Natures Savage Cats:

Nature's Savage Cats Alice Burdett, 1993-01-01 **Nature's Savage Cats** Alice Burdett, 1993 Pop up illustrations and text provide information about the physical characteristics behavior and habitat of the caracal tiger leopard puma cheetah and lion **Handbook of Nature Study** Anna Botsford Comstock , 2016-05-31 For decades Handbook of Nature Study has been a matchless resource for teachers naturalists and anyone curious about the world around them Originally written in 1911 and later revised by a group of naturalists in 1939 this classic work remains as valid and helpful today as it was back then Anna Botsford Comstock crafted this handbook primarily for elementary school teachers who had limited knowledge of common plants animals and the natural environment Whether you re in an urban setting or the rural outback this treasure trove of information provides insights into the living and nonliving things that surround us In Nature's Name Barbara T. Gates, 2002-04 From the late eighteenth to the early twentieth century hundreds of British women wrote about and drew from nature Some like the beloved children s author Beatrix Potter who produced natural history about hedgehogs as well as fiction about rabbits are still familiar today But others have all but disappeared from view Barbara Gates recovers these lost works and prints them alongside little known pieces by more famous authors like Potter s field notes on hedgehogs reminding us of better known stories that help set the others in context The works contained in this volume are as varied as the women who produced them They include passionate essays on the protection of animals vivid accounts of travel and adventure from the English seashore to the Indian Alps poetry and fiction and marvelous tales of nature for children Special features of the book include a detailed chronology placing each selection in its historical and literary context biographical sketches of each author s life and works a comprehensive bibliography of primary and secondary literature and over sixty illustrations An ideal introduction to women s powerful and diverse responses to the natural world In Nature s Name will be treasured by anyone interested in natural history women or Victorian and Edwardian Britain **Nature Magazine** , 1925 An illustrated monthly with popular articles about nature **A History of the earth and animated nature v.2** Oliver Goldsmith, 1852 *History of the Earth and Animated Nature ... To which is Subjoined an Appendix ... By Captain Thomas Brown, Etc* Oliver Goldsmith, 1856 *Nature's Biodiversity* Joseph Heller, 2025-06-02 This book is about our quest over the centuries from ancient Greece onwards for pattern in the rich diversity of life How did our ancestors think that living creatures first came to be each fitting so well to its specific environment Does biodiversity have a purpose What biodiversity exists beyond what our eyes can see Do dragons and unicorns exist How did the world begin how did order emerge and were there several Creation events Reproduction resembles Creation in that order appears out of nothing form out of matter Can different reproduction modes increase biodiversity Why sexual reproduction Can living creatures and hence biodiversity arise from non living dust How do embryos develop from a featureless mass into an orderly organised living body Does embryonic development dictate diversity and do species ever go extinct What is a soul Do animals have souls Do souls migrate between

man and animal Does inheritance of acquired characters create biodiversity Does diversity form an orderly ladder from plants through animals to Man or perhaps orderly circles within circles These questions and many others have been central to our culture s overall view of nature from ancient times onwards This book presenting the urge to understand overall pattern in the diversity of life throughout history takes a broad approach It links theories of classification with those of reproduction embryology theology and eventually evolution as they developed from ancient days onwards over 2400 years Over 250 illustrations accompany the text many taken from the ancient original treatises many others painted especially for this book to present specific animals or ideas This comprehensive view of the study of biodiversity will appeal to zoology lecturers and students biology teachers and amateur naturalists as well as to lecturers and learners of history of theology and of course to anybody seeking to broaden horizons
