Forget Chineseness Allen Chun, 2017-03-27 Critiques the idea of a Chinese cultural identity and argues that such identities are instead determined by geopolitical and economic forces Forget Chineseness provides a critical interpretation of not only discourses of Chinese identity Chineseness but also of how they have reflected differences between Chinese societies such as in Hong Kong Taiwan People s Republic of China Singapore and communities overseas Allen Chun asserts that while identity does have meaning in cultural representational terms it is more importantly a product of its embeddedness in specific entanglements of modernity colonialism nation state formation and globalization By articulating these processes underlying institutional practices in relation to public mindsets it is possible to explain various epistemic moments that form the basis for their sociopolitical transformation From a broader perspective this should have salient ramifications for prevailing discussions of identity politics The concept of identity has not only been predicated on flawed notions of ethnicity and culture in the social sciences but it has also been acutely exacerbated by polarizing assumptions that drive our understanding of identity politics

Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future

developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
