Science Fiction ,2002 *The Year's Best Science Fiction: Nineteenth Annual Collection* Gardner Dozois,2002-07-22

The twenty first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed New possibilities previously unimagined appear almost daily and science fiction stories continue to explore those possibilities with delightful results Collected in this anthology are such compelling stories as On K2 with Kanakaredes by Dan Simmons A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company The Human Front by Ken MacLeod In this compassionate coming of age tale the details of life are just a bit off from things as we know them and nothing is as it appears to be Glacial by Alastair Reynolds A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction The twenty six stories in this collection imaginatively takes us far across the universe into the very core of our beings to the realm of the gods and the moment just after now Included here are the works of masters of the form and of bright new talents including Eleanor ArnasonChris BeckettMichael BlumleinMichael CassuttBrenda W CloughPaul Di FilippoAndy DuncanCarolyn Ives GilmanJim GrimsleySimon IngsJames Patrick KellyLeigh KennedyNancy KressIan R MacLeodKen MacLeodPaul J McAuleyMaureen F McHughRobert ReedAlastair ReynoldsGeoff RymanWilliam SandersDan SimmonsAllen M SteeleCharles StrossMichael SwanwickHoward WaldropSupplementing the stories are the editor s insightful summation of the year s events and a lengthy list of honorable mentions making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart *Science Fiction: the Best of 2001*

Mammoths of the Great Plains Eleanor Arnason,2010-05-01 When President Thomas Jefferson sent Lewis and Clark to explore the West he told them to look especially for mammoths Jefferson had seen bones and tusks of the great

beasts in Virginia and he suspected he hoped that they might still roam the Great Plains In Eleanor Arnason's imaginative alternate history they do shaggy herds thunder over the grasslands living symbols of the oncoming struggle between the Native peoples and the European invaders And in an unforgettable saga that soars from the badlands of the Dakotas to the icy wastes of Siberia from the Russian Revolution to the AIM protests of the 1960s Arnason tells of a modern woman's struggle to use the weapons of DNA science to fulfill the ancient promises of her Lakota heritage PLUS Writing SF During World War III and an Outspoken Interview that takes you straight into the heart and mind of one of today's edgiest and most uncompromising speculative authors

American Science Fiction Film and Television Lincoln

Geraghty,2009-10-01 American Science Fiction Film and Television presents a critical history of late 20th Century SF together with an analysis of the cultural and thematic concerns of this popular genre Science fiction film and television were initially inspired by the classic literature of HG Wells and Jules Verne The potential and fears born with the Atomic age fuelled the popularity of the genre upping the stakes for both technology and apocalypse From the Cold War through to America s current War on Terror science fiction has proved a subtle vehicle for the hopes fears and preoccupations of a nation at war The definitive introduction to American science fiction this is also the first study to analyse SF across both film and TV Throughout the discussion is illustrated with critical case studies of key films and television series including The Day the Earth Stood Still Planet of the Apes Star Trek The Next Generation The X Files and Battlestar Galactica **Science Fiction Double Feature** J. P. Telotte,Gerald Duchovnay,2015-07-27 Critical discussion of cult cinema has often noted its tendency to straddle or ignore boundaries to pull together different sets of conventions narrative formulas or character types for the almost surreal pleasure to be found in their sudden juxtapositions or narrative combination With its own boundary blurring nature as both science and fiction reality and fantasy science fiction has played a key role in such cinematic cult formation This volume examines that largely unexplored relationship looking at how the sf film s own double nature neatly matches up with a persistent double vision common to the cult film It does so by bringing together an international array of scholars to address key questions about the intersections of sf and cult cinema how different genre elements directors and stars contribute to cult formation what role fan activities including con participation play in cult development and how the occulted or bad sf cult film works The volume pursues these questions by addressing a variety of such sf cult works including Robot Monster 1953 Zardoz 1974 A Boy and His Dog 1975 Tetsuo The Iron Man 1989 Space Truckers 1996 Ghost in the Shell 2 2004 and Iron Sky 2012 What these essays afford is a revealing vision of both the sf aspects of much cult film activity and the cultish aspects of the whole sf genre [The World's Finest Mystery and Crime Stories: 3](#) Edward Gorman,Martin Harry Greenberg,2002 Gathers mystery suspense and crime stories from around the world **The World's Finest Mystery and Crime Stories** Ed Gorman,Martin H.
