civilizations in history In each case the ecological and economic background to growth geographical factors cross cultural intersection and the rise of urbanism are examined explaining how particular forms of social structure and cultural interaction developed from before the Neolithic period to the time of the first civilizations in each area This volume challenges the traditional assumption of a band tribe chiefdom state sequence and instead demonstrates that large complex societies can flourish without social classes and the state as dramatically shown by the Indus civilization Such features as the use of Childe's urban revolution theory as a means of comparison for each emerging civilization and the discussion of the emergence of archaeology as a scientific discipline make Early Civilizations of the Old World a valuable innovative and stimulating work
