Naval Policy And Strategy In The Mediterranean:

Naval Policy and Strategy in the Mediterranean John B. Hattendorf, 2013-11-05 Maritime strategy and naval power in the Mediterranean touches on migration the environment technology economic power international politics and law as well as calculations of naval strength and diplomatic manoeuvre These broad and fundamental themes are explored in this volume

Maritime Diplomacy in the 21st Century Christian Le Mièrre, 2014-04-24 This book aims to redefine maritime diplomacy for the modern era Maritime diplomacy encompasses a spectrum of activities from co operative measures such as port visits exercises and humanitarian assistance to persuasive deployment and coercion It is an activity no longer confined to just navies but in the modern era is pursued by coast guards civilian vessels and non state groups As states such as China and India develop they are increasingly using this most flexible form of soft and hard power Maritime Diplomacy in the 21st Century describes and analyses the concept of maritime diplomacy which has been largely neglected in academic literature The use of such diplomacy can be interesting not just for the parochial effects of any activity but because any event can reflect changes in the international order while acting as an excellent gauge for the existence and severity of international tension Further maritime diplomacy can act as a valve through which any tension can be released without resort to conflict Written in an accessible but authoritative style this book describes the continued use of coercion outside of war by navies while also situating it more clearly within the various roles and effects that maritime forces have in peacetime This book will be of much interest to students of seapower naval history strategic studies diplomacy and international relations

Sea Power and the Asia-Pacific Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region

Navies of South-East Asia James Goldrick, Jack McCaffrie, 2013 A comprehensive survey of the development and operations of the navies of South East Asia since the end of the Second World War from p 1

The Royal Navy and Maritime Power in the Twentieth Century Ian Speller, 2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy Individual chapters focus on campaigns and operations from both World Wars and a series of post 1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s Each case study demonstrates critical features of maritime power including operations during the transition to war fleet operations in narrow seas logistics submarine operations the impact of air power on maritime operations blockade maritime power projection amphibious warfare jurisdictional disputes and the law of the sea and peace support operations The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy The book combines an authoritative examination of

critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power As such it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians military professionals and the general reader

The Royal Navy, 1930-2000 Richard Harding, 2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990

The Merchant Marine in International Affairs, 1850-1950 Greg Kennedy, 2014-07-10 Merchant navies represent economic and industrial strength This study revises the definition of maritime power through a more comprehensive understanding and appreciation for the roles played by the merchant marine of a nation

The Royal Navy and Anti-submarine Warfare, 1917-49 Malcolm Llewellyn-Jones, 2006 An essential new account of how anti submarine warfare is conducted with a focus on both historic and present day operations This new book shows how until 1944 U boats operated as submersible torpedo craft which relied heavily on the surface for movement and charging their batteries This pattern was repeated in WWII until Allied anti submarine countermeasures had forced the Germans to modify their existing U boats with the schnorkel Countermeasures along also pushed the development of high speed U boats capable of continuously submerged operations This study shows how these improved submarines became benchmark of the post war Russian submarine challenge Royal Navy doctrine was developed by professional anti submarine officers and based on the well tried combination of defensive and offensive anti submarine measures that had stood the press of time since 1917 notwithstanding considerable technological change This consistent and holistic view of anti submarine warfare has not been understood by most of the subsequent historians of these anti submarine campaigns and this book provides an essential and new insight into how Cold War and indeed modern anti submarine warfare is conducted

The Secret War Against Sweden Ola Tunander, 2004 Ola Tunander s revelations make it clear that the United States and Britain ran a secret war in Swedish waters

The Royal Navy 1930-1990 Richard Harding, 2004-11-25 This new book explores innovation within the Royal Navy from the financial constraints of the 1930s to World War Two the Cold War and the refocusing of the Royal Navy after 1990 Successful adaptation to new conditions has been critical to all navies at all times

[The Hamburg Lectures on Maritime Affairs 2009 & 2010](#) Jürgen Basedow, Ulrich Magnus, Rüdiger Wolfrum, 2012-03-31 In 2007 the International Max Planck Research School for Maritime Affairs together with the International Tribunal for the Law of the Sea ITLOS both based in Hamburg decided to establish an annual lecture series the Hamburg Lectures on Maritime Affairs giving distinguished scholars and practitioners the opportunity to present and discuss recent developments in this field The present volume the second in the series collects eight of the lectures held in 2009 and 2010 by David Joseph Attard Lucius Caflisch Beate Czerwenka Lars Gorton Francesco Munari Kyriaki Nouria Peter Wetterstein and Wolfgang Wurmnest

Twenty-First Century Seapower Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime

order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general

Operation C3 John Burt, 2023-05-04 Burt offers an account of how an invasion might have unfolded and its consequences by drawing on parallel events at other times and places Definitely worth a read The NYMAS Review When writing his memoirs after World War II German Generalfeldmarschall Albert Kesselring stated Italy's missing her chance to occupy the island of Malta at the start of hostilities will go down in history as a fundamental blunder It's easy to see why this tiny 95 square mile island held such a prominent place in the war's Mediterranean Theater Located almost halfway between the British bases of Gibraltar and Alexandria Egypt and just 60 miles south of Sicily her airfields and naval base stood directly in the path of Italy's and her German partner's line of communication from Europe to North Africa Operation C3 is a detailed study of the Axis 1942 plan to invade and take the island of Malta The book examines the future combatants up to the Axis capture of Tobruk in June 1942 The book then provides a realistic assessment of what would have had to happen if the Axis had decided to launch the invasion Operation C3 then provides a day by day battle narrative of the invasion as if it had occurred on Saturday August 15 1942 The battle narrative is based on the combatant's actual plans from the Italian and Maltese archives and the realistic appraisal of what could have happened when those plans collide A Reality Analysis section is added after the battle narrative to discuss what really happened after Tobruk fell and why Operation C3 was never attempted

Navies in Northern Waters Rolf Hobson, TOM KRISTIANSEN, 2004-08-02 *Navies in Northern Waters* is a collection of articles covering the roles played by the secondary navies of northern European powers and the United States within the maritime balance of power The contributions covering the 18th and 19th centuries focus on their relations with each other as they sought to create a counterweight to the dominant naval power of Britain The inter war years are treated from the perspectives of international disarmament efforts within the framework of collective security and the subsequent naval rivalry in the Baltic area in the years leading up to the Second World War For the post 1945 period the contributions concentrate on superpower rivalry in northern waters during the Cold War the changing aspects of security policy since the collapse of the Soviet Union and the particular challenges facing small coastal states policing extensive waters of increasing economic importance

The Merchant Marine in International Affairs, 1850-1950 S W Field, K G Swift, 2014-02-25 Providing an understanding of what is

meant by quality and its unique position in a manufacturing environment to improve competitive business performance this text defines all the fundamental ingredients required to introduce an improvement in quality Concise and easy to read the theory is backed up by numerous industrial experiences illustrating the practical obstacles when implementing any quality change Focusing on the essentials of quality strategies principles and techniques designing for quality is also discussed and new techniques for assessing the risks and costs of non conformance are introduced The result is an insight to quality engineering that will prove invaluable to engineering students and professionals Seapower Geoffrey Till,2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till s study is an exploration of how change will impact upon the world s navies The Oxford Handbook of World War II G. Kurt Piehler,Jonathan A. Grant,2023 World War II dramatically transformed human life and society resulting in the deaths of 100 million people and shaping the worldview and psyches of generations The Oxford Handbook of World War II broadens traditional narratives of the war and in the process changes our understanding of this epic conflict Spanning the rise and fall of the Versailles system to the postwar reintegration of veterans and the eventual commemoration of the conflict and its victims The Oxford Handbook of World War II marks a landmark contribution to the historical literature of war **Britain's Anti-submarine Capability 1919-1939** George Franklin,2004-08-02 This book traces the evolution of all the various parts of Britain s anti submarine capability and examines the development of the specialist anti submarine and submarine detector branches **Imperial Defence, 1868-1887** John Beeler,2014-02-25 The technical transformation of the Royal Navy during the Victorian era posed many design tactical and operational problems for administrators from the 1830s onwards The switch from sail to steam required the creation of a system of defended coaling stations and a greater infrastructure Oil and the Great Powers Anand Toprani,2019-04-04 The history of oil is a chapter in the story of Europe s geopolitical decline in the twentieth century During the era of the two world wars a lack of oil constrained Britain and Germany from exerting their considerable economic and military power independently Both nations efforts to restore the independence they had enjoyed during the Age of Coal backfired by inducing strategic over extension which served only to hasten their demise as great powers Having fought World War I with oil imported from the United States Britain was determined to avoid relying upon another great power for its energy needs ever again Even before the Great War had ended Whitehall implemented a strategy of developing alternative sources of oil under British control Britain s key supplier would be the Middle East already a region of vital importance to the British Empire whose oil potential was still unproven As it turned out there was plenty of oil in the Middle East but Italian hostility after 1935 threatened transit through the Mediterranean A shortage of tankers ruled out re routing shipments around Africa forcing Britain to import oil from US controlled sources in the Western Hemisphere and depleting its foreign exchange reserves Even as war loomed in 1939 therefore Britain s quest for independence from the United States had failed Germany was in an even worse position than Britain It could not import oil from overseas in wartime

due to the threat of blockade while accumulating large stockpiles was impossible because of the economic and financial costs. The Third Reich went to war dependent on petroleum synthesized from coal, domestic crude oil, and overland imports primarily from Romania. German leaders were confident, however, that they had enough oil to fight a series of short campaigns that would deliver to them the mastery of Europe. This plan derailed following the victory over France when Britain continued to fight. This left Germany responsible for Europe's oil requirements while cut off from world markets. A looming energy crisis in Axis Europe, the absence of strategic alternatives, and ideological imperatives all compelled Germany in June 1941 to invade the Soviet Union and fulfill the Third Reich's ultimate ambition of becoming a world power, a decision that ultimately sealed its fate.
