Science Descent Of Man Vols 12 19:

Nature's Last Dance Natalie Kyriacou, 2025-08-26 Amidst the tragedy of wild species extinction lies a hidden world of survival and wonder Conservationists are embroiled in a high stakes clash with a drug cartel to save a porpoise Scientists are fighting to save a flightless bird that romances rocks Unconventional animals are upending 21st century beauty standards and financiers are betting on whale poo to make its debut on Wall Street This is a story of survival and extinction of life and death of curiosity and perversion of unimaginable joy and harrowing sorrow Set against the backdrop of a rapidly unfolding mass extinction event Nature's Last Dance takes readers across hunting grounds through jungles and oceans inside communities through trafficking rings and courtrooms and into the heart of battles to survive against all odds Award winning environmentalist Natalie Kyriacou confronts the extinction crisis with courage and curiosity charting a new course for nature and showing us why it is so worth fighting for

The Routledge Research Companion to Nineteenth-Century British Literature and Science John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

Rickets, Race and Reproduction Deborah Kuhn McGregor, Robert Kuhn McGregor, 2024-02-01 This book outlines the history of rickets a disease commonly associated with childhood and studies its association with race and its long reaching effects on childbirth For centuries the condition was poorly understood For females rickets could pose a double jeopardy suffering in childhood and severe danger in adulthood when giving birth The disease could result in a contracted pelvis that obstructs the birth canal Medical researchers were faced with two distinct challenges unravelling the etiology of rickets and ensuring the safety of women giving birth both proved especially difficult Thought variously to be a disease of industrial cities and children of the poor grounded in lack of exercise or sunlight or the of product racial difference the condition defied analysis until the discovery of vitamin D early in the 20th century The dangers of rickets radically diminished Medical intervention in childbirth continued and childbirth increasingly shifted from the home to the hospital Medical practitioners justified intervention by emphasizing the dangers of pelvic disproportion

continually enlarging the definition to gain full control of birth Often conditioned by racial assumptions surgical experimentation promoted common use of anesthesia and a radical increase in caesarean sections and birth became a colder more clinical experience *Galileo Goes to Jail and Other Myths about Science and Religion* Ronald L. Numbers, 2010-11-08

If we want nonscientists and opinion makers in the press the lab and the pulpit to take a fresh look at the relationship between science and religion Ronald Numbers suggests that we must first dispense with the hoary myths that have masqueraded too long as historical truths Until about the 1970s the dominant narrative in the history of science had long been that of science triumphant and science at war with religion But a new generation of historians both of science and of the church began to examine episodes in the history of science and religion through the values and knowledge of the actors themselves Now Ronald Numbers has recruited the leading scholars in this new history of science to puncture the myths from Galileo's incarceration to Darwin's deathbed conversion to Einstein's belief in a personal God who didn't play dice with the universe The picture of science and religion at each other's throats persists in mainstream media and scholarly journals but each chapter in *Galileo Goes to Jail* shows how much we have to gain by seeing beyond the myths **The Publishers' Trade List Annual**, 1876 **Free Will and the Human Sciences in Britain, 1870-1910** Roger Smith, 2015-10-06 Smith takes an in depth look at the question of free will through the prism of different disciplines in the late nineteenth and early twentieth centuries *Bibliography of the History of Medicine*, **Darwin's Laboratory** Roy M. MacLeod, Philip F. Rehbock, 1994-01-01 No scientific traveler was more influenced by the Pacific than Charles Darwin and his legacy in the region remains unparalleled Yet the extent of the Pacific's impact on the thought of Darwin and those who followed him has not been sufficiently grasped In this volume of essays sixteen scholars explore the many dimensions biological geological anthropological social and political of Darwinism in the Pacific Fired by Darwinian ideas nineteenth century naturalists within and around the Pacific rim worked to further Darwin's programs in their own research in Seattle conchologist P Brooks Randolph in Honolulu evolutionist John Thomas Gulick in Adelaide botanist Richard Schomburgk and in Malaysia biogeographer Alfred Russel Wallace Lesser known enthusiasts furnished Darwin with fresh material and replied to his endless inquiries while young aspiring biologists from Cambridge tested Darwinian ideas directly in the laboratory of the Pacific But the implications of Darwinism for the understanding of human nature and history turned it into a public theory as well as a scientific one Anthropologists geographers missionaries politicians and social commentators from Australia to Japan all found ways to adapt Darwinism to their own agendas Darwin's Laboratory demonstrates the variety and richness of Darwinian ideas in the Pacific and in so doing shows how the region functioned as a testing ground for the theory of evolution Further it illustrates how Darwinian ideas and their European contexts helped invent and define the particular conception we have of the Pacific Both the general reader and the specialist will find controversy illumination and entertainment in this the first book to probe the extent of Darwinism and Darwinian thinking in the Pacific **The**
