Marco P. Vianna Franco, Antoine Missemer, 2022-08-01 Contributing to a better understanding of contemporary issues of environmental sustainability from a historical perspective this book provides a cohesive and cogent account of the history of ecological economic thought The work unearths a diverse set of ideas within a Western and Slavic context from the Renaissance and the Enlightenment to the late 1940s to reveal insights firmly grounded in historiographical research and of import for addressing current sustainability challenges not least by means of improving our grasp on how humans and nature can generously coexist in the long term The history of ecological economic thought offered in this volume is rich and diverse encompassing views that are bound by the observance of the tenets of the natural sciences but which differ significantly in terms of the role of energy and materials to cultural development and the normative aspects involving resource distribution social ideals and policy making Combining the approaches of independent scholarly figures and scientific communities from different historical periods and nationalities the book brings elements that are still missing in the scarce literature on the

history of ecological economic thought and highlights the underlying threads which unite such initiatives The book brings a fresh look into the historical development of ecological economic ideas and will therefore be of great interest to scholars and students of ecological economics environmental economics sustainability science interdisciplinary studies and history of economic thought [Linnaeus](#) Lisbet Koerner,2001-04-16 Drawing on letters poems notebooks and secret diaries Lisbet Koerner tells the moving story of one of the most famous naturalists who ever lived the Swedish born botanist and systematizer Carl Linnaeus The first scholarly biography of this great Enlightenment scientist in almost one hundred years Linnaeus also recounts for the first time Linnaeus grand and bizarre economic projects to teach tea saffron and rice to grow on the Arctic tundra and to domesticate buffaloes guinea pigs and elks as Swedish farm animals Linnaeus hoped to reproduce the economy of empire and colony within the borders of his family home by growing cash crops in Northern Europe Koerner shows us the often surprising ways he embarked on this project Her narrative goes against the grain of Linnaean scholarship old and new by analyzing not how modern Linnaeus was but how he understood science in his time At the same time his attempts to organize a state economy according to principles of science prefigured an idea that has become one of the defining features of modernity Meticulously researched and based on archival data Linnaeus will be of compelling interest to historians of the Enlightenment historians of economics and historians of science But this engaging often funny and sometimes tragic portrait of a great man will be valued by general readers as well **Unfabling the East** Jürgen Osterhammel,2019-11-19 During the long eighteenth century Europe s travelers scholars and intellectuals looked to Asia in a spirit of puzzlement irony and openness In this panoramic and colorful book Jürgen Osterhammel tells the story of the European Enlightenment s nuanced encounter with the great civilizations of the East from the Ottoman Empire and India to China and Japan Here is the acclaimed book that challenges the notion that Europe s formative engagement with the non European world was invariably marred by an imperial gaze and presumptions of Western superiority Osterhammel shows how major figures such as Leibniz Voltaire Gibbon and Hegel took a keen interest in Asian culture and history and introduces lesser known scientific travelers colonial administrators Jesuit missionaries and adventurers who returned home from Asia bearing manuscripts in many exotic languages huge collections of ethnographic data and stories that sometimes defied belief Osterhammel brings the sights and sounds of this tumultuous age vividly to life from the salons of Paris and the lecture halls of Edinburgh to the deserts of Arabia the steppes of Siberia and the sumptuous courts of Asian princes He demonstrates how Europe discovered its own identity anew by measuring itself against its more senior continent and how it was only toward the end of this period that cruder forms of Eurocentrism and condescension toward Asia prevailed [Sextants at Greenwich](#) W.F.J. Vermeulen, 2015-07 The history of anthropology has been written from multiple viewpoints often from perspectives of gender nationality theory or politics *Before Boas* delves deeper into issues concerning anthropology's academic origins to present a groundbreaking study that reveals how ethnography and ethnology originated during the eighteenth rather than the nineteenth century developing parallel to anthropology or the natural history of man Han F. Vermeulen explores primary and secondary sources from Russia Germany Austria the United States the Netherlands Hungary the Czech Republic Slovakia France and Great Britain in tracing how ethnography originated as field research by German speaking historians and naturalists in Siberia Russia during the 1730s and 1740s was generalized as ethnology by scholars in Göttingen Germany and Vienna Austria during the 1770s and 1780s and was subsequently adopted by researchers in other countries *Before Boas* argues that anthropology and ethnology were separate sciences during the Age of Reason studying racial and ethnic diversity respectively Ethnography and ethnology focused not on other cultures but on all peoples of all eras Following G.
