web level 3 59 two plane mirrors are connected at their sides so that they form a 45 deg angle between them a light ray strikes one mirror at an angle of 30 deg to the normal and then reflects off the second mirror calculate the angle of reflection of the light ray off the second mirror reflection from the first mirror is r 1 i 1 30 deg

reflection of light types of mirrors plain mirror and spherical mirror - Jul 25 2022

web 2 days ago reflection is one of the distinctive properties of light it is the reflection of light which enables us to see anything light reflection occurs when a ray of light meets a smooth polished surface and reflects back the incident light ray is said to be reflected off the surface when it lands on it the beam that rebounds is known as the
