Science In A Renaissance Society:

Science in a Renaissance Society William Persehouse Delisle Wightman, 1972 A historical study of the interrelations of science and society from c 1450 to c 1620 Printing medicine and the discovery of the New World are considered against a background of political and religious change The final chapters emphasize the influence of quantification the concern with natural magic and the psychological motivation of such leading figures in the so called Scientific Revolution as Kepler Gilbert and Bacon *The Reenchantment of the World* Morris Berman, 1981 Morris Berman's book addresses what I consider to be the most important topic at our present moment in history He is searching for the underpinnings of a new world view that can give rise to a culture capable of relating gently and self sustainingly to the earth Frederick Ferr *The Reenchantment of the World* is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it Berman shows how science acquired its controlling position in the consciousness of the West He analyzes the holistic animistic tradition destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries which viewed man as a participant in the cosmos not as an isolated observer Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment he explores the possibilities for a consciousness appropriate to the modern era Ecological rather than animistic this new world view would be grounded in the real and intimate connection between man and nature **Science in the Renaissance** Clarisse Doris Hellman, 1955 **The Palace Academy of Henry III** Robert J. Sealy, 1981 Paracelsus Andrew Weeks, 1997-01-01 Paracelsus is commonly regarded as one of the great figures of sixteenth century Europe and of German intellectual history This book examines the content of his writings in order to clarify it and its historical context **Society and Economy in Early Modern Europe, 1450-1789** Barry Taylor, 1989

Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution *Science, Art and Nature in Medieval and Modern Thought* A.C. Crombie, 1990-07-01 The author sees the history of Western Science as the history of a vision and an argument initiated by the ancient Greeks in their search for principles at once of nature and of argument itself This scientific vision explored and controlled by argument and the diversification of both vision and argument by scientific experience and by interaction with the wider contexts of intellectual

culture constitute the long history of European scientific thought Underlying that development have been specific commitments to conceptions of nature and of science and its intellectual and moral assumptions accompanied by a recurrent critique their diversification has generated a series of different styles of scientific thinking and of making theoretical and practical decisions which the work describes

Art and Science Stephen Richards Graubard,1986 This volume brings together a distinguished collection of thinkers to consider the complex relation and divergence between art and science How art and science relate to technology why they should be thought relevant to morality and what their study can possibly contribute to the understanding of the nature of the mind are only a few of the subjects explored in these pages

Science and the Secrets of Nature William Eamon,2020-06-30 By explaining how to sire multicolored horses produce nuts without shells and create an egg the size of a human head Giambattista Della Porta s *Natural Magic* 1559 conveys a fascination with tricks and illusions that makes it a work difficult for historians of science to take seriously Yet according to William Eamon it is in the how to books written by medieval alchemists magicians and artisans that modern science has its roots These compilations of recipes on everything from parlor tricks through medical remedies to wool dyeing fascinated medieval intellectuals because they promised access to esoteric secrets of nature In closely examining this rich but little known source of literature Eamon reveals that printing technology and popular culture had as great if not stronger an impact on early modern science as did the traditional academic disciplines
