uncertainties in carbon and temperature dynamics and damage functions and the role of future green technologies on policy design Michael Kremer Jack Willis and Yang You present new evidence suggesting a steady trend toward income convergence across countries since the late 1980s They find convergence in various determinants of economic growth across countries and a flattening of the relationship between growth and these determinants The paper challenges theories of growth arising after earlier rejections of the neoclassical growth model      **NBER Macroeconomics Annual 1995** Ben S.
