The Poetics of Transition Jonathan Levin,1999 Considers the work of American pragmatists and of three major literary modernists and reveals how their work foregrounds William James's concept of transitional consciousness Metasemantics Alexis Burgess,Brett Sherman,2014 Metasemantics comprises new work on the philosophical foundations of linguistic semantics by a diverse group of established and emerging experts in the philosophy of language metaphysics and the theory of content The science of semantics aspires to systematically specify the meanings of linguistic expressions in context The paradigmatic metasemantic question is accordingly what more basic or fundamental features of the world metaphysically determine these semantic facts Efforts to answer this question inevitably raise others Where are the boundaries of semantics What is the essence of the meaning relation Which framework should we use for semantic theorizing What are the intrinsic natures of semantic values Are the semantic facts metaphysically determinate What is semantic competence Metasemantic inquiry has long been recognized as a central part of the philosophy of language but recent developments in metaphysics and semantics itself now allow us to approach these classic questions with an unprecedented degree of precision The essays collected here provide promising new perspectives on old problems pose questions that suggest novel research projects and taken together greatly sharpen our understanding of linguistic representation **Subject Catalog** Library of Congress,

Substantive Perspectivism: An Essay on Philosophical Concern with Truth Bo Mou,2009-09-16 I have been thinking about the philosophical issue of truth for more than two decades It is one of several fascinating philosophical issues that motivated me to change my primary reflective interest to philosophy after receiving BS in mathematics in 1982 Some serious academic work in this connection started around the late eighties when I translated into Chinese a dozen of Donald Davidson's representative essays on truth and meaning and when I assumed translator for Adam Morton who gave a series of lectures on the issue in Beijing 1988 which was co sponsored by my then institution Institute of Philosophy Chinese Academy of Social Science I have loved the issue both for its own sake as one specific major issue in the philosophy of language and metaphysics and for the sake of its significant involvement in many philosophical issues in different subjects of philosophy Having been attracted to the analytic approach I was then interested in looking at the issue both from the points of view of classical Chinese philosophy and Marxist philosophy two major styles or frameworks of doing philosophy during that time in China and from the point of view of contemporary analytic philosophy which was then less recognized in the Chinese philosophical circle

Studies in Spinoza, Critical and Interpretive Essays S. Paul Kashap,1972-01-01 [Nature's Sublime](#) Robert S. Corrington,2013-03-14 Nature s Sublime uses a radical new form of phenomenology to probe into the deepest traits of the human process in its individual social religious and aesthetic dimensions Starting with the selving process the essay describes the role of signs and symbols in intra and interpersonal communication At the heart of the human use of signs is a creative tension between religions symbols and the novel symbols created in the various arts A contrast is made between natural communities which flatten out and reject novel forms of semiosis and communities of interpretation which welcomes creative and enriched signs and symbols The normative claim is made that religious sign symbol systems have a tendency toward tribalism and violence while the various spheres of the aesthetic are comparatively non tribal or even deliberately anti tribal The concept experience of beauty and the sublime is meant to replace that of religious revelation The sublime is not merely an internal mode of attunement contra Kant but comes from the very depths of nature in the potencies of nature naturing **The Essential Dewey, Volume 1** Larry A. Hickman,Thomas M. Alexander,1998-08-22 In addition to being one

of the greatest technical philosophers of the twentieth century John Dewey 1859 1952 was an educational innovator a Progressive Era reformer and one of America s last great public intellectuals Dewey s insights into the problems of public education immigration the prospects for democratic government and the relation of religious faith to science are as fresh today as when they were first published His penetrating treatments of the nature and function of philosophy the ethical and aesthetic dimensions of life and the role of inquiry in human experience are of increasing relevance at the turn of the 21st century Based on the award winning 37 volume critical edition of Dewey s work The Essential Dewey presents for the first time a collection of Dewey s writings that is both manageable and comprehensive The volume includes essays and book chapters that exhibit Dewey s intellectual development over time the selection represents his mature thinking on every major issue to which he turned his attention Eleven part divisions cover Dewey in Context Reconstructing Philosophy Evolutionary Naturalism Pragmatic Metaphysics Habit Conduct and Language Meaning Truth and Inquiry Valuation and Ethics The Aims

Lassander,2014-08-28 Post Materialist Religion discusses the transformations of the individual s worldview in contemporary modern societies and the role general societal value change plays in these In doing so Mika Lassander brings into conversation sociological theories of secularisation and social psychological theories of interpersonal relations the development of morality and the nature of basic human values The long term decline of traditional religiosity in Europe and the emerging ethos that can be described as post secular have brought religion and values back into popular discussion One important theme in these discussions is about the links between religion and values with the most common assumption being that religions are the source of individuals values This book argues for the opposite view suggesting that religions or people s worldviews in general reflect the individual s priorities Mika Lassander argues that the transformation of the individual s worldview is a direct consequence of the social and economical changes in European societies since the Second World War He suggests that the decline of traditional religiosity is not an indication of linear secularisation or of forgetting traditions but an indication of the loss of relevance of some aspects of the traditional institutional religions Furthermore he argues that this is not an indication of the loss of ethical value base but rather a change in the value base and consequently the transformation of the legitimating framework of this value base *Pragmatist Metaphysics* Sami Pihlström,2009-07-10 Provides a novel reading of the relations between two central philosophical disciplines metaphysics and ethics from a pragmatist perspective *Genealogical Pragmatism* John J.
