The Schweinfurt-Regensburg Mission Martin Middlebrook, 2012-07-19 A detailed history of the American World War II bombing mission over Nazi Germany by the author of *The First Day on the Somme* On August 17 1943 the entire strength of the American heavy bomber forces in England set out to raid two major industrial complexes deep in southern Germany the Messerschmitt aircraft factory and the KGF ball bearing plant For American commanders it was the culmination of years of planning the day when their self-defending formations of the famous Flying Fortress could at last perform their true role reaching out by daylight to strike at targets in the deepest corners of industrial Germany The day ended in disaster for the Americans Thanks to the courage of the aircrews the bombers won through to the targets and caused heavy damage but sixty were shot down and the hopes of the American commanders were shattered Historically it was one of the most important days for the American air forces during the Second World War While researching this catastrophic raid author Martin Middlebrook interviewed hundreds of the airmen involved German defenders slave workers and eyewitnesses The result is a mass of fresh previously unused material with which the author finally provides the full story of this famous day's operations Not only is the American side elaborated upon but the previously vague German side of the story both the Luftwaffe action and the civilian experiences in Schweinfurt and Regensburg is also now presented clearly and in detail for the first time Middlebrook also covers the important question of why the RAF did not support the American effort and follow up the raid on Schweinfurt as planned

The Dark Path Williamson Murray, 2024-10-22 From an esteemed military historian a sweeping history of the revolutions in war fighting that have shaped the modern world Heraclitus wrote that war is the father of all and it has formed much of the modern world Although the fundamental nature of war has not altered over

the centuries constant change innovation and adaptation have repeatedly reshaped how wars are fought in the West. Revolutions in military practice cannot be separated from larger social developments in areas like logistics finance and economics and the culture of military organizations. In *The Dark Path* Williamson Murray argues that the history of warfare in the West hinged on five revolutions which both reflected the social political and economic conditions that produced them and in turn influenced how those conditions evolved. These five key turning points are the advent of the modern state which formed bureaucracies and professional militaries the Industrial Revolution which produced the financial and industrial means to sustain and equip large armies the French Revolution which provided the ideological basis needed to sustain armies through continent sized wars the merging of the Industrial and French Revolutions in the U S Civil War and the accelerating integration of technological advancement financial capacity ideology and government that unleashed the modern capacity for total warfare. An ambitious work of synthesis this book shows how the world continually re creates war and how war in turn continually re creates the world.

The Bombers and the Bombed Richard Overy, 2015-04-28 An essential part of the literature of World War II Jonathan Yardley The Washington Post From acclaimed World War II historian Richard Overy comes this startling new history of the controversial Allied bombing war against Germany and German occupied Europe. In the fullest account yet of the campaign and its consequences Overy assesses not just the bombing strategies and pattern of operations but also how the bombed communities coped with the devastation. This book presents a unique history of the bombing offensive from below as well as from above and engages with moral questions that still resonate today.

Air Commanders John Andreas Olsen, 2012 This book combines short military biographies and operational analyses to reveal how the personalities attitudes and life experiences of twelve outstanding U S airmen shaped the central air campaigns in American history. Their achievements proved decisive not only in the campaigns they led but also in shaping the U S Air Force and the dominant role of airpower in modern warfare.

Doctors Under Hitler Michael H. Kater, 2005-10-12 A brilliant attempt to explain the profound historical crisis into which medicine had plummeted during the Nazi period with the tried methods of social history. *Historische Zeitschrift* The author has drawn from an extraordinary range of sources and the weight of evidence he compiles will certainly give pause to anyone who still wants to believe that professionals kept their hands clean in this era of great and methodical crimes. *Journal of Modern History* Kater's important book deserves close attention from historians of medicine and German historians alike. In this history of medicine and the medical profession in the Third Reich Michael Kater examines the career patterns educational training professional organization and political socialization of German physicians under Hitler. His discussion ranges widely from doctors who participated in Nazi atrocities to those who actively resisted the regime's perversion of healing to the vast majority whose ideology and behavior fell somewhere between the two extremes. He also takes a chilling

look at the post Hitler medical establishment's problematic relationship to the Nazi past The Collapse of the German War Economy, 1944-1945 Alfred C. Mierzejewski, 2017-10-10 In this book Alfred Mierzejewski describes how the German economy collapsed under Allied bombing in the last year of World War II He presents a broad based original study of German wartime industry and transportation and of Allied air force planning and intelligence including the first complete analysis in English of the German National Railway The German industrial economy was extraordinarily dependent on the timely adequate distribution of coal by railroad and inland waterway The German National Railway in particular was the pivot of the finely balanced armaments production and distribution system created by Albert Speer But Allied strategists did not immediately recognize this Only in late 1944 when Deputy Supreme Allied Commander Sir Arthur Tedder built a new strategic consensus was this vital coal transport nexus severed The result was the rapid paralysis of the Nazi war economy Mierzejewski measures the economic consequences of the bombing by considering broad indices such as armaments and coal production railway performance and weapons deliveries to the armed forces In addition he shows how individual companies in each of Germany's major economic regions fared By drawing on previously unexamined files of private German manufacturing companies the Reich Transportation Ministry and Allied air intelligence agencies Mierzejewski creates a rare combination of economic analysis and military history that provides new perspectives on the German war economy and Allied air intelligence

Military Adaptation In War: With Fear Of Change Professor Williamson Murray, 2015-11-06 Military Adaptation in War addresses one of the most persistent problems that military organizations confront namely the problem of how to adapt under the trying terrifying conditions of war This work builds on the volume that Professor Williamson Murray edited with Allan Millett on military innovation a quite different issue though similar in some respects In Clausewitzian terms war is a contest an interactive duel which is of indeterminate length and presents a series of intractable problems at every level from policy and strategy down to the tactical Moreover the fact that the enemy is adapting at the same time presents military organizations with an ever changing set of conundrums that offer up no easy solutions As the British general James Wolfe suggested before Quebec War is an option of difficulties Dr Murray provides an in depth analysis of the problems that military forces confront in adapting to these difficulties A World at Arms Gerhard L. Weinberg, 2005-03-28 A truly global account of WWII the war that encompassed six continents

Allied and the German perspectives covering all the main decisions and technological innovations made by both sides in this epic struggle

Die Geheime Staatspolizei im NS-Gau Mainfranken 1933-1945 Winkler, Andreas Heinrich, 2023-10-17. Diese Abhandlung befasst sich mit der Geschichte der Geheimen Staatspolizei im NS-Gau Mainfranken. Nach der Machtübernahme Adolf Hitlers übernahmen die Nationalsozialisten die Kontrolle über die Polizei in Bayern. Sie spalteten die Politische Abteilung der Würzburger Polizeidirektion in eine eigene Einheit, die Bayerische Politische Polizei, ab. Im Jahr 1936 übertrug Hitler die Kontrolle über die gesamte deutsche Polizei an Himmler. Die Bayerische Politische Polizei in Würzburg wurde als Geheime Staatspolizei-Staatspolizeistelle Würzburg Teil der Gestapo. Im Sommer 1941 wurde die Staatspolizeistelle Würzburg in eine Außendienststelle der Staatspolizeistelle Nürnberg-Fürth umgewandelt. Es werden die personellen und organisatorischen Strukturen durchleuchtet. Es wird der Frage nachgegangen, wer die Leute waren, welche bei der Gestapo arbeiteten, und in welchen Bereichen diese eingesetzt wurden. Des Weiteren wird die Arbeitsweise der Gestapo anhand von verschiedenen Beispielen analysiert. Kommunisten und jüdische Mitbürger wurden bereits in der Frühphase verfolgt. Schon hier zeigte sich, dass die Gestapo nicht rechtsstaatlich arbeitete. Mit Hilfe von Drohungen und Gewalt wurden Gestandnisse erpresst. Während des Zweiten Weltkriegs wurden viele Mitarbeiter zeitweise zu Einsatzgruppen oder Dienststellen in den besetzten Gebieten abgeordnet. Die wichtigsten Quellen für diesen Themenkomplex waren die Akten der Staatsanwaltschaften Schweinfurt, Würzburg und Nürnberg-Fürth, welche nach dem Krieg Ermittlungen gegen einige Mitarbeiter wegen verschiedener Verbrechen einleiteten. Ein besonderer Schwerpunkt dieser Abhandlung lag auf dem Umgang der Gestapo mit den Zwangsarbeitern in der Schweinfurter Kugellagerindustrie. Die Gestapo war für deren Überwachung und Bestrafung zuständig. Es wird aufgezeigt, welche Strafen es gab und wie erfolgreich die Gestapo bei der Durchsetzung dieser Strafen war. Zu diesem Zweck wurden hauptsächlich Personenakten der Staatspolizeistelle Würzburg über Zwangsarbeiter aus der Schweinfurter Kugellagerindustrie ausgewertet. Die Gestapo führte Akten über alle Personen, die staatspolizeilich in Erscheinung getreten waren. In diesen Akten wurde der gesamte Verlauf der Ermittlungen protokolliert.

Defense of the Third Reich 1941-45 Steven J. Zaloga, 2012-10-20. Starting in 1940, Germany was subjected to a growing threat of Allied bomber attack. The RAF night bombing offensive built up in a slow but unrelenting crescendo through the Ruhr campaign in

the summer of 1944 and culminating in the attacks on Berlin in the autumn and early winter of 1943-44. They were joined by US daylight raids which first began to have a serious impact on German industry in the autumn of 1943. This book focuses on the land-based infrastructure of Germany's defense against the air onslaught. Besides active defense against air attack, Germany also invested heavily in passive defense such as air raid shelters. While much of this defense was conventional such as underground shelters and the dual use of subways and other structures, Germany faced some unique dilemmas in protecting cities against night fire bomb raids. As a result, German architects designed massive above-ground defense shelters which were amongst the most massive defensive structures built in World War II.

The Bombing War Richard Overy, 2013-09-26

The ultimate history of the Blitz and bombing in the Second World War from Wolfson Prize-winning historian and author Richard Overy. The use of massive fleets of bombers to kill and terrorize civilians was an aspect of the Second World War which continues to challenge the idea that Allies specifically fought a moral war. For Britain, bombing became perhaps its principal contribution to the fighting as night after night exceptionally brave men flew over occupied Europe, destroying its cities. The Bombing War radically overhauls our understanding of the War. It is the first book to examine seriously not just the most well-known parts of the campaign but the significance of bombing on many other fronts: the German use of bombers on the Eastern Front, for example, as well as much newly discovered material on the more familiar Blitz on Britain or the Allied campaigns against Italian cities. The result is the author's masterpiece: a rich, gripping picture of the Second World War and the terrible military, technological, and ethical issues that relentlessly drove all its participants into an abyss.

Reviews: Magnificent must now be regarded as the standard work on the bombing war. It is probably the most important book published on the history of the second world war this century. Richard J. Evans, *Guardian*. Monumental: this is a major contribution to one of the most controversial aspects of the Second World War, full of new detail and perspectives. hugely impressive. James Holland, *Literary Review*. This tremendous book does what the war it describes signally failed to do. With a well-thought-out strategy and precision, it delivers maximum force on its objectives. The result is a masterpiece of the historian's art. *The Times*. It is unlikely that a work of this scale, scope, and merit will be surpassed. *Times Higher Education*. What distinguishes Mr Overy's account of the bombing war from lesser efforts is the wealth of narrative detail and analytical rigour that he brings to bear. *Economist*. Excellent. Overy is never less than an erudite and clear-eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends. *Financial Times*. Hard to surpass. If you want to know how bombing worked, what it did, and what it meant, this is the book to read. *Times Literary Supplement*.

About the author: Richard Overy is the author of a series of remarkable books on the Second World War and the wider disasters of the twentieth century: *The Dictators*, *Hitler's Germany*, *Stalin's Russia*. He won both the Wolfson Prize for History and the Hessel Tiltman Prize. He is Professor of History at the University of Exeter. Penguin publishes: 1939, *Countdown to War*, *The Morbid Age*, *Russia's War*, *Interrogations*, *The Battle of Britain*, and *The Dictators*. He
