Science Experiences For The Early Childhood Years An Integrated Affective Approach:

Science Experiences for the Early Childhood Years Jean Durgin Harlan, Mary S. Rivkin, 2008 Core text for Science in Early Childhood and Science in the Elementary School courses The ninth edition of *Science Experiences for the Early Childhood Years* is written during recurrent national anxiety about science education Since the 1957 launch of Sputnik concern has pervaded the overlapping circles of education business labor and government The United States is afraid of losing its high standard of living to countries that have more citizens or are more desperately hard working or whose children both score higher on international math and science tests and pursue science technology engineering and mathematics careers with more frequency The aim of this book is to help new teachers be both informed in science and strong in their belief that science is great for children a master discipline that naturally facilitates attention to math and reading

Science Experiences for the Early Childhood Years Jean Durgin Harlan, Mary S. Rivkin, 2012 This text takes an integrated approach to science and emphasizes understanding and addressing children's affective nature It remains a forward thinking innovative resource for teaching science to young learners Core chapters cover areas of study such as plants animals the human body water rocks and minerals magnetism simple machines and the environment Within chapters suggested children's learning experiences are structured around key concepts in each area making content extremely adaptable to early learning and science standards

Science Experiences for the Early Childhood Years Jean D Harlan, Mary S Rivkin, 2015-10-08 A core text for Science in Early Childhood courses at the 2 year or 4 year level for those who will teach young children in preschool or in the primary grades A classic in the field this text takes an integrated approach to science without watering it down and emphasizes understanding and addressing children's affective nature It remains a forward thinking innovative resource for teaching science to young learners and a best selling resource for the field Clearly organized the text provides a research based rationale for early science education in Part I chapters Emphasizing that meaningful science for young children builds on the emotional underpinnings of their curiosity and concerns about the everyday world and their pleasure in exploring it this resource encourages new teachers to help children live appreciatively and thoughtfully on Earth The topical chapters in Part II offer solid accessible concept based activities and are concurrent with the vision of the new Framework for K 12 Science Education being developed by the Board on Science Education of the National Academy of Science For each unit presented students are provided with all the comprehensive integrating and connecting elements to strengthen children's learning of science Early educators own content and pedagogical knowledge will be expanded as they practice using the units in class and in field placements

Science Experiences for the Early Childhood Years: Pearson New International Edition Jean D. Harlan, Mary S. Rivkin, 2013-07-29 A core text for Science in Early Childhood courses at the 2 year or 4 year level for those who will teach young children in preschool or in the primary grades A classic in the field this text takes an integrated approach to science without watering it down and emphasizes understanding and

addressing children's affective nature. It remains a forward thinking innovative resource for teaching science to young learners and a best selling resource for the field. Clearly organized, the text provides a research based rationale for early science education in Part I chapters. Emphasizing that meaningful science for young children builds on the emotional underpinnings of their curiosity and concerns about the everyday world and their pleasure in exploring it, this resource encourages new teachers to help children live appreciatively and thoughtfully on Earth. The topical chapters in Part II offer solid accessible concept based activities and are concurrent with the vision of the new Framework for K-12 Science Education being developed by the Board on Science Education of the National Academy of Science.

Saracho, Bernard Spodek, 2008-01-01 For decades politicians businessmen and other leaders have been concerned with the quality of education including early childhood education in the United States While more than 50% of the children between the ages of three and five are enrolled in preschool and kindergarten programs in the United States no state federal or national standards exist for science or technology education in preschool or kindergarten programs Knowledge about science and technology is an important requirement for all in contemporary society An increasing number of professions require the use of scientific concepts and technological skills and society as a whole depends on scientific knowledge Scientific and technological knowledge should be a part of every individual s education There are many ways to enhance young children s scientific thinking and problem solving skills as well as their technological abilities The purpose of this volume is to present a critical analysis of reviews of research on science and technology education in early childhood education The first part of the volume includes contributions by leading scholars in science while the second part includes contributions by leading scholars in technology The SAGE Handbook of Global Childhoods Nicola J. Yelland, Lacey Peters, Nikki Fairchild, Marek Tesar, Michelle S. Pérez, 2021-09-08 This Handbook explores the multidisciplinary field of childhood studies through a uniquely global lens It focuses on enquiries and investigations into the everyday lives of young children in the age range of birth to 8 years of age giving space to their voices and involving interrogations about the various aspect of their lives This Handbook engages with the interdisciplinary field of childhood studies education cultural studies ethnography and philosophy with contributions from scholars from across the globe who have focused their work on the complexities of childhoods in contemporary times By considering a range of epistemologies ontologies and perspectives to present the contemporary systematic research on the topic from a wide range of academics and authors in the field this Handbook provides a significant contribution to the international dialogue of Global Childhoods Part 1 Global Childhoods Part 2 Researching Global Childhoods Part 3 Contemporary Childhoods Part 4 Pedagogies and Practice Part 5 Creating Communities for Global Children *Early Childhood Activities for a Greener Earth* Patty Born Selly, 2012-06-22 More than 100 classroom activities to help children learn about and care for the earth Educate young children about the environment through experience and play These activities encourage children to develop a sense of wonder curiosity and joy for nature Each chapter focuses on a common and important environmental topic from waste reduction and recycling to air quality weather and climate change and energy reduction and provides information to help you present these topics to children in developmentally appropriate ways Early Childhood Activities for a Greener Earth will help you excite children engage families and encourage your community to be green Early Childhood Activities for a Greener Earth is a 2014 Teachers Choice Award for the Classroom winner Educating for Sustainability in Primary Schools Neil Taylor, Frances Quinn, Chris Eames, 2015-06-17 Education for Sustainability is a key priority in today s schools as our society seeks to find a balance between environmental social cultural political and economic imperatives that affect our future As young children will

become the next generation of adults it is vital that they are educated about sustainability issues so that they can learn to make informed decisions and take positive action for a sustainable world Teachers are ideally placed to educate for sustainability issues and indeed have a responsibility to do so However they often lack support and experience in this area and constraints of current curriculum priorities can inhibit Education for Sustainability being taught effectively in many classrooms Educating for Sustainability in Primary Schools Teaching for the Future addresses this problem by showing how Education for Sustainability can be developed within and across all areas of the primary curriculum in the Australian and New Zealand contexts The book provides a range of educational approaches and examples of activities to support teachers in addressing national requirements for teaching the major primary curriculum learning areas while simultaneously educating for sustainability This integrative approach to primary education can promote knowledge of positive attitudes towards and suitable action for sustainability in relevant meaningful enjoyable and creative ways This book is a valuable resource for all primary teachers who wish to make a real difference to educating children for the future
