Jane Jacobs gave voice to those who believed the bulldozing postwar policies of urban renewal were a dangerous threat to city life She spent the next forty five years challenging citizens to stand up for vibrant mixed use pedestrian friendly neighborhoods such as New York s Greenwich Village Jane Jacobs s death in 2006 occasioned the

beginnings of a critical re evaluation of her achievements With major new development plans for sites from the East River to the West Side and from Lower Manhattan to Queens either under consideration or in progress it seems the perfect time to assess the relevance of her ideas for contemporary urban life Block by Block is a far ranging collection of essays about Jane Jacobs from an impressive group of writers and cultural critics including Marshall Berman Malcolm Gladwell Adam Gopnik Paul Goldberger Tama Janowitz Ben Katchor Phillip Lopate Luc Sante Bill Reverend Billy Talen Colson Whitehead and Tom Wolfe This impressive lineup of contributors discusses the contemporary relevance of Jacobs s ideas about large scale redevelopment gentrification and activism While their viewpoints on these issues may differ they continue the important debate begun by Jacobs about the challenges facing New York and other great cities everywhere

The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander,2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental

truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In *The Phenomenon of Life* the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united *Oceans and Human Health* Lora Fleming, Lota B. Alcantara Creencia, William H. Gerwick, Hong Ching Goh, Matthew O. Gribble, Bruce Maycock, Helena Solo-Gabriele, 2023-07-14 *Oceans and Human Health Opportunities and Impacts* Second Edition explores the inextricably interconnected and complex relationship between oceans and humans Through the lens of the expanding oceans and human health meta discipline this work examines the many invaluable ecosystem services offered by oceans as well as the global anthropogenic impacts and explores the associated risks and benefits to human health Written and edited by an interdisciplinary team of experts the book features international perspectives on the resources available to address these benefits and risks including enhanced research policy and community engagement The book concludes by examining the future of ocean stewardship and how global populations can unite to nurture and promote our life enhancing relationship with oceans This is an indispensable resource for students researchers communities and industry specialists in marine sciences public health and international policy Addresses benefits opportunities risks and impacts resulting from the relationship between oceans and humans informed by more than 100 international authors Identifies and links necessary tools to relevant disciplines for action and provides illustrative international case studies Covers scientific socioeconomic political and ethical analyses behind the latest ocean and human health research Provides study questions and horizon scans at the end of each chapter to encourage individual thought and action offering a resource for course instructors students and communities *Engaging Nature* Peter F. Cannavò, Joseph H. Lane Jr., 2014-12-19 Contemporary environmental political theory considers the implications of the environmental crisis for such political concepts as rights citizenship justice democracy the state race class and gender As the field has matured scholars have begun to explore connections between

Green Theory and such canonical political thinkers as Plato Machiavelli Locke and Marx The essays in this volume put important figures from the political theory canon in dialogue with current environmental political theory It is the first comprehensive volume to bring the insights of Green Theory to bear in reinterpreting these canonical theorists Individual essays cover such classical figures in Western thought as Aristotle Hume Rousseau Mill and Burke but they also depart from the traditional canon to consider Mary Wollstonecraft W E B Du Bois Hannah Arendt and Confucius Engaging and accessible the essays also offer original and innovative interpretations that often challenge standard readings of these thinkers In examining and explicating how these great thinkers of the past viewed the natural world and our relationship with nature the essays also illuminate our current environmental predicament Publisher The Return of Nature John Bellamy Foster,2021-06-01 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster s Marx s Ecology Materialism and Nature introduced a new understanding of Karl Marx s revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today s unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs **The Concept of Work** Herbert Applebaum,1992-09-30 This book presents an analysis and review of work starting with the Homeric period then dealing with classical Greece and classical Rome the early Christians and Jews the early Middle Ages the era of Charlemagne the high Middle Ages the views of Luther and Calvin the English and French Enlightenment the nineteenth century the twentieth century and prospects for the future of work It offers a rich and varied tapestry on the complexity of values regarding work criss crossing through crafts occupations and professions through slave and free born employments through lay and religious figures and through rural and urban contexts The permutations of work and its meanings are traced and related to the social and cultural contexts of each period of history dealt with ancient medieval and modern Applebaum offers projections for work in the future based on modern day technologies along with work within the context of new social conditions created by industrial cultures in the modern period The future of work is examined as one of the key elements for the possibility of change in the social structure

of industrial cultures At a time when so many people are questioning the work ethic this book provides a valuable perspective on work in past societies how it has developed and been transformed and what are its prospects for the future
