**Myth of the Nation and Vision of Revolution** Jacob L. Talmon,2017-09-29 In what may well rank as the finest political and intellectual history of the twentieth century the late J L Talmon explores the origins of the schism within European society between the totalitarians of Right and Left as well as the split between an acceptance of the historical national community as the natural political and social framework and the vision of a socialist society achieved by a universal revolutionary breakthrough This the third and final volume of Talmon s history of the modern world brings to bear the resources of his incisive scholarship to examine the workings of the ironies of totalitarianism as well as the resources of democracy *Twentieth-Century Germany: From Bismarck to Brandt* A.J. Ryder,1973-06-18 *The Nazi Revolution: Germany's Guilt Or ,* **The Quest for a United Germany** Ferenc A. Váli,2019-12-01 Originally published in 1967 The ramifications of the German problem and its intricate nature make its comprehensive presentation within the limits of a manageable volume a matter of painful selection and difficult apportionment Populists and Patricians (Routledge Revivals) David Blackbourn,2014-06-17 First published in 1987 this collection of essays from one of the leading historians in the field is concerned with the central debates about German history from Bismarck to Hitler David Blackbourn questions many previously held assumptions whether about the natural conservatism of the German peasantry of the feudalization of the middle classes and offers an innovative approach to such subjects as liberalism anti semitism and the continuing importance of religion in German history Bringing together social economic cultural and political history each essay is concerned with the social and political flux that characterized the period and with the problems and opportunities it presented This reissue will be of great value to any students and academics with an interest in the history of modern Germany The Coming of the Third Reich Richard J. Evans,2005-01-25 The definitive account of Hitler s rise to power and the collapse of civilization in Nazi Germany from the author of *The Third Reich in Power* *The Third Reich at War* and *Hitler s People* The clearest and most gripping account I ve read of German life before and during the rise of the Nazis A S Byatt *Times Literary Supplement* Impressive in its command of an immense literature perceptive in analysis fluent in style and humane in judgment this work could only have been produced by a master historian Sir Ian Kershaw Brilliant Richard Cohen *The Washington Post* There is no story in twentieth century history more important to understand than Hitler s rise to power

and the collapse of civilization in Nazi Germany With *The Coming of the Third Reich* Richard J Evans one of the world's most distinguished historians has written the definitive account for our time A masterful synthesis of a vast body of scholarly work integrated with important new research and interpretations Evans's history restores drama and contingency to the rise to power of Hitler and the Nazis even as it shows how ready Germany was by the early 1930s for such a takeover to occur *The Coming of the Third Reich* is a masterwork of the historian's art and the book by which all others on the subject will be judged

**The Oxford History of Historical Writing** Axel Schneider, Daniel Woolf, 2011-05-05 The fifth volume of *The Oxford History of Historical Writing* offers essays by leading scholars on the writing of history globally since 1945 Divided into two parts part one selects and surveys theoretical and interdisciplinary approaches to history and part two examines select national and regional historiographies throughout the world It aims at once to provide an authoritative survey of the field and to provoke cross cultural comparisons This is chronologically the last of five volumes in a series that explores representations of the past across the globe from the beginning of writing to the present day

**Nazi History and the Holocaust**, 1999 **Disciplining Germany** Jaimey Fisher, 2007-06-20 A look at how the discussions debates and controversies in Germany about youth and reeducation after World War II helped Germans come to terms with their Nazi past negotiate Allied occupation and construct postwar German identity During Hitler's reign the Nazis deliberately developed and exploited a youthful image and used youth to define their political and social hierarchies After the war with Hitler gone but still requiring cultural exorcism many intellectuals authors and filmmakers turned to these images of youth to navigate and negotiate the most difficult questions of Germany's recent nefarious past Focusing on youth education and crime allowed postwar Germans to claim one last realm of sovereignty against the Allies own emphatic project of reeducation Youth reeducation and reconstruction became important sites for the occupied to confront not only the recent past but to negotiate the present occupation and ultimately direct the future of the German nation *Disciplining Germany* analyzes a variety of media including literature news media intellectual history and films in order to argue that youth and education played a central role in Germany's coming to terms with the Nazi past Although there has been a recently renewed interest in Germany's coming to terms with the past this attention has largely ignored the role of youth and reeducation This lacuna is particularly perplexing given that the Allies reeducation project became in many ways a cipher for the occupational project as a whole *Disciplining Germany* opens up the discussion and points toward more general conclusions not only about youth and education as sites for wider socio political and cultural debates but also about the complexities of occupation and the intertwining of different national cultures In this investigation the study attends to both high and low cultural text to specialized versus popular texts to examine how youth was mobilized across the generic spectrum With these interdisciplinary approaches and timely interventions *Disciplining Germany* will find a diverse readership including upper division and graduate courses in German studies and German history as well as those general readers interested in Nazi

Germany cultural history film and literary studies youth culture American studies and post conflict and occupational situations     The Oxford History of Historical Writing Daniel R. Woolf, Andrew Feldherr, Grant Hardy, 2011-05-05 A chronological scholarly survey of the history of historical writing in five volumes Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world     **Justifying Historical Descriptions** C. Behan McCullagh, 1984-10-25 In common with history all the social sciences crucially rely on descriptions of the past for their evidence But when if ever is it reasonable to regard such descriptions as true This book attempts to establish the conditions that warrant belief in historical descriptions It does so in a non technical way analysing numerous illustrations of the different kinds of argument about the past employed by historians and others The author concludes that no historical description can be finally proved and that we are only ever justified in believing them for certain practical purposes This central question has not been addressed in such a thorough and systematic manner before It draws on recent philosophy of history and will interest philosophers But the wealth of material and accessibility of the presentation will also make it very valuable for historians and other social scientists concerned with the logic of their disciplines     **Contemporary Jewish Reality in Germany and Its Reflection in Film** Claudia Simone Dorchain, Felice Naomi Wonnemberg, 2012-12-06 The notion of self and other and its representation in artwork and literature is an important theme in current cultural sciences as well as in our everyday life in contemporary Western societies Moreover the concept of self and other and its imaginary dichotomy is gaining more and more political impact in a world of resurfacing ideology ridden conflicts The essays deal with Jewish reality in contemporary Germany and its reflection in movies from the special point of view of cultural sciences political sciences and religious studies This anthology presents challengingly new insights into topics rarely covered such as youth culture or humor and finally discusses the images of Jewish life as realities still to be constructed     **Paths of Continuity** Hartmut Lehmann, James Van Horn Melton, 2003-01-30 The defeat of National Socialism in 1945 was a pivotal point in Central European history For the writing and practice of history however the event proved far less decisive In West Germany and Austria most historians who had taught under the Nazis retained their positions after 1945 Even those dismissed for their National Socialist sympathies were often able to resume their careers And an entire generation of younger historians trained during the Nazi years was to enter the historical profession after 1945 Paths of Continuity examines the effect of this professional continuity on West German historical scholarship and the impact of the Third Reich on the way German language historians practiced their craft The essays look at ten prominent German and Austrian historians whose lives and work spanned the period before and after 1945 Friedrich Meinecke Gerhard Ritter Hans Rothfels Franz Schnabel Heinrich Ritter von Srbik Hans Freyer Hermann Aubin Otto Brunner Werner Conze and Theodor Schieder All responded to the Nazi regime in different ways Some willingly embraced the New Order of National Socialism others kept their distance from the regime or openly opposed it Ironically however those who were least compromised by Nazi

involvements and who emerged after 1945 with the greatest moral and professional authority often proved the most resistant to change within the discipline Conversely much of the impetus for scholarly innovation after 1945 came from historians with earlier ties to the anti liberal folk history of the Nazi era Exploring these and other paradoxes this collection of essays provides fresh insight into the development of German historical scholarship since 1945     **On the Holocaust** ,1978     In the Shadow of Catastrophe Anson Rabinbach,2023-04-28 These essays by eminent European intellectual and cultural historian Anson Rabinbach address the writings of key figures in twentieth century German philosophy Rabinbach explores their ideas in relation to the two world wars and the horrors facing Europe at that time Analyzing the work of Benjamin and Bloch he suggests their indebtedness to the traditions of Jewish messianism In a discussion of Hugo Ball s little known Critique of the German Intelligentsia Rabinbach reveals the curious intellectual career of the Dadaist and antiwar activist turned nationalist and anti Semite His examination of Heidegger s Letter on Humanism and Jaspers s The Question of German Guilt illuminates the complex and often obscure political referents of these texts Turning to Horkheimer and Adorno s Dialectic of Enlightenment Rabinbach offers an arresting new interpretation of this central text of the critical theory of the Frankfurt School Subtly and persuasively argued his book will become an indispensable reference point for all concerned with twentieth century German history and thought This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997 These essays by eminent European intellectual and cultural historian Anson Rabinbach address the writings of key figures in twentieth century German philosophy Rabinbach explores their ideas in relation to the two world wars and the horrors facing Europe
