Naval Firepower:

Naval Firepower Norman Friedman, 2013-08-20 For more than half a century the big gun was the arbiter of naval power but it was useless if it could not hit the target fast and hard enough to prevent the enemy doing the same Because the naval gun platform was itself in motion finding a firing solution was a significant problem made all the more difficult when gun sizes increased and fighting ranges lengthened and seemingly minor issues like wind velocity had to be factored in To speed up the process and eliminate human error navies sought a reliable mechanical calculation This heavily illustrated book outlines for the first time in layman s terms the complex subject of fire control as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era Covering the directors range finders and electro mechanical computers invented to solve the problems America s leading naval analyst explains not only how the technology shaped and was shaped by the tactics involved but analyses their effectiveness in battle His examination of the controversy surrounding Jutland and the relative merits of competing fire control systems draws conclusions that will surprise many readers He also reassesses many other major gun actions such as the battles between the Royal Navy and the Bismarck and the US Navy actions in the Solomons and at Surigao Strait All major navies are covered and the story concludes at the end of World War II with the impact of radar This is a book that everyone with a more than passing interest in twentieth century warships will want to read and nobody professionally involved with naval history can afford to miss **United States Government**

British Dreadnought vs German Dreadnought Mark Stille, 2012-01-20 A fascinating look at how naval design was revolutionized in the early years of the 20th century and how the rival designs were put to the ultimate test at the battle of Jutland in 1916 In 1916 in the seas near Jutland two fleets of armoured dreadnoughts met in open battle This book tells the

story of the British and German battleships of these two great fleets from their development as the first generation of fully armoured warships to their combat experiences The differing weapon systems and crew training of the British and German fleets are examined in detail as is the titanic struggle of Jutland through an hour by hour shot by shot reconstruction Finally it analyzes the outcome of the struggle explaining the successes and failures of these great battleships

USN Battleship vs IJN Battleship Mark Stille,2017-11-30 In the build up to World War II both the United States and Japan believed their battleships would play a central role in battle but after the Pacific War began in December 1941 the role of the battleship proved to be much more limited than either side expected There would be only two battleship vs battleship actions in the Pacific in World War II both of which are assessed in this engaging study At Guadalcanal in 1942 Kirishima faced two modern US battleships USS Washington and USS South Dakota In the Surigao Strait in 1944 two World War I era Japanese battleships Yamashiro and Fuso faced six American battleships supported by four heavy cruisers in history's last ever clash between battleships Employing full colour artwork carefully selected archive photographs and expert analysis former US Navy Commander Mark E Stille examines the two head to head clashes between the battleships deployed by the United States and Japan in the struggle for control of the Pacific during World War II

US Navy Light Cruisers 1941-45 Mark Stille,2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy antiaircraft weaponry as well as the traditional 6in guns With the speed and range to keep up with aircraft carriers and their considerable antiaircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond

The Kaiser's Battlefleet Aidan Dodson,2016-11-30 This illustrated study of the German Imperial Navy presents a ship by ship history from the dreadnaught era through WWI The battleships of the Third Reich have been written about exhaustively but there is little in English devoted to their predecessors of the Second Reich In The Kaiser's Battlefleet Aidan Dodson fills this significant gap in German naval history by covering these capital ships and studying the full span of battleship development during this period Kaiser's Battlefleet presents a chronological narrative that features technical details construction schedules and the ultimate fates of each ship tabulated throughout With a broad synthesis of German archival research Dodson provides fresh data and corrects significant errors found in standard English language texts Heavily illustrated with line work and photographs drawn from German sources this study will appeal to historians of WWI German as well as battleship modelmakers

US Standard-type Battleships 1941-45 (2) Mark Stille,2015-12-20 This book completes an authoritative two part study on the Standard type US battleships of World War II ships that were designed to fight a different type of war than the one that unfolded It gives precise technical details of the design history and features of the Tennessee Colorado and the unfinished South Dakota and Lexington classes whilst providing an operational history of the former two Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations this is the other half of the story of the US Standard type battleships from the terrible damage they sustained at Pearl Harbor to their support of the war winning landings of the US Marine Corps and US Army *Italian Battleships of World War II* Mark Stille,2011-08-20 Italy s navy the Regia Marina was the fourth largest naval force in the world at the outbreak of World War II and yet is often overlooked and largely discounted as ineffective In general the fleet was made up of obsolete vessels lacked radar functionality and had a reputation for indiscipline and poorly trained crews The complex and bureaucratic command system imposed on the fleet further hampered its effectiveness In this book Mark Stille details why the Italian battleships were able to maintain a solid reputation examining their impressive designs and the courage and determination of the fleet at Calabria Sirte Cape Spartiveto and Cape Matapan all illustrated with stunning photographs from the Italian Navy s own archives
