

# The Future of Research Evaluation

## Issues

Singular focus on publications is a risk

Because this diverts research evaluation of other forms of research value, for example:

Social value

Data management

Peer review

Teaching

Isn't there already efforts to reform?

Yes, but they are localized and piecemeal...

... Risking many research communities falling behind and being excluded from global research

Recent developments are changing the research world:

Open science

Use of technology, including AI tools

Social media

## Actions

### Global

The Declaration on Research Assessment endorses to serve all individuals and institutions

### Regional

Latin America's CLACSO-FOEIC Declaration of Principles for Research Assessment

EU's CoARA Coalition on Reforming Research Assessment

### National

Some countries are building institutional resiliency, targeting specific sectors, tackling perverse incentives and behaviors.

### Sectoral

Specific communities of practice, for example:

Research funders

Early career researchers

International development sector

Research management societies

• IARC Responsible Research Assessment

• IARC Working Group on Scientific Excellence

• IARC's Research Quality Plus (RQP+)

• IARC's SCOPs Initiative

## Technological interventions

Selection processes

Peer review

Identifying plagiarism

## Challenges

Multiple challenges/questions, for example:

#1

Will the introduction of more qualitative indicators be widely adopted?

#2

How will AI tools for research evaluation impact the current inequality in science systems worldwide?

#3

How will the use of chat bots to increase quantitative outputs impact the publishing industry?

Processing...

#4

Is the weakness of concerted reform efforts globally leading to further fragmentation?

#5

Can reforms ultimately enable a research ecosystem that thrives on high-quality, ethical, inclusive, diverse and impactful research?
