Octagon House:

The Octagon House Orson Fowler, 2015-10-08 In the mid 19th Century America was host to a curious architectural trend the octagonal house Such eight sided homes as well as schools churches barns and businesses were popping up across the country so quickly that by 1857 over 1 000 had been built Though the craze has long since subsided the book that started it all remains a valuable and curious artifact of architectural history A phrenologist by trade and eccentric Renaissance man by character Orson S Fowler subscribed to the principle that form follows function in architecture years before the edict was popularized by Louis Sullivan and Frank Lloyd Wright For a multitude of reasons explored at length in these pages Fowler determined that an octagonal house provides for the maximal utilization of space and resources like heat and water Years ahead of his time with respect to his concerns about energy efficiency Fowler includes plans that call for central heating running water and speaking tubes Modern readers will likely be amused by his short sermon on the potential benefits of an indoor water closet Though Fowler himself was never trained as an architect he supports his assertions with strong reasoning and even includes plans and instructions for designing and constructing an octagon house As the long dormant octagonal home craze heats up once again The Octagon House continues to be highly sought after for its creative architectural suggestions and its cheerful engaging and quirky tone True to character Fowler folds a great deal of vivacious offbeat commentary into this treatise on octagonal architecture With plenty of sudden left turns and amusing anecdotes this high quality re issue of 1848 s *The Octagon House* is sure to delight anyone who appreciates art architecture and curious minds *The Octagon House* Orson Squire Fowler, 1973 *The Octagon House Inventory* Ellen L. Puerzer, 2011 An architectural reference book detailing the Nineteenth Century Octagon Houses in America and Canada *The Houses of St. Augustine* David Nolan, 1995 When the Pilgrims landed at Plymouth Rock St Augustine was already half a century old Founded in 1565 the city has been continuously inhabited ever since and its architectural styles tell stories of boom and bust fad and tradition war and peace modernization and historic preservation This affectionate portrait of our oldest city offers a comprehensive survey of the many architectural features that have expressed the needs and preferences of St Augustine s inhabitants over more than four centuries of Spanish British and American government From the coquina stone structures of colonial times through Victorian gingerbread and Henry Flagler s Spanish revival to the cookie cutter subdivisions and condominiums of modern times the houses of St Augustine are introduced in this lovely and readable book like characters in a historical drama Each chapter highlights a broad historical period and includes a lively discussion of the city s distinctive character during that era Representative styles and forms of each period are illustrated with color photographs and original watercolors by Jean Ellen Fitzpatrick **A Home for All the Gravel Wall and Octagon Mode of Building** Orson S. Fowler, 2003-06-01 In 1848 Orson Squire Fowler published *A Home for All or a New Cheap Convenient and Superior Mode of Building* in which he announced that the octagon house with its eight sides enclosed more space than a square one with

equal wall space The octagonal form had been used in public buildings in the past but now as a concept for domestic architecture it had a dedicated and convincing champion Fowler's books stressing the functional and stylistic advantages of the octagon house found many readers and several hundred followers who sprinkled the landscape from New England to Wisconsin with eight sided houses barns churches schoolhouses carriage houses garden houses smokehouses and privies Fowler's creative idea for an octagon house came to him while contemplating a design for his own home He wondered why there had been so little advancement in architectural design particularly given the preponderance of scientific advancements Looking for a radical change in house style Fowler questioned why the spherical form that is predominant in nature was not employed in architecture The constraint of right angles for the framing of houses was the obvious reason Fowler thought Why not have our houses six eight 12 or 20 sided Why not build after some mathematical figure The solution the octagon Since octagons enclose more floor space per linear foot than comparable squares or rectangles Fowler claimed they cost less to build and reduced heat loss He also insisted octagons allowed in more sunlight and had better ventilation than conventional houses owners of these unusual homes found that the improved light and ventilation went into the triangular closets and pantries that occupied the octagons angles Brattleboro Brattleboro Historical Society, 2000 Brattleboro lies in the southeast corner of Vermont just nine miles north of the Massachusetts border and directly across the Connecticut River from New Hampshire The community developed in the 1760s when European American settlers established homes in the river valley Brattleboro was ideal for settlement because of its topography The Whetstone Brook which runs from the foothills of the Green Mountains through Brattleboro provided a major source of waterpower and the Connecticut River offered an ideal transportation route for sending finished products via flat bottomed boat to market in southern New England and New York Brattleboro presents the story of its people who from the beginning have exhibited and benefited from a positive philosophy toward life In the mid 1800s railroad service came to the area and Brattleboro developed as a center for commerce health spas and literary activities Factories manufacturing organs toys and furniture thrived Printing and publishing industries as well as literary societies flourished Hotels opened and visitors arrived to do business or just to avail themselves of the town's many advantages To this day the area continues to enjoy a stable economy **The Octagon House in Watertown, Wis** Watertown (Wis.). Octagon House, 1968 Ontario House Styles Robert Mikel, 2004-10 Stunning full colour photographs and engaging text show readers how to identify Ontario's many unique types of homes Ontario has a rich history of architectural styles and is home to some of the most stunning heritage houses in North America In this book author Robert Mikel profiles in depth every important house style the province has seen over the past three centuries from the grand elegance of the Italianate to the intimacy and coziness of the Ontario Cottage Readers will see how each house style developed in Europe came to Ontario and the variations that are unique to the province Both an attractive gift book and a solid reference Ontario House Styles will appeal to those who live in Ontario's tens of thousands of heritage

homes and to anyone interested in Ontario's colourful architectural history Ontario House Styles includes ninety homes from Ancaster Brockville Cobourg Cambridge Dundas Gananoque Grafton Grimsby Hamilton Kingston London Napanee Niagara on the Lake Odessa Paris Picton Port Hope St Mary's Stoney Creek Stratford Toronto Waterloo The Loren Andrus Octagon House 1860 Washington, Michigan Judith A. Anders, 2003 The Architecture of Bergen County, New Jersey T. Robins Brown, Schuyler Warmflash, 2000 The Architecture of Bergen County New Jersey presents an accessible overview of the county's architectural heritage and its historic structures The volume explores the styles trends and events that influenced the design and setting of the region's buildings More than 150 photos document Bergen County's architectural treasures generating awareness and appreciation for these structures and their history The Architecture of Bergen County New Jersey demonstrates the close association between architectural development at the national and local levels and shows how social technological and political changes occurring within the county have been reflected in the building types and styles of the area
