Science Fiction: History, Science, Vision Robert Scholes, **Science Fiction** Robert Edward Scholes, 1977 **Encyclopedia of Contemporary Literary Theory** Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture

Modernism and Time Machines Tung Charles M. Tung, 2019-03-14 Bridging modernist studies and science fiction scholarship *Modernism and Time Machines* places the fascination with time in canonical works of twentieth century literature and art side by side with the rise of time travel narratives and alternate histories in popular culture Both modernism and this cardinal trope of science fiction produce a range of effects and insights that go beyond the exhilarations of simply sliding back and forth in history Together the modernist time obsession and the fantasy of moving in time help us to rethink the shapes of time the consistency of timespace and the nature of history

Key Features Draws on insights from a range of sources including critical geography postcolonial theory science and technology studies and time studies Examines different kinds of objects together SF Impressionism and Henri Lefebvre s rhythm analysis evolutionary biology Eliot s *The Waste Land* and Leinster s *e Sidewise in Time* Woolf Philip K Dick s alternate history and the film *Interstellar* bullet time Faulkner s racialized lag and Jessica Hagedorn s postcolonial anachronism *e big history e* Olaf Stapledon s two billion year novel of the human species and Terrence Malick s film *Tree of Life*

Modern Science Fiction: A Critical Analysis James Gunn, Michael R. Page, 2018-05-25 James Gunn one of the

founding figures of science fiction scholarship and teaching wrote in 1951 what is likely the first master's thesis on modern science fiction. Portions were in the short-lived pulp magazine *Dynamic* but it has otherwise remained unavailable. Here in its first full publication the thesis explores many of the classic Golden Age stories of the 1940s and the critical perspective that informed Gunn's essential genre history *Alternate Worlds* and his anthology series *The Road to Science Fiction*. The editor's introduction and commentary show the historical significance of Gunn's work and its relevance to today's science fiction studies.

The Films of James Cameron Matthew Wilhelm Kapell, Stephen McVeigh, 2011-09-29 Among the most expensive and most profitable films of all time the works of James Cameron have had a profound effect upon popular culture and the technology of moviemaking. Yet the very blockbuster nature of his films means that the political commentary, cultural discourse and rich symbolism within the works are often overlooked. From *The Terminator* to *Avatar* the director has evinced a persistence of themes, concerns and visions that capture the contemporary zeitgeist. This collection of essays on James Cameron's films, written by a diverse group of scholars from a wide range of disciplines, provides a comprehensive exploration of the work and legacy of one of America's foremost filmmakers.

J.G. Ballard Andrzej Gasiorek, 2024-07-30 This book offers a comprehensive account of the work of J.G. Ballard, regarded by several critics as one of the most significant fiction writers of recent times. Ballard's early science fiction writing earned him plaudits as one of the most innovative and individual voices in the field, but his development as a writer has taken him far beyond the confines of any single genre. This book traces Ballard's career from his early science fiction short stories and novels to his most recent work, particularly his timely reflections on the role of violence in contemporary social life. It argues that Ballard's writing is characterised by a distinctive vision of the post-war world and its possible futures and suggests that his far-reaching analyses of the present age make him one of the indispensable commentators of our time.

The System of Antichrist Charles Upton, 2005 *The System of Antichrist* examines the present religious and cultural scene from the standpoint of traditional metaphysics and critiques the New Age spiritualities within their postmodern context. Its many references to Rene Guenon and Frithjof Schuon also help introduce these important but little-known traditionalist thinkers. The book presents lore relating to the latter days of the present cycle from the vantage point of comparative religion, drawing upon relevant doctrines from Buddhism, Hinduism, Judaism, Christianity, Islam, Zoroastrianism and the Native American traditions. It also speculates upon the social, psychic and spiritual nature of that being known to Christianity, Judaism and Islam as the Antichrist, presenting him as both an individual and a system and warning those willing to be warned against the spiritual seduction and terror he represents and against the regime which will be and is the social expression of that seduction and that terror. Finally, in tracing the roots of Antichrist in the fallen nature of man, the author sketches the particular quality of spirituality proper to apocalyptic times, the dangers it faces, the unique opportunities open to it. And along the way he describes his own course from the spiritual revolution of the 1960s through the world of New Age spiritualities to the threshold of traditional esoterism and metaphysics. As he says:

speaking of the angst that characterizes the modern world The specific medicine for the shock of despair is the deeper shock of meaning Nothing but the weight of eternity breaking through the thin brittle shell of the postmodern sky can set us on our feet

Milton on Film Eric C. Brown, 2015-04-13 In January 2012 shooting was set to begin in Sydney Australia on the Hollywood backed production of Milton's Paradise Lost with Oscar nominee Bradley Cooper cast as Satan Yet just two weeks before the start of production Legendary Pictures delayed the project reportedly due to budgetary concerns and soon the company had suspended the film indefinitely Milton scholar Eric C Brown who was then serving as a script consultant for the studio sees his experience with that project as part of a long and perplexing story of Milton on film Indeed as Brown details in this comprehensive study Milton's place in the popular imagination and his extensive influence upon the cinema in particular has been both pervasive and persistent

Film and the Nuclear Age Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography chronology Illustrated

The Utopian Novel in America, 1886-1896 Jean Pfaelzer, 2010-11-23 In the late 1800s Americans flocked to cities immigration slums and unemployment burgeoned and America's role in foreign affairs grew This period also spawned a number of fictional glimpses into the future After the publication of Edward Bellamy's Looking Backward in 1888 there was an outpouring of utopian fantasy many of which promoted socialism while others presented refined versions of capitalism Jean Pfaelzer's study traces the impact of the utopian novel and the narrative structures of these sentimental romances She discusses progressive pastoral feminist and apocalyptic utopias as well as the genre's parodic counterpart the dystopia

Reality and Humean

Supervenience Gerhard Preyer, Frank Siebelt, 2002-07-15 If asked what Humeanism could mean today there is no other philosopher to turn to whose work covers such a wide range of topics from a unified Humean perspective as that of David Lewis. The core of Lewis's many contributions to philosophy including his work in philosophical ontology, intensional logic and semantics, probability and decision theory, topics within philosophy of science as well as a distinguished philosophy of mind can be understood as the development of a philosophical position that is centered around his conception of Humean supervenience. If we accept the thesis that it is physical science and not philosophical reasoning that will eventually arrive at the basic constituents of all matter pertaining to our world then Humean supervenience is the assumption that all truths about our world will supervene on the class of physical truths in the following sense: There are no truths in any compartment of our world that cannot be accounted for in terms of differences and similarities among those properties and external space-time relations that are fundamental to our world according to physical science.
