Resilience in Social-Ecological Systems Marianne E. Krasny, Cecilia Lundholm, Ryan Plummer, 2013-10-18 Resilience thinking challenges us to reconsider the meaning of sustainability in a world that must constantly adapt in the face of gradual and at times catastrophic change This volume further asks environmental education and resource management scholars to consider the relationship of environmental learning and behaviours to attributes of resilient social ecological systems attributes such as ecosystem services innovative governance structures biological and cultural diversity and social capital Similar to current approaches to environmental education and education for sustainable development resilience scholarship integrates social and ecological perspectives The authors of Resilience in social ecological systems the role of learning and education present a wealth of perspectives integrating theory with reviews of empirical studies in natural resource management and in youth adult and higher education The authors explore the role of education and learning in helping social ecological systems as they respond to change through adaptation and transformation This book also serves to integrate a growing literature on resilience and social learning in natural resources management with research in environmental education and education for sustainable development This book was originally published as a special issue of Environmental Education Research

Green Utopianism Karin Bradley, Johan Hedrén, 2014-03-21 Utopian thought and experimental approaches to societal organization have been rare in the last decades of planning and politics

Instead there is a widespread belief in ecological modernization that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco labeling urban densification and recycling. However in the context of the current crisis in which resource depletion climate change uneven development and economic instability are seen as interlinked this belief is increasingly being questioned and alternative developmental paths sought. This collection demonstrates how utopian thought can be used in a contemporary context as critique and in exploring desired futures. The book includes theoretical perspectives on changing global socio environmental relationships and political struggles for alternative development paths and analyzes micro level practices in co housing alternative energy provision use of green space transportation co production of urban space peer to peer production and consumption and alternative economies. It contributes research perspectives on contemporary green utopian practices and strategies combining theoretical and empirical analyses to spark discussions of possible futures.

Adaptive Co-Management Derek Armitage, Fikret Berkes, Nancy Doubleday, 2010-10-01 In Canada and around the world governments are shifting away from regulatory models for governing natural and cultural resources. New concerns with adaptive processes feedback learning and flexible partnerships are reshaping environmental governance. Meanwhile ideas about collaboration and learning are converging around the idea of adaptive co management. This book provides a comprehensive synthesis of the core concepts strategies and tools in this emerging field informed by a diverse group of researchers and practitioners with over two decades of experience. It also offers a diverse set of case studies that reveal the challenges and implications of adaptive co management thinking and synthesizes lessons for natural and cultural resource governance in a wide range of contexts. Adaptive Co Management is not only a timely book but also a useful concept for resource governance in a world marked by rapid socio ecological change. It will be of interest to researchers environmental practitioners policy makers and students in fields across the political and environmental spectrum.
