Sport and exercise science and medicine Great Britain: Parliament: House of Lords: Science and Technology Committee, 2012-07-18. This report on sport and exercise science and medicine says that more must be done to make use of exercise based treatments. There is compelling evidence that physical activity can be used as part of treatment for a wide range of chronic diseases. Yet there is a lack of awareness and appropriate training for health professionals of the benefits of exercise based treatments. A recent survey of 48 London GP practices found that none were aware of the latest Physical Activity Guidelines. The NHS should consider adding physical activity to the Quality and Outcomes Framework which rewards GPs for how well they care for patients. NICE and the NHS should update chronic disease guidelines with detailed information about exercise and evaluate the best way to deliver exercise treatments through the NHS. There is disappointment that the Sports Minister was interested only in increasing participation in sport, not using sport to improve the nation's health. The Committee believe that the National Centre for Sport and Exercise Medicine set up as part of Olympic legacy may not be sustainable. The funding from government is a one off 30m capital investment with no satisfactory strategy beyond that. On sports science the Committee argue that approaches taken to improve the performance of elite athletes are not consistently based on strong biomedical science nor do they seem to be systematically informed by the latest developments in science. Findings from high quality sports science could provide the basis for translational research to produce benefits for the wider public.

Sport and Physical Education in Germany Ken Hardman, Roland Naul, 2005-07-26. Sport and physical education represent important components of German national life from school and community participation to elite international level sport. This unique and comprehensive collection brings together material from leading German scholars to examine the role of sport and PE in Germany from a range of historical and contemporary perspectives. Key topics include sport and PE in pre-war, post-war and re-unified Germany; sport and PE in schools; coach education; elite sport and sport science; women and sport; sport and recreation facilities. This book offers an illuminating insight into how sport and PE have helped to shape Germany. It represents fascinating reading for anyone with an interest in the history and sociology of sport and those working in German studies.

Comparative Elite Sport Development Barrie Houlihan,Mick Green,2007-11-19 There is a paucity of academic work in the area of elite sport development despite there being ample evidence that achieving international sporting success is of increasing importance to the public exemplified by consistent media interest in elite success or the lack of it and to governments in most developed countries who have almost without exception increased the level of public funding for elite squad development often to the detriment of other sports policy objectives such as increasing general levels of participation Comparative Elite Sport Development systems structures and public policy focuses on the identification and development of elite sporting talent especially in Olympic sports Written by a team of international contributors it applies a reflective and analytical approach and both informs and is informed by established bodies of theory in policy analysis Uniquely it adopts a comparative approach of policy rivals leading sports powers and policy innovators which provides broad and thorough analytical coverage
