Environmental Law and Contrasting Ideas of Nature Keith H. Hirokawa, 2014-07-17 Law's ideas of nature appear in different doctrinal and institutional settings historical periods and political dialogues Nature underlies every behavior contract or form of wealth and in this broad sense influences every instance of market transaction or governmental intervention Recognizing that law has embedded discrete constructions of nature helps in understanding how humans value their relationship with nature This book offers a scholarly examination of the manner in which nature is constructed through law both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law's ideas of nature influence and are influenced by behaviors values and priorities Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness This book will build on the constructivist observation that when considered as a culturally contingent concept nature is a self-perpetuating and self-reinforcing social creation

Nature's Plate: Reconnecting Through Real Food Robbie Price, *Nature's Plate Reconnecting Through Real Food* is a heartfelt invitation to return to what nourishes us body and soul Blending personal stories practical guidance and the wisdom of the natural world this book explores how real unprocessed food can help us reconnect with ourselves our communities and the planet Whether you're a seasoned grower a weekend farmers market wanderer or someone simply craving a deeper relationship with what's on your plate *Nature's Plate* offers inspiration and insight for living more mindfully one meal at a time

The Accelerating Transport Innovation Revolution George Giannopoulos, John F. Munro, 2019-04-17 *The Accelerating Transport Innovation Revolution* A Global Case Study based Assessment of Current Experience Cross sectorial Effects and Socioeconomic Transformations offers a comprehensive view of current state of the art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results It offers a fascinating new model of the innovation process based on theories of biological ecosystems general systems theory and basins of attraction represented through space time graphs well known in mathematics Furthermore it considers through a number of dedicated chapters key issues and elements of innovation ecosystems such as Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems Chapter 4 Review of innovation organization and governance in key countries and regions Chapter 5 the role of technological Spillovers Chapter 6 Collection and use of data for innovation monitoring and

benchmarking Chapter 7 Intellectual Property protection between competing ecosystems Chapter 8 Economics of innovation Chapter 9 Public and private sector involvement in Transport innovation creation Chapter 10 the role of the individual entrepreneur innovator in energizing change Chapter 11 Finally in Chapter 12 there is a thorough summary of key findings This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model It therefore includes ten case studies from the U S Europe and Asia detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned It does this effectively at five different levels of analysis i e the individual innovator entrepreneur level the organization level government agency or company the regional ecosystem level the nation state level and the global systemic or international level Each level of analysis reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation especially on a revolutionary scale The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years especially in the public sector there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large scale revolutionary change as the future unfolds Thus a primary theme of the book is that understanding how research results translate into market innovation and implementation especially understanding the nature of revolutionary innovation is as important as the creation of innovations themselves While the focus of the book is on Transportation the concepts and recommendations presented apply to other fields too

The Institutional Dynamics of Culture, Volumes I and II Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory's influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences

French, Olav Slaymaker, 1993 Low temperatures wind chill snow sea ice and permafrost have been primary characteristics of Canada's northern and alpine environments during the past two million years The evolution of Canada's cultural landscapes the processes of settlement of rural areas and the present interaction of Canadian industrial society with its biophysical environment are all deeply influenced directly or indirectly by the frigidity of the greater part of the country The phenomenon of global warming if it occurs will lessen this coldness but its impact on temperature extremes sea ice regimes vegetation snow distribution permafrost glaciers lakes rivers and mountain hazards are all the subject of intensive research the highlights of which are reviewed in *Canada's Cold Environments* Eleven of Canada's leading geographers geologists and ecologists provide an authoritative yet readable scientific statement about the physical nature of Canada's coldness They focus on the distinctive attributes of Canada's cold environments their temporal and spatial variability and the constraints that coldness places on human activity The book is aimed at environmental scientists at all levels who need informed overviews of the substantive findings on a range of cold related topics

Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity Timothy G. O'Higgins, 2020 Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats providing a wide variety of benefits to human beings Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures including pollution contamination invasive species overfishing and climate change Such pressures threaten the sustainability of these ecosystems their provision of ecosystem services and ultimately human well being Ecosystem based management EBM is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision making This open access book introduces the essential concepts and principles required to implement ecosystem based management detailing tools and techniques and describing the application of these concepts and tools to a broad range of aquatic ecosystems from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta

Views into the Chinese Room John Preston, Mark Bishop, 2002-08-22 to follow **Natural Human Rights** Michael Boylan, 2014-08-11 This timely book focuses on the history application and significance of human rights in the West and in China *Pathways to a New Environmental Ethic* Steven E. Alford, 2024-07-25 We live under the threat of humanity's self

inflicted extinction While technological approaches to climate mitigation are admirable our ecological crisis results ultimately from an inherited unexamined concept of selfhood and a misconceived view of nature The received idea that our self exists inside our skull engenders an assumption that nature is out there with devastating results This book explores three new ways of thinking about the interrelation of ourselves and nature Merleau Ponty s notion of embodiment the connection between enactivism and affordances and object oriented ontology These approaches to selfhood reorder our moral obligations What are our responsibilities to ourselves our children and nature itself An embodied ethic can transcend cultural biases and offer a new way of confronting climate change To meet environmental challenges we need to change our minds about our minds
