## Science And Engineering Programs:

**A Directory of Federal R&D Agencies' Science and Engineering Programs for Women, Minorities, and Physically Handicapped Persons**, 1985     *The Future of University Nuclear Science and Engineering Programs* United States. Congress. House. Committee on Science. Subcommittee on Energy, 2004     The Chairs for Women in Science and Engineering Program Caroline D'Amours, Hannah Young, Catherine Mavriplis, 2024-04-10 This book describes the origins and evolution of Canada's 30 year Natural Sciences and Engineering Research Council Chairs for Women in Science and Engineering Program The book starts literally with a bang right as Montreal and all of Canada were rocked by the 1989 Ecole Polytechnique Massacre of 14 women describing how the Chair program took on a frenetic pace as a single Chairholder Monique Frize tried to respond to an entire country's concerns about women in engineering both as students and as professionals The authors first cover the program from 1989 through 1997 when the program was expanded to five regional Chairs of which there have been over three generations by now The book then provides synopses of each Chairholder's comprehensive regional program to recruit retain and advance girls and women in STEM organized by generation providing a unique historical view of the changing landscape for research and outreach programs to increase the participation of women in male dominated scientific fields Readers will find an effective model for national programs addressing equity diversity and inclusion in STEM and be inspired by the 16 strong role models who pioneered blended careers in STEM and gender equity advocacy     Educational Programs and Facilities in Nuclear Science and Engineering Oak Ridge Institute of Nuclear Studies. University Relations Division, 1964     **Elementary and Secondary Education for Science and Engineering**, 1988     *The National Science Foundation's Materials Research Science and Engineering Centers Program* National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Solid State Sciences Committee, MRSEC Impact Assessment Committee, 2007-10-31 The Materials Research Science and Engineering Centers MRSEC Impact Assessment Committee was convened by the National Research Council in response to an informal request from the National Science Foundation Charged to examine the impact of the MRSEC program and to provide guidance for the future the committee included experts from across materials research as well as several from outside the field The committee developed a general methodology to examine the MRSEC centers and after extensive research and analysis came to the following conclusions MRSEC center awards continue to be in great demand The intense competition within the community for them indicates a strong perceived value Using more quantitative measures the committee examined the performance and impact of MRSEC activities over the past decade in the areas of research facilities education and outreach and industrial collaboration and technology transfer The MRSEC program has had important impacts of the same high standard of quality as those of other multi investigator or individual investigator programs Although the committee was largely unable to attribute observed impacts uniquely to the MRSEC program MRSECs generally mobilize

efforts that would not have occurred otherwise Because of an observed decline in the effectiveness of the centers the committee recommended a restructuring the MRSEC program to allow more efficient use and leveraging of resources The new program should fully invest in centers of excellence as well as in stand alone teams of researchers to allow tighter focus on key strengths of the program In its report the committee outlines one potential vision for how this might be accomplished in a revenue neutral fashion      **Oversight and Evaluation of the Resource Centers for Science and Engineering**
