**The Nature of Narrative** Robert Scholes, James Phelan, Robert Leland Kellogg, 2006-09-25 For the past forty years *The Nature of Narrative* has been an essential work for students of literature teachers writers and scholars Countering the tendency to view the novel as the paradigm case of literary narrative Robert Scholes and Robert Kellogg offered a compelling history of narrative from antiquity to the twentieth century Their main goal was to describe and analyze the nature of narrative s key elements meaning character plot and point of view The Fortieth Anniversary Edition of this groundbreaking work has been revised and expanded to include a new preface and a lengthy chapter by James Phelan on developments in narrative theory since 1966 This new material describes the principles and practices of structuralist cognitive feminist and rhetorical approaches to narrative paying special attention to their work on character plot and narrative discourse A continued leader in the field of narrative studies *The Nature of Narrative* offers unique and invaluable histories of both narrative and narrative theory

**The Nature of Narrative** Robert Scholes, Robert Kellogg, Robert Leland Kellogg, 1966 This analytical study provides a welcome balance to the critical practice of judging all narrative literature by standards appropriate only to the novel Scholes and Kellogg argue that such a narrow view obscures the real tradition of narrative literature in the Western world Examining the work of Joyce Proust Mann Lawrence Faulkner and other writers of this century they consider elements common to all narrative forms including myth folktale epic romance allegory confession and satire

**The Nature of Narrative: Revised and Expanded** Robert Scholes, James Phelan, 2014-05-14 For the past forty years *The Nature of Narrative* has been a seminal work for literary students teachers writers and scholars Countering the tendency to view the novel as the paradigm case of literary narrative authors Robert Scholes and Robert Kellogg in the original edition offered a compelling history of the genre narrative from antiquity to the twentieth century even as they carried out their main task of describing and analyzing the nature of narrative s main elements meaning character plot and point of view Their history emphasized the broad sweep of literary narrative from ancient times to the contemporary period and it included a chapter on the oral heritage of written narrative and an appendix on the interior monologue in ancient texts The fortieth anniversary edition of this groundbreaking work has been revised and expanded to include a new preface and a lengthy chapter on developments in narrative theory since 1966 by James Phelan This chapter describes the principles and practices of structuralist cognitive feminist and rhetorical approaches to narrative paying special attention to their work on plot character and narrative discourse A continued leader in the field of narrative studies *The Nature of Narrative* offers unique and invaluable histories of both narrative and narrative theory

**Nature and Narrative** Markku Lehtimäki, 2025-05-23 The book explores environmental issues in twenty first century Anglophone fiction and how those issues are dealt with by specific literary means It proposes a reciprocal relationship between nature and narrative the idea according to which nature both informs and inspires artistic creations while literary designs and rhetoric also shape our ideas and perceptions of the natural

environment It is argued that in order to address design and rhetoric in environmental texts we need a close analysis of those world shaping functions of literary narratives that unite ecocritical and narratological interests The author presents readings of contemporary novels and their varying ways of seeing nature through narrative devices and fictional minds The novels discussed in the book are Hilary Mantel's Wolf Hall Toni Morrison's A Mercy Ian McGuire's The North Water Barbara Kingsolver's The Lacuna Paul Harding's Tinkers and Enon J M Coetzee's Elizabeth Costello Ian McEwan's Solar and Jenny Offill's Weather *The Nature of Narrative* Robert E. Scholes, Robert Kellogg, 1968 **Before Literature** Sheila J. Nayar, 2019-10-08 Before Literature examines storytelling that whether due to historical technological or socio economic circumstance is neither shaped nor influenced by alphabetic literacy How does a story unfold when carried solely in memory when it cannot be written down or externally stored What structural and stylistic pressures are imposed when it must travel through space and time exclusively by word of mouth In Before Literature Sheila J Nayar addresses these very questions guiding the reader in a lively and accessible manner through the key features of storytelling that's been unaffected by writing Even more Nayar shows how the very norms that drove oral epics such as the Mahabharata and Homer's Odyssey can continue to shape contemporary forms like Bollywood masala films Hollywood spectacles and comic books This clear and accessible guide is an ideal starting point for undergraduates approaching the study of orality It offers a fundamentally different way of thinking about oral narrative while also disclosing some of the hows and whys of written literature leading to a much broader understanding and appreciation of our storytelling tradition *The Nature of Narrative* Robert E. Scholes, Robert Kellogg, 1966 The Power of Narrative Pascal Nouvel, 2025-10-06 Telling a story changes the way we think about an event and makes us understand it differently The very power of storytelling lies in this process of making understanding We give meaning to what is happening on the basis of what we have understood about what was in the past or what could be in the future The same is true when we tell our own story we give different meanings to the events of our own lives in the various accounts we give of them This process was spotted early on by the Stoic philosophers who used it in certain techniques of the self Michel Foucault that they called hupomnemata The analysis of this process is at the heart of this book which lies between philosophy literature and historical reflection How does meditating on one's history help to change one's own attitudes And what does the fact that it is possible to change oneself by looking back at oneself tell us about what man is in general Is this a universal fact or is it limited to one or a few cultures Towards a 'Natural' Narratology Monika Fludernik, 2002-11-01 In this ground breaking work of synthesis Monika Fludernik combines insights from literary theory and linguistics to provide a challenging new theory of narrative This book is both an historical survey and theoretical study with the author drawing on an enormous range of examples from the earliest oral study to contemporary experimental fiction She uses these examples to prove that recent literature far from heralding the final collapse of narrative represents the epitome of a centuries long developmental process Interpreting Nature Brian

Treanor, Martin Drenthen, David Utsler, 2013-11-11 Modern environmentalism has come to realize that many of its key concerns wilderness and nature among them are contested territory viewed differently by different people Understanding nature requires science and ecology to be sure but it also requires a sensitivity to history culture and narrative Thus understanding nature is a fundamentally hermeneutic task *The Literary Animal* Jonathan Gottschall, David Sloan Wilson, 2005-12-26 The goal of this book is to overcome some of the widespread misunderstandings about the meaning of a Darwinian approach to the human mind generally and literature specifically **The SAGE Handbook of Nature** Terry Marsden, 2018-03-23 The SAGE Handbook of Nature offers an ambitious retrospective and prospective overview of the field that aims to position Nature the environment and natural processes at the heart of interdisciplinary social sciences The three volumes are divided into the following parts INTRODUCTION TO THE HANDBOOK NATURAL AND SOCIO NATURAL VULNERABILITIES INTERWEAVING THE NATURAL SOCIAL SCIENCES SPACING NATURES SUSTAINABLE PLACE MAKING AND ADAPTATION COUPLED AND DE COUPLED SOCIO ECOLOGICAL SYSTEMS RISK AND THE ENVIRONMENT SOCIAL THEORIES PUBLIC UNDERSTANDINGS THE SCIENCE POLICY INTERFACE HUNGRY AND THIRSTY CITIES AND THEIR REGIONS CRITICAL CONSUMERISM AND ITS MANUFACTURED NATURES GENDERED NATURES AND ECO FEMINISM REPRODUCTIVE NATURES PLANTS ANIMALS AND PEOPLE NATURE CLASS AND SOCIAL INEQUALITY BIO SENSITIVITY THE ECOLOGIES OF HEALTH THE RESOURCE NEXUS AND ITS RELEVANCE SUSTAINABLE URBAN COMMUNITIES RURAL NATURES AND THEIR CO PRODUCTION This handbook is a key critical research resource for researchers and practitioners across the social sciences and their contributions to related disciplines associated with the fast developing interdisciplinary field of sustainability science **Narrative Identity and Personal Responsibility** Linda Ethell, 2010-06-28 Narrative Identity and Personal Responsibility is about why and how identifying ourselves by means of narrative makes it possible for us to be responsible morally and otherwise The book begins as an investigation into how it is that we can hold people responsible for who they are despite the fact that we have almost no control over our lives in our formative years It explains the relation between representation personal identity and self knowledge demonstrating how awareness of the vulnerability of our identity as persons is the origin of our capacity for the cathartic revision of a self identifying narrative which is the condition of moral awareness Innovative in its interdisciplinary juxtaposition of ethics moral psychology literary theory and literature Narrative Identity and Personal Responsibility develops a sophisticated and comprehensive account of human nature This book offers an intuitively satisfying and humane yet rigorous account of why and how we think of ourselves as simultaneously free and constrained by nature Its fundamental thesis the mediation of narrative representation between agent and the world suggests new answers to old problems in moral psychology such as the question of free will and responsibility With a more literary style than many philosophy texts it works through a series of interconnected problems of as much interest to a thoughtful layperson as to academic philosophers *The Book News*

*Monthly*, 1908      **Manual of the Art of Fiction** Clayton Meeker Hamilton, 1918      Network Nature Richard Coyne, 2018-04-05 How do people avoid the stresses of the digital age Urban dwellers must now turn to nature to recover restore and rebalance after the stresses brought on by relentless digital connectivity It is easy to task nature as the cure with technology as the ailment In *Network Nature* Richard Coyne challenges the definitions of both the natural and the artificial that support this time worn narrative of nature s benefits In the process he attacks the counter claim that nature must succumb to the sovereignty of digital data Covering a spectrum of issues and concepts from big data and biohacking to animality numinous spaces and the post digital he draws on the rich field of semiotics as applied to natural systems and human communication to enhance our understanding of place landscape and architecture in a digital world      **Ending the War Between Humanity and Nature** Patrick C. Lee, 2020-08-19 This book offers plausible explanations for people s puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling ourselves for centuries about humanity s place in or out of the natural world

*Environments, Natures and Social Theory* Damian White, Alan Rudy, Brian Gareau, 2017-09-16 From climate change to fossil fuel dependency from the uneven effects of natural disasters to the loss of biodiversity complex socio environmental problems indicate the urgency for cross disciplinary research into the ways in which the social the natural and the technological are ever more entangled This ground breaking text moves between environmental sociology and environmental geography political and social ecology and critical design studies to provide a definitive mapping of the state of environmental social theory in the age of the anthropocene *Environments Natures and Social Theory* provokes dialogue and confrontation between critical political economists actor network theorists neo Malthusians and environmental justice advocates It maps out the new environmental politics of hybridity moving from hybrid neo liberals to end times ecologists from post environmentalists to cyborg eco socialists White Rudy and Gareau insist on the necessity of a critical but optimistic hybrid politics arguing that a more just egalitarian democratic and sustainable anthropocene is within our grasp This will only be brought into being however by reclaiming celebrating and channeling the reconstructive potential of entangled hybrid humans as inventive hominids creative gardeners critical publics and political agents Written in an accessible style *Environments Natures and Social Theory* is an essential resource for undergraduate and postgraduate students across the social sciences      Rethinking the Environment for the Anthropocene Manuel Arias-Maldonado, Zev Trachtenberg, 2019-01-15

This book brings together the most current thinking about the Anthropocene in the field of Environmental Political Theory EPT It displays the distinctive contribution EPT makes to the task of thinking through what the environment means in this time of pervasive human influence over natural systems Across its chapters the book helps develop the idea of socionatural relations an idea that frames the environment in the Anthropocene in terms of the interconnected relationship between human beings and their surroundings Coming from both well established and newer voices in the field the chapters in the book show the diversity of points of view theorists take toward the Anthropocene idea and socionatural relations more generally However all the chapters exemplify a characteristic of work in EPT the self conscious effort to provide normative interpretations that are responsive to scientific accounts The Introduction explains the complicated interaction between science and EPT showing how it positions EPT to consider the Anthropocene And the Afterword by a pioneer in the field relates all the chapters to a perspective that has been deeply influential in EPT This book will be of interest to scholars already engaged in EPT But it will also serve as an introduction to the field for students of Political Theory Philosophy Environmental Studies and related disciplines who will learn about the EPT approach from the Introduction and then see it applied to the pressing question of the Anthropocene in the ensuing chapters The book will also help readers interested in the Anthropocene from any disciplinary perspective develop a critical understanding of its political meanings
