Naval Warfare An Illustrated History:

Naval Warfare Richard Humble, 2003-04-03 Sea power has had a profound effect on the history of the world through its influence in the rise and fall of nations It is won and maintained by ships by seamen by the acceptance and use of the developing technology of the time and by prowess in battle an amalgam of human courage and leadership The despatch of the British task force to the Falklands as recently as 1982 served to highlight the continuing importance of conventional naval power even in this nuclear age This is a book about naval warfare which deals with the significant campaigns of naval history the decisive battles in those campaigns and includes biographical sketches of the principal naval leaders who directed and fought those battles These are linked together with penetrating introductions to each new era of naval evolution explaining the changes wrought in strategy and tactics by the development of new naval technology **Naval Warfare**

Anti-submarine Warfare David Owen, 2007 The author of more than twenty books on scientific and historical subjects David Owen presents an authoritative yet highly readable account of the ongoing battle between naval forces above and below the sea's surface Without question the submarine was the most potent purely naval weapon of the twentieth century yet the fact that it was usually defeated is an important part of the story described in this book With the support of nearly 200 illustrations the author examines both the successful innovations and the inevitable counter measures made by each side in their lethal struggle for supremacy Known for picking just the right incident to illustrate a point Owen fills his book with examples of individual heroism and devotion to duty along with accounts of the ingenuity originality of tactical thought and technological advances to provide a complete picture He shows clearly that development was not a straight line wrong ideas and assumptions sometimes led to defeat and disaster Concluding the book is a survey of recent ASW developments carried out by teams of scientists engineers commanders and crews of ASW aircraft ships and other submarines working together to defeat the current threat of hostile raiders who hide in the ocean depths **Naval War College Illustrated History and Guide**

Murfett, 2008-11-04 Naval Warfare 1919 45 is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources

Malcolm H Murfett has written an absorbing as well as a comprehensive reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual s performance under acute pressure and sheer luck Naval Warfare 1919 45 is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public

Elleman, S.C.M. Paine, 2007-08-23 This is the first scholarly book examining naval coalition warfare over the past two centuries from a multi national perspective Containing case studies by some of the foremost naval historians from the US Great Britain and Australia it also examines the impact of international law on coalitions Together these collected essays comprise a compr **Jellicoe's War** Nicholas Jellicoe, 2024-12-31 In February 1917 German U boats launched a savage unrestricted campaign against both Allied and neutral shipping At its peak in April 860 000 tons of Allied merchant shipping was sunk Britain s supremacy at sea was being severely challenged and with it the chances of victory in the wider war Taking up the challenge was Britain s new First Sea Lord Sir John Jellicoe until the previous December C in C of the Grand Fleet famously described by Churchill as the only man who could have lost the war in an afternoon The battle he now faced was equally critical although the timeline of defeat was a matter of days rather than hours Britain s food stocks were dangerously low with wheat reserves down to six weeks and sugar to only two while wide scale shortages were crippling the industrial economy Jellicoe outlined the gravity of the situation with total candor to Rear Admiral William Sims USN sent over before America officially declared war by Franklin Roosevelt the Assistant Secretary of the Navy The two men already knew each other from service together in China during the Boxer Rebellion so Jellicoe s plea for urgent American assistance was taken seriously by Sims After the USA joined the war in April 1917 together they lobbied Washington for aid addressing their needs directly to two reluctant Anglophobes at the head of the USN Secretary of the Navy Josephus Daniels and Chief of Naval Operations William Benson Clearly a radical new approach to anti submarine warfare was called for and Convoy was the leading contender There were many objections to protecting shipping in this way some ideological but most practical a workable system for example effectively required state control of both shipping and distribution networks something inconceivable in normal circumstances However Convoy had powerful advocates including the Prime Minister Lloyd George who later claimed he had personally forced its adoption on a reluctant Admiralty This self serving political myth cast Jellicoe as an opponent of Convoy nothing could be further from the truth As both Jellicoe and Sims understood the key requirement was a rapid increase in the number of destroyers for escort duties America provided them the first arriving in Queenstown Ireland on 4 May and by June 46 were operating in European waters This was the first step in an Anglo American campaign that gradually brought the U boat threat under control and led to its ultimate defeat This book takes a fresh look at the undersea war as a whole and all the complex factors

bearing on the campaign only one of which was convoy Its analysis is original and its conclusions thought provoking an important contribution to the naval history of the Great War **The Dynamics of Coalition Naval Warfare** Steven Paget, 2017-09-22 This book examines the dynamics of coalition naval operations Since the end of the Second World War few nations possess the capacity for large scale sustained and independent naval operations and even those that do such as the USA often find it economically militarily and politically expedient to act multilaterally As such coalition naval operations increasingly became the norm throughout the twentieth century and there is little sign of this abating in the twenty first Multinational operations provide a number of benefits but they also present a number of challenges Examining the dynamics of coalition operations involving the Royal Navy RN Royal Australian Navy RAN and the United States Navy USN during the Korean War Vietnam War and the Iraq War this book provides a broad overview of naval interoperability between the three navies Using the naval gunfire support NGS capability as a lens through which to analyse operations the study explores a diverse range of issues including command and control communications equipment standardisation intelligence logistics planning rules of engagement tactics techniques and procedures and training Approaching the subject through both historical and contemporary perspectives not only provides a unique assessment of the variation in the effectiveness of interoperability over time but also offers a platform for better understanding and enhancing the performance of future coalition naval operations Based on extensive archival research in Australia the UK and the US as well as wide ranging interviews this book sheds new light on the dynamics of conducting coalition operations This book will be of great interest to students of naval history strategic studies sea power maritime security military studies and IR in general
