School Organisation (RLE Edu L) William Tyler,2012-05-16 The internal organisation of the school touches on many areas of contemporary debate Is there such a thing as a good school Are large urban comprehensives necessarily impersonal Are the charges of indiscipline conflict and declining standards in modern schools based on a failure to understand schools as institutions At the time this book was first published sociological analysis had neglected to consider schools as organisational entities preferring to see them as either the sites for negotiated encounters between teachers and pupils or else as agencies of class reproduction The author redresses this imbalance and by relating the various literatures on the school to the constitutive patterns of its internal organisation he demonstrates the need for a more intensive sociological study of this embattled institution

Disengagement describes a culture of abstention in which school systems anticipate leadership succession problems such as projected shortages and recurring recruitment difficulties

Challenges for Public Education Jane Wilkinson, Richard Niesche, Scott Eacott, 2018-10-29 An accelerating pattern in Australia and internationally is the dismantling of public education systems as part of a long standing trend towards the modernisation marketisation and privatisation of educational provision Responsibility for direct delivery of education services has been shifted to contracting and monitoring under the clarion call of school and leadership autonomy and parental choice Part of this pattern is an increasing blurring of boundaries between the state and private sector a move from government to new forms of strategic governance and from hierarchy to heterarchy Challenges for Public Education examines the educational leadership policy and social justice implications of these trends in Australia and internationally It maps this movement through early shifts to school based management in Australia New Zealand and Sweden and recent moves such as the academies programme in England and charter schools in the United States It draws on recent studies of a distinct new phase in Australian school reform the creation of independent public schools IPS in Western Australia and Queensland and global policy moves in public education in order to provide a truly international dialogue and debate on these matters This book moves beyond critique It innovatively brings together Australian and international perspectives and a rich range of diverse theoretical lenses practice philosophy feminism gender relational and postmodernism As such it provides a crucial forum for illuminating alternate ways to conceptualise educational leadership policy and social justice as resources for hope

Questioning Leadership Gabriele Lakowski, Scott Eacott, Colin W. Evers, 2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance

and learning outcomes in schools At a time when leadership's dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations
