**Introducing African Science** Jonathan O. Chimakonam, 2012-08-20 You are about to read a much needed book that will open your eyes to the Africa that has been hidden from us Thinking out of the box of Western thought pattern Dr Jonathan has been able to give to the world this revolutionary masterpiece in the intellectual history of Africa By systematizing African science he has emphasized that more than one cock crows We may therefore call him the Demiurge of new African renaissance Mary Nelson Sankofa Directions Houston Texas USA Se wo were fi na wosan kofa a yenkyi Learning from the past in building the future With this masterpiece Dr Jonathan has answered all the critics of Africas intellectual and inventive ability He has opened a door to Africas authentic renaissance The work is a beacon in Africas history and the author has emerged as one of the continents brightest minds Chris Iwarah The Sun Newspaper With this towering intellectual accomplishment Dr Jonathan Chimakonam has not only proven that Africans are capable of revolutionary thoughts but has emerged as one of the leading original thinkers on the continent In fact in this piece of adorable literature Jonathan could be said to have done for Africa what thinkers like Francis Bacon did for the West Prof G O Ozumba Head Department of Philosophy University of Calabar Nigeria What Jonathan has done is not different from what the builders of Western science did In fact he has taken his seat as the Francis Bacon of African science project and it would not be out of place if one describes him in the future as the father of African science Okechukwukelu Okonkwo Deputy Director Programmes Anambra Broadcasting Service This book is a great exploration into a rich repository of wisdom and knowledge which needs to be recaptured It is African renaissance that will reposition Africa in the world of technology and development This is both challenging and refreshing With emerging scholars like Jonathan there is hope for Africa Hakuna Matata Venerable Professor Udobata Onunwa Director International Center for the Study of African Languages and Culture Birmingham UK

Igwebuike Philosophy and Complementary Relations Ikechukwu Anthony KANU, 2022-07-18 In this work Igwebuike is employed as a unifying concept of African thought especially that aspect concerning the human person s conception of the spiritual and material universe in which he or she lives It is an explanatory theory or principle that interprets the puzzle of our complex relationship with the non corporal world and human social life that is major social institutions that ensure social continuity and group identity and further underpins the epistemological manifestations of the human person s universe

*The Palgrave Handbook of African Philosophy* Adeshina Afolayan, Toyin Falola, 2017-11-17 This handbook investigates the current state and future possibilities of African Philosophy as a discipline and as a practice vis vis

the challenge of African development and Africa's place in a globalized neoliberal capitalist economy The volume offers a comprehensive survey of the philosophical enterprise in Africa especially with reference to current discourses arguments and new issues feminism and gender terrorism and fundamentalism sexuality development identity pedagogy and multidisciplinary etc that are significant for understanding how Africa can resume its arrested march towards decolonization and liberation

**Logic and African Philosophy** Jonathan O. Chimakonam, 2020-10-06 **Logic and African Philosophy** Seminal Essays on African Systems of Thought aims to put African intellectual history in perspective with focus on the subjects of racism logic language and psychology The volume seeks to fill in the gaps left by the exclusion of African thinkers that are frequent in the curricula of African schools concerning history sociology philosophy and cultural studies The book is divided into four parts that are preceded by an introduction to link up the essays and emphasise their sociological implications Part one is comprised of essays that opened the controversy of whether logic can be found in traditional African cultures as well as other matters like the nature of the mind and behaviour of African peoples The essays in part two are centred on the following question are the laws of thought present in African languages and cultures Part three brings together essays that sparkle the debate on whether there can be such a thing as African logic which stems from the discussions in part two Part four is concerned on the theme of system building in logic contributions are written by members of the budding African philosophy movement called the Conversational School of Philosophy based at the University of Calabar and the main objective of their papers is to formulate systems of African logic

**Atuolu Omalu** Jonathan O. Chimakonam, 2014-12-15 The story of African philosophy is surrounded by controversy Decades after the great debate over its mere existence many vital questions have been left unanswered From examining the origins of African philosophy to addressing fundamental issues in ontology epistemology ethics and political thought this collection of essays brings fresh insight to questions both old and new First time readers and seasoned scholars alike will find this book to be an essential resource in African thought At I mal gives shape and direction to a hitherto formless discipline and heralds an exciting future for African philosophy

**Ezumezu** Jonathan O. Chimakonam, 2019-03-05 The issue of a logic foundation for African thought connects well with the question of method Do we need new methods for African philosophy and studies Or are the methods of Western thought adequate for African intellectual space These questions are not some of the easiest to answer because they lead straight to the question of whether or not a logic tradition from African intellectual space is possible Thus in charting the course of future direction in African philosophy and studies one must be confronted with this question of logic The author boldly takes up this challenge and becomes the first to do so in a book by introducing new concepts and formulating a new African culture inspired system of logic called Ezumezu which he believes would ground new methods in African philosophy and studies He develops this system to rescue African philosophy and by extension sundry fields in African Indigenous Knowledge Systems from the spell of Plato and the hegemony of Aristotle African philosophers can now ground their

discourses in Ezumezu logic which will distinguish their philosophy as a tradition in its own right On the whole the book engages with some of the lingering controversies in the idea of an African logic before unveiling Ezumezu as a philosophy of logic methodology and formal system The book also provides fresh arguments and insights on the themes of decolonisation and Africanisation for the intellectual transformation of scholarship in Africa It will appeal to philosophers and logicians undergraduates and post graduate researchers as well as those in various areas of African studies     *African Studies: Breakthroughs in Research and Practice* Management Association, Information Resources,2020-04-03 Global interest in African studies has been rapidly growing as researchers realize the importance of understanding the impact African communities can have on the economy development education and more As the use acceptance and popularity of African knowledge increases it is crucial to explore how this community based knowledge provides deeper insights understanding and influence on such things as decision making and problem solving African Studies Breakthroughs in Research and Practice examines the politics culture language history socio economic development methodologies and contemporary experiences of African peoples from around the world Highlighting a range of topics such as indigenous knowledge developing countries and public administration this publication is an ideal reference source for sociologists policymakers anthropologists government officials economists instructors researchers academicians and graduate level students in a variety of fields     *Impact of Science on African Agriculture and Food Security* P. Anandajayasekeram,M. Rukani,S. Babu,2007 The need for agricultural research resources in the developing world cannot be underestimated but the availability of such resources is often poor due to lack of funding and investment In order for Africa and other such developing countries to achieve productivity in agriculture vital to food security poverty reduction and sustainable management of natural resources investment and policy development needs to be assessed This book a joint effort from IFPRI ILRI and the Kellogg Foundation explores the importance of impact assessment studies in Africa and assembles important evidence to pave the way for further much needed investment in agricultural research all over the developing world     *Consolationism and Comparative African Philosophy* Ada Agada,2021-11-18 In a major challenge to African philosophy this book demonstrates the importance of the universalisation question for every committed African philosopher Rooted in Africa s colonial legacy the universalisation question challenges the African thinker to show how authentically African philosophical concepts and phenomena can be universally applicable in a globalising world In this highly original book the author inserts the philosophy of consolationism into African philosophical discourse constructing a unique philosophical system that is at once African and universally relevant The book engages major African and Western philosophers of diverse ideological leanings in a compelling dialogue that announces the future of world philosophy as one of interculturality in which a common philosophical horizon is forged out of the cultural diversities of the world for the edification of humanity in a continually changing world This book will be an important read for researchers in the fields of

African Studies intercultural philosophy philosophy of mind and existentialism      Science, Technology, and Society Sal Restivo, 2005-05-19 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index      *Contemporary Issues in African Sciences and Science Education* Akwasi Asabere-Ameyaw, George J. Sefa Dei, Kolawole Raheem, 2012-09-05 In this careful articulation of science the editors provide an intellectual marriage of Indigenous science and science education in the African context as a way of revising schooling and education They define science broadly to include both the science of the natural physical biological and the science of the social It is noted that the current policy direction of African education continues to be a subject of intense intellectual discussion Science education is very much at the heart of much current debates about reforming African schooling Among the ways to counter vision contemporary African education this book points to how we promote Indigenous science education to improve upon African science and technology development in general The book also notes a long standing push to re examine local cultural resource knowings in order to appreciate and understand the nature content and context of Indigenous knowledge science as a starting foundation for promoting African science and technology studies in general It is argued that these interests and concerns are not mutually exclusive of each other but as a matter of fact interwoven and interdependent The breadth of coverage of the collection reflect papers in science Indigeneity identity and knowledge production and the possibilities of creating a truly African centred education It is argued that such extensive coverage will engage and excite readers on the path of what has been termed African educational recovery While the book is careful in avoiding stale debates about the Eurocentricity of Western scientific knowledge and the positing of Eurocentric science as the only science worthy of engagement it nonetheless caution against constructing a binary between Indigenous local science and knowledges and Western scientific knowledge After all Western scientific knowledge is itself a form of local knowledge born out of a particular social and historical context Engaging science in a more global context will bring to the fore critical questions of how we create spaces for the study of Indigenous science knowledge in our schools How is Indigenous science to be read understood and theorized And how do educators gather collect and interpret Indigenous science knowledges for the purposes of teaching young learners These are critical questions for contemporary African education      **South African Journal of Science** ,1925      *Disciplines of African Philosophy* Ikechukwu Anthony Kanu, 2018-08-31 For several decades African philosophers have debated on the history nature and methodology of African philosophy among others however this piece takes a different turn It reflects on the disciplines of African philosophy It is a work of twelve chapters and focuses on the major disciplines of African philosophy This piece is a response to the recurrent question in the class of African
