College of Science and Arts, 1959 *Centennial Review of Arts & Science*, 1966 Harvard Guide to American History Frank Freidel, Frank Burt Freidel, Richard K. Showman, 1974 Editions for 1954 and 1967 by O Handlin and others **Catalog of Copyright Entries** Library of Congress. Copyright Office, 1969 **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ... Wherein the Copyright Has Been Completed by the Deposit of Two Copies in the Office** Library of Congress. Copyright Office, 1957 *Anthropological and historical sciences. Aesthetics and the sciences of art* Jacques Havet, 2019-06-04 No detailed description available for Anthropological and historical sciences Aesthetics and the sciences of art Catalog of Copyright Entries, Third Series, 1961 Social Science and the Cults John A. Saliba, 2019-03-20 This book first published in 1990 brings together descriptive comparative and theoretical materials on cults and sects in Western culture focusing on literature published since 1970 A historical section links the rise of the new movements to similar past phenomena in Western culture Other sections examine the methodology of studying religious movements and the various theories which have been brought to explain them current studies on traditional sects that are sometimes compared to the new religions and many studies of individual contemporary cults *Science and Civilisation in China* Joseph Needham, Wang Ling, Gwei-Djen Lu, 1971 C. P. Snow and the Struggle of Modernity John de la Mothe, 2013-09-06 The condition of modernity springs from that tension between science and the humanities that had its roots in the Enlightenment but reached its full flowering with the rise of twentieth century technology It manifests itself most notably in the crisis of individuality that is generated by the nexus of science literature and politics one that challenges each of us to find a way of balancing our personal identities between our public and private selves in an otherwise estranging world This challenge which can only be expressed as the struggle of modernity perhaps finds no better expression than in C P Snow In his career as novelist scientist and civil servant C P Snow 1905 1980 attempted to bridge the disparate worlds of modern science and the humanities While Snow is often regarded as a late Victorian liberal who has little to say about the modernist period in which he lived and wrote de la Mothe challenges this judgment reassessing Snow's place in twentieth century thought He argues that Snow's life and writings most notably his *Strangers and Brothers* sequence of novels and his provocative thesis in *The Two Cultures and the Scientific Revolution* reflect a persistent struggle with the nature of modernity They manifest Snow's belief that science and technology were at the center of modern life **Talcott Parsons on Economy and Society (RLE Social Theory)** Bryan S. Turner, Robert J. Holton, 2014-08-27 In this remarkable collection of essays Holton and Turner demonstrate that Parsonian sociology addresses the most central problems of our time issues of sickness and health power and inequality the nature of capitalism and its possible alternatives They develop a mature and

original perspective on Parsons as the only classical theorist who avoided crippling nostalgia Holton and Turner not only talk about Parsonian sociology in a profound and insightful way they do it and do it well As sociology moves away from the rigid dichotomies of earlier debate this book will help point the way Jeffrey Alexander Professor and Director of Graduate Studies in Sociology UCLA

**The Social System** Talcott Parsons, 2013-08-21 This book brings together in systematic and generalized form the main outlines of a conceptual scheme for the analysis of the structure and processes of social systems It carries out Pareto's intention by using the structural functional level of analysis

*The Routledge Handbook of Feminist Philosophy of Science* Sharon Crasnow, Kristen Intemann, 2020-11-30 The Routledge Handbook of Feminist Philosophy of Science is a comprehensive resource for feminist thinking about and in the sciences Its 33 chapters were written exclusively for this Handbook by a group of leading international philosophers as well as scholars in gender studies women's studies psychology economics and political science The chapters of the Handbook are organized into four main parts I Hidden Figures and Historical Critique II Theoretical Frameworks III Key Concepts and Issues IV Feminist Philosophy of Science in Practice The chapters in this extensive fourth part examine the relevance of feminist philosophical thought for a range of scientific and professional disciplines including biology and biomedical sciences psychology cognitive science and neuroscience the social sciences physics and public policy The Handbook gives a snapshot of the current state of feminist philosophy of science allowing students and other newcomers to get up to speed quickly in the subfield and providing a handy reference for many different kinds of researchers

**The Law of Cryonics** Pierre de Gioia Carabellese, Camilla Della Giustina, 2024-03-19 This book through the lens of interdisciplinary legal analysis draws a subtle balance between bioethics and financial regulation with the latter playing an unexpectedly crucial role in the way life may potentially be governed The legal topic of human preservation or cryoconservation was initially developed in the United States in the case of *Donaldson v van de Kamp* More recently the subject arose in Europe as a result of a decision of the High Court Family Division London This new theme of cryoconservation has unfolded through multifaceted forms including its impact on regulation In an area that may at least *prima facie* be regarded as belonging to the traditional realm of medical law the findings presented here suggest that its potential has strong economic implications The work argues that it is necessary also to look at this subject from a more interdisciplinary perspective drawing a *fil rouge* between two otherwise seemingly opposing areas of law medical law and financial regulation The legal framework draws on the Anglo American and the United Kingdom in particular along with civil law analysis from Italy The work will be of interest to researchers and academics in the areas of medical law legal philosophy financial law property law and insurance law

*Science Fiction and the Two Cultures* Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and

humanistic perspectives how writers influenced by Gernsback s ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners      Forum for Applied Research and Public Policy ,1998      **Constitution, List of Meetings, Officers, Committees, Fellows and Members** American Association for the Advancement of Science,1877      Proceedings American Association for the Advancement of Science,1877      Literature After Euclid Matthew Wickman,2016-02-16 Literature After Euclid tells the story of the creative adaptation of geometry in Scotland during and after the long eighteenth century Analyzing the work of Scottish literati Matthew Wickman challenges how we perceive the Scottish Enlightenment and the modernist ethos that relegated classical Enlightenment to the dustbin of history
