Navigating Through Turbulence Washington Institute for Near East Policy. Presidential Study Group, 2001

America's Challenges in an Unstable World Frances K. Scott, 2002 Checking Iran's Nuclear Ambitions Henry D.

Sokolski, Patrick Clawson, Considering the latest Iranian nuclear developments one might question whether a study now on how best to restrain Tehran is simply one that's come too late. To be sure estimates vary as to when Iran could build its first bomb. Some believe Tehran could do it before the end of 2005 others think Iran would only be able to do so by the end of the decade. In either case though the die seems cast. If Iran wants it has all that it needs eventually to build a bomb on its own. Certainly trying to deny Iran further nuclear technology in the hopes that this will prevent it from getting nuclear weapons is no longer a credible strategy. The questions this edited volume addresses are whether or not any strategy can prevent Iran from going nuclear what the proper goals of such a strategy might be deterring use keeping Tehran from deploying weapons getting it to dismantle its nuclear program etc and what other nonproliferation goals ought to be attempted including trying to dissuade other nations from following Iran's example. The answers this volume offers are 1 in the long run Iran will gain little from going nuclear and 2 much can be gained by enforcing the nonproliferation rules Iran agreed to and spelling out the costs to Iran of its continuing acquisition of nuclear weapons related capabilities. *Getting Ready for a Nuclear-ready Iran* Henry D. Sokolski, Patrick Clawson, 2005 *War Peace and Hegemony in A Globalized World* Chandra Chari, 2010 This book focuses on how the US could adapt its foreign policy initiatives to fit in with the growing aspirations of a multipolar world for a more balanced international order. Written by leading scholars such as Joseph Nye Eric Hobsbawm and Akira Iriye the volume examines if the absence of a superpower status would lead to anarchy or if an alternative is possible. In view of the globalization process and the changing perceptions of US hegemony in the various regions of the world it addresses the possibility of re-examining and redefining the nineteenth century classical balance of power. Divided into two sections it analyzes global perspectives on war peace and hegemony and the role of the United States each region of the world in the context of the unfolding processes of globalization the various ways in which economic and socio-political organizations are impacting inter and intra regionally and the role of the United States vis-à-vis the individual countries and regions. **Getting Ready for Nuclear-Ready Iran**, 2005 Little more than a year ago the Nonproliferation Policy Education Center NPEC completed its initial analysis of Iran's nuclear program. *Checking Iran's Nuclear Ambitions*. Since then Tehran's nuclear activities and public diplomacy have only affirmed what this analysis first suggested. Iran is not about to give up its effort to make nuclear fuel and thereby come within days of acquiring a nuclear bomb. Iran's continued pursuit of uranium enrichment and plutonium recycling puts a premium on asking what a more confident nuclear-ready Iran might confront us with and what we might do now to hedge against these threats. These questions are the focus of this volume. The book is divided into four parts. The first presents the findings of the NPEC's working group on Iran. It reflects interviews with government officials

and outside specialists and the work of some 20 regional security experts whom NPEC convened in Washington to discuss the commissioned research that is contained in this book Some of this report's findings to keep Iran and others from overtly deploying nuclear weapons or leaving the Nuclear Nonproliferation Treaty NPT are beginning to gain official support The U S Government the International Atomic Energy Agency IAEA and an increasing number of allies now support the idea that states that violate the NPT be held accountable for their transgressions even if they should withdraw from the treaty There also has been increased internal governmental discussion about the need to clarify what should be permitted under the rubric of peaceful nuclear energy as delineated under the NPT The remaining report recommendations which were presented in testimony before Congress in March of 2005 remain to be acted upon European Union Policy towards the Arab-Israeli Peace Process C. Musu, 2010-02-12 What are the achievements the limits and the failures of the EU's involvement in the Arab Israeli conflict This book sets out to answer this question by analysing the development of European policy towards the conflict over the last forty years **The Palestinians** Cheryl Rubenberg, 2003 A forceful penetrating critique of the Oslo Accords and their devastating aftermath **Special Bibliography Series**, 1957 Communicating Globally Wallace V. Schmidt, 2007-02-13 Communicating Globally Intercultural Communication and International Business provides students with a cultural general awareness of diverse world views valuable insights on understanding and overcoming cultural differences and a clear path to international business success This text integrates the theory and skills of intercultural communication with the practices of multinational organizations and international business The book discusses the implications of these approaches and the new competencies needed for conducting international business and entering the world marketplace It examines intercultural transitions and cross cultural relationships as well as how virtual groups or teams and constant change influence multinational organizations Communicating Globally Intercultural Communication and International Business provides further insights into doing business abroad by examining significant geographic regions and emphasizing cultural themes and patterns business conduct and characteristics and emerging trends Also included is a regional resource guide that establishes a sensible foundation for readers to continue their own cross cultural or international business research personally transforming their understanding into individually instructive significance Kashmir in the Shadow of War Robert G. Wirsing, 2016-09-16 This timely study examines the Indian Pakistani conflict over Kashmir as this long standing confrontation between regional rivals became inflamed It focuses on the period from the effective nuclearization of the dispute in 1998 to the introduction of U S troops into the region in connection with the war in Afghanistan Four chapters take on key problems illustrated by this case Regional rivalry Intervention Religious conflicts Conflict resolution The author is an advocate of international intervention in regional conflicts and does not think that leaving the contesting parties to settle their dispute a sort of benign neglect is a responsible U S policy Checking Iran's Nuclear Ambitions Henry D. Sokolski, Patrick Clawson, 2004 Were Iran to acquire nuclear weapons there is a grave risk it would be tempted to provide

them to terrorists After all mass casualty terrorism done by proxies has worked well for Iran to date The fear about what Iran might do with nuclear weapons is fed by the concern that Tehran has no clear reason to be pursuing nuclear weapons The strategic rationale for Iran's nuclear program is by no means obvious Unlike proliferators such as Israel or Pakistan Iran faces no historic enemy who would welcome an opportunity to wipe the state off the face of the earth Iran is encircled by troubled neighbors but nuclear weapons does nothing to help counter the threats that could come from state collapse in Afghanistan Pakistan Iraq or Azerbaijan Achieving trans Atlantic consensus on how to respond to Iran's nuclear program will be difficult This is a remarkably bad time for the international community to face the Iran nuclear problem because the tensions about the Iraq WMD issue still poison relations and weaken U S ability to respond Nevertheless Iran's nuclear program poses a stark challenge to the international nonproliferation regime There is no doubt that Iran is developing worrisome capabilities If the world community led by Western countries is unable to prevent Iranian proliferation then it is unclear that there is much meaning to global nonproliferation norms Iran's nuclear program raises stark shortcomings with the global nonproliferation norms The basic deal behind the Treaty on the Non Proliferation of Nuclear Weapons NPT is that countries are allowed to acquire a wide range of troubling capabilities in return for being open and transparent The NPT gives Iran every right to have a full closed fuel cycle with large uranium enrichment facilities and a reprocessing plant that can extract substantial amounts of plutonium capabilities which would permit Iran at any time to rapidly break out of the NPT building a considerable number of nuclear weapons in a short time Had Iran been fully transparent about its nuclear activities then even if Iran had gone so far as to operate a full closed fuel cycle the international community would have been split deeply about how to react It is fortunate indeed that Iran decided to cheat on its NPT obligations by hiding some of what is doing because that has made much easier the construction of an international consensus that Iran's nuclear program is troubling But the experience with Iran should lead to reflection about whether the basic NPT deal needs to be revisited
